THE TIME TO WEEP.

There is a time to laugh,
Whon joy may raise his hillows like the deep,
And twine with wreaths of flowers the cup we quaff,—
But O, when is the season not to weep?

Is it when vernal suns
Unfold the silken flower, and satin leaf?
Or when the hear frest nips the fading ones,
That frailer beings may refrain from grief?

Is it when health and bloom Are painted on the smiling check of youth? Or when disease is training for the temb The heart which cherisheth its bitter truth?

Look not upon the brow,
That shows no furrow from the plough of years;
There is a bend of peace upon it now—
But ob! futurity is full of lears!

The practiling child at play,
May charm itself, and dry its tears awhile;
But could its vision reach beyond to-day,
And read its sorrows, think you it would smile?

Destruction has its home,
And mirth is destined to some favorite spot,
Disease and all his brothers do not roam;
But where—O wretchedness! where art thou not?

Thou hast thy dark abode
In the lone desert—in the prison's cell—
And in the gayest sence, where ever flowed
The tide of wine and music, thou dost dwell.

Thou art where friends are torn And held asuader by reluctant space, And meeting triends—O, do they never mourn When memory paints thine image on the lace?

Thy innoates of the breast.—
All other passions—are but weak and brief;
Joy, Hope, Pride, Love and Hatred bave a rest,
But thou art constant as our breath, O Griof!

Then let the trifler laugh,
And Joy lift his glad billows like the deep,
And twine with wreaths of flowers the cup we quaff;
It is far better for the wise to weep.

LITTLE LADY CAROLINE.

I know a sweet little girl,
With a voice like a singing bird's,
And 'tis bliss to look on her lovely face
And list to her joyons words—
Oh many a heart will mally pine
For her—that sweet young Caroline.

I know a fair young girl,
With an eye like the sky's own blue,
Or a sweet spring flower when its azure leaves
Are bright with the early dew—
Oh a thing half earth and half divine
Is sho—that fair young Caroline.

I know a bright young girl,
And her every thought's a gem,
A lovelier diamond than ever flashed From a kingly diadem-In Heaven-that bright young Caroline.

But little did Delilah heed the warning shake of the finger, or the awfully prophetic words of Aunt Marcia, as she danced around the room in an eestacy of fun, holding her graceful sides, and filling the house with the merry music of her extravagant mirth? Why, she had caught her Aunt Marcia composedly duzing an her rocking chair; and we doubt whether a drowning man ever caught more eagerly at a straw than did the mercurial girl at one which lay, suggestive of sly mischief, upon the floor. How it was nearly time for her company to her it was nearly time for her company to her it was nearly time for her company to her head a smart shake, as if to dislodge a saucy fly, and Delilah compressed ther pretty red lips, to restrain her merriment. above quoted. Lively as a cricket, and quite as noisy, was Delilah Moore. She was very pretty too-in-deed, bewitching. Auburn hair, that floated in deed, bewitching. Auburn hair, that floated in ringlets of gossamer lightness about the soit and fairest of cheeks—light blue eyes, a light step, and a lighter heart, and rosy lips, that smiled incessantly, even in sleep—ah! what a little lump of mischievous sweetness she was? But she was most incorrigibly addicted to practical joking. I dare say there was not an individual in the village, who had not, at some time or the village, who had not, at some time or other, been a victim to this propensity of her's and yet nobody could ever be seriously angry and yet nobody could ever be seriously angry with her. Every one chided her; yet every one loved her. Very nervous people were afraid of her, and fond of her, too; and by such she was treated somewhat after the rashion in which people treat a playful kitten—tondled, but always with due respect to her claws.

Many a village youth addressed her, but she proved a will-of-the-wisp to her wooers. She was never serious long enough to hear a pro-posal, so that most of them soon wearied in the butterfly chase she led them. But even a butterfly is caught sometimes; and it is not to be supposed that Delilah could rove forever free .-Her mother often said that just in proportion as she teased, annoyed and ridiculed particular persons, she loved them; and if this was a true criterion, young Walter Lake must have possessed a very large ishare of her affections—for if there was any one whom she delighted to plague and play tricks on more than another, it

It toppled over, and Walter, in the effort to shield her, canght the whole weight of the blow upon his right arm. It occasioned but a slight bruise; but perceiving the alarm which Delilah's features instantly exhibited, he turned the affair to good account by affecting to be seriously hurt. Almost ere she had time to think, she had exchanged vows and plighted her faith irrevocably. The cream of the joke, however, Delilah alone enjoyed. While she had determined to turn the defrauded of her dues—but had in reality received the kiss herself.

Months passed on, and Dellah continued the same provoking, pretty, bewitching mischevious little madcap as ever, with the exception that her jokes were not altogether as harmless as formerly, but became more seriously annoying in their character. To be sure she never occasioned pain to others, that she did not bitterly lament it and sorrow over her inconsiderateness with a penitence that was truly sincere— while it lasted. But the rebound of her feelings was always in proportion to the grief which at the moment oppressed them and she was no sooner done mounding for the consequences of one excess than she was guilty of a greater. Her mother scolded, her father threatened and her lover entreated—but all alike ineffectually. The latter, indeed, sometimes thought seriously of giving her up entirely for his judgement whispered him that it would be impossible to live in harmony with such a mixture of mischief and caprice; yet semehow his heart in the other scale always kicked the beam athe other scale always kicked the beam against his reason, and he could not muster resolution to torsake her. Setting out Trees.

Commence setting your fruit and shade trees as Commence setting your fruit and shade trees as soon as the frost is out of the ground. The depth of the pits or holes must be in accordance with the nature of the land. If it be clayey, then plant shallow, that the roots may be near the surface, but protect them by raising the earth in the form of a mound around the tree. If the land be sandy, then plant deep, that the roots may be better protected against the drying and scorching effects of a mid-summer sun. Observe the depth of the roots of trees growing naturally in similar land, and it will afford you the best answer that can possibly be given to the question, how deen? that can possibly be given to the question, how deep? Remember that shade trees taken from the forest, have grown in a soil enriched for ages, by the mouldered dust of previous vegetation, that your land is not rich in this mould, and that, therefore, the trees will be liable to become stunted, or starved, when planted in it. Your alternatives are, to rob the forest of its vegetable mould, or take the mould of wellrotted peat, chips, or other rubbish, and mingle them with the earth of your land, which may thus be converted into a rich, mild soil.

If neither of the above materials are at hand, you must even then do the best that lies in your power,

and this in all probability will be to remove the surface soil from the place where you intend planting the tree, and then dig out the lower earth, throwing it one tree, and then dig out the lower earth, throwing it one side; after which fill up the pit or hole to a proper depth with the soil first removed, then set in the tree, and complete the work by filling in and treading down good surface soil, if you have to rob the land for some distance around. The deeper and more extended the good soil in which you plant your tree, the better. If you have well-routed materials to enrich your lands with, still let us impress it distinctly upon your mind, that soil consists in the due admixture of the materials, mould and earth—and not in a shovelthe materials, mould and earth—and not in a shovelthe materials, mould and earth—and not in a shovelfull of each, lying side by sude, or one above
the other; therefore, the mixing of the materials
should be thoroughly performed. If the land is naturally poor, still plant your tree in it, but at the same
time resolve to follow nature's promptings—prepare
mould by rotting down peat, chips, straw stalks, or
other vegetable rubbish. And when they are thoroughly decayed, dress the surface of the land therewith,
leaving it to be worked in by ruins, or in after tillage.

From the Maine Cultivator. SLOBBERING IN HORSES.

Various theories have been advanced to account for the salivation of horses. Some contend that it is occasioned by the second growth of a grass which appears in August,—the Euphorbia maculata of Botanists—others by red clover; others again contend that it is brought on by spiders' webs which are so numerously spread over the grass lowards the clove of summer. A fourth class of theorists attribute to to lobelia, and to this last substance, we have no doubt, we are to look as the genuine and sole cause of the disease in question. The Maine Farmer has the following or the other. lowing on the subject :

"Our own family jade—a hearty and kind creature—has not enjoyed the luxury of grass for three years, and has always been kept in good trim on hay, with very little provender. In July we had the barn filled with her year's stock of hay, sweet from the field.—Soon after the horse began to eat, she commenced slobbering abundantly. Being quite out of patience. we set our wits to work to ascertain the cause. Some lold us it was white clover, some said it must be lo-

belia. On making strict examination, we found that the last load, put into the barn, had much lobelia and but little white clover in it. As an experiment, we, for several days in succession, previous to feeding, were careful to cull the hay by handfuls, and pick out the lobelia. From this moment the slobbering the office into the house, which was adjoining, and was soon engaged in poking fun at her aunt. The Doctor, meanwhile, commenced a diligent search of the office for the cause of her amusement. While he was thus engaged, his servant returned with the altered prescription, which solved the mystery. Miss Olivia Afterprime had night gone into convulsions at the sight of it, and not begin in the cause of slobbering in horses. without the pains of separating the lobelia from the

Ashes.

As a manure, ashes, on certain soils, are invaluable. We have frequently experienced the beneficial effects resulting from their application, but never more convincingly than during the present year. Through the entire season, the rows on which the ashes were applied, took the lead, and at harvest produced one third more corn than those which had the gypsum.

On corn, beans and where select leaghed or releashed corrects with and wheat, ashes, leached or unleached operate with the best effects. The deceased was a good man, but very eccentric. He was well known in the West for his connection with blooded horses, about which he wrote much and well. A friend tells a characteristic anecdote of the par-son which is worthy of mention. He owned a fine race horse in conjunction with a celebrated turfman and trainer, and when the fact was made known to his parishioners, they made enquiry as to its truth, and the charge was brought home to him. At a meeting of the elders, the reverend gentleman was called before them to exculpate himself from the heinous of before them to exculpate himself from the heinous of fence of running a horse in a race. Feeling that it would be idle to put his defence upon the rational ground of the morality and utility of racing—a defence which he was competent to make with ingenuity and force—he made up his mind to "confess and avoid,"

as the lawyers say.

Accordingly he addressed them thus: "It's true gentlemen, Tom Walson and I own Jake Creath to gether—when he starts he wins. Old man Watson gether—when he starts he wins." Accordingly 1981 here. irains and runs him at his own expense—I get half the winnings, because I allow my half of the horse to go when Tom's half goes. If you will provide a way for my half of the horse to remain in the stable during the race, I am perfectly willing to retire from the turf."

Whether the elders were convinced by this logic, or were mollified by his having named the horse after the Rev. Jacob Creath, a celebrated preacher, we know not; but he was not dismissed from his charge.

City Government of Salem.

The City Government of Salem was organized on Monday last-Joseph S. Cabor, Esq., Mayor, and Joseph G. Sprague, Esq., President of the Common Council.

The Address of the Mayor represents all the departments of the city as in a satisfactory condition. He states the present population of the city to be 16,762, as ascertained by a census the past year There have been erected the last year, 2 brick and 59 wooden dwelling houses, 6 brick blocks containing 13 stores, a brick Steam Cotton Factory. 1 brick and 1 wooden steam planing and machine shop, a brick hall with 4 stores, and 6 other wooden buildings, making 77 buildings erected during

For the Fire Department, \$8,568 were expended, of which \$3,402 were for the ordinary expenses. There are 10 Engines and 660 members as now organized.

In the Department of the Poor, the nett cost of their support was \$2,114,70, there being 139 inmates of the Alms House. There were 52 sent to the House by sentence of the Police Court. The Mayor attributes the entry of this unusually large number to "the free use of ardent spirits and the greater facilities for obtaining them," and to check this evil he thinks that "no means will be effectual unless such as would place beyond the reach of those, who, from habitual excess, are rendered incapable of resisting the cravings of a vitiated appetite, the means of its gratification."

We wish our space would allow us to extract largely from this excellent Address, as it shows the superiority in fiscal accountability, of a city over a town government.

We are glad to find by the annual Report to the Legislature, that this corporation is in so flourishing condition. Its stock has never been sold at less than par, and we are assured that there is none now in the market. This is partly owing to the fact that it has always been kept out of the reach of the brokers, but principally on account of the economical structure and management of the rond. The corporation has been careful to avoid those enormous outlays for grading, land damages, heavy iron rails, and various other expenses which have made many of our Railroads require so large a capital. It is also remarkable that not the slightest accident or damage has happened to any passenger, conductor, engineer, brakeman, or any other person on the road, if we accept the trifling pecuniary damage to those who obtained the char ter. By the peculiar construction of this road, all danger of interference with the travel on common roads is effectually avoided. All who travel on this road are delighted with the newly patented invisible Cars and imaginary Locomotives, which render the motion while at their greatest speed, quite imperceptible. The new dumb bells and silent steam whistles are also said to be much less annoying to passengers than those in common use on other Railroads.

As some curiosity may be excited among people at a distance to know how to avoid the laborious process of digging through hills and filling up vallies, in building a Railroud, it may not be liquor in Austin Burn's restorator? smiss to state that the Danvers and Georgetown Railroad is constructed on a grade perfectly level the whole distance, the rails not being laid on sleepers, but on good, substantial drawing paper.

We have heard it intimated that in a certain contingency, the Salem and Andover Railroad is to be built in the same substantial manner. It is also reported that the rails are to be secured by a new species of gum, specimens of which were exhibited to the Railroad Committee. It is an excellent article of the kind, very beautiful and quite swer that. transparent.

POTATORS. This important root is rising in price from its scarcity, and unless farmers are careful to retain enough of their old crop for seed, they will be scarce and dear next season. As potatoes increase in price, their great value as an article of food is more and more appreciated .--They are now of just about the same price as apples and oranges, but these would be a poor substitute for the potato.

Tanning.

We notice that there is another discovery of an improved method of tanning leather, which is going the rounds of the papers. Like many others which have preceded it, it can be of no practical value. A friend at our elbow suggests that if a discovery could be made of a new mode of turning leather back to hides, it might become a very profitable business.

ase. We only ask for leave to branch out to one of two roads-this same theory of "branching out" being the great pet of our opponents. We dequest only to be allowed to branch out to that which will best accommodate us and our interests. And I join issue with my brother, in his state-ment that it would be bad policy in the state to grant this charter. Bad policy to meet a popular emand by a Legislative supply? We have shown that rail-roads were made for the people as the Sabbath is made for man, not the people for the rail-roads; and I will only say-replying to the gentleman-that the bad policy would li in refusing this application. License Cases.

We had the opport unity of hearing, this week. some of the evidence in the Court of Common Pleas, Judge Ward presiding, on one or two of the License cases. It is astonishing, and as the learned judge remarked in his charge to the jury, it is one of the crying sins of the times, that men will take the oath of God upon them and commit the vilest perjury when called to testify in these cases. It is only a strong and convincing proof of the deep moral debasement which almost always follows from the contaminating influence of the Legislature, and casts the largest vote. alchoholic drink and those who vend it upon the poor victims of indulgence.

It is surprising, and were it not for the melancholy feelings produced by witnessing such debasement, it would be amusing to see the miserable evasions, shuffling and downright falsehood which drop from the foul mouths where the "enemy that steals away the brains," has so often entered.

These witnesses usually have very short memoies. If they know any thing they never know it certain. Something like the following dialogue between Mr. Nelson, the County Attorney, and one of these witnesses, will show our meaning.

In the mean time, things were chauged. Business flagged, and many who were pnor but industrious, left the place to find labor, and those who had property, left it to avoid high taxallon. The city has struggled along under the load, using a severe economy, which was the more necessary in consequence of their former e stravagance. Hats.

There is nothing about the fress of a man that so improves his appearance and sets off to advantage his other attire, as a new, fashiorable and glossy hat .--On the other hand, there is nothing that gives a man such a woe-begone, seedy and loaferish appearance as a "shocking bad hat." No matter how white his linen, or how fine his broaddoth, if it is surmounted by a shabby or unfashionaple hat. Any man may appear genteel with a thread bare coat, soiled pants or a sack of the coarsest material, if he will only supply himself with a fashionable HAT from the establishment of Messrs M. E. Osgood & Co. at No. 58, Washington St., Boston, Mr. Osgood is well known as a worthy townsman, particularly in the north part of the town, and we advise all of our citizens in need of a hat, to call at his store where they will not fail to be suited. Town Expenses.

Mr Editor-I want you to exidain a little about the Auditor's Statement of the town expenses. I put on my glasses last evening after the child ren had gone to bed, and looked it over and find some things that puzzle me not a little. There's the Fire Department. After all the expenses of all the Enginesand Engine houses and Reservoirs and Sails and Fire Hooks and Pumps and Cisterus then comes another item for "Miscellaneous,"-Now Mr Editor, I want to know what that means. I haint got no dictionary but I suppose it means something and I think when you print such hard words you ought to translate 'em for us common How am I to know what \$294 worth of "Miscellaneous" means? I suppose it is the name of a new Engine but I should like to know

for surtain exactly what it is.

Then there's the Poor Department. After the Overseers have spent \$5,731,20 for supplies, it seems as if \$2,456,44 is paid back into the treasury. Now I want to know what this is for. Do the paupers get up a subscription paper and raise the money for the benefit of the town? Or, do the overseers sell things from the farm? If they do, why cant they tell us what things they sell and all about it? Then there's the Town Clork. They pay him \$117,48 for sarvices in 1814 and then dont pay him but half price in 1845. Why cant the town pay the Clerk what's right for all his sarvices and have no extras about it. I aint agin paying a man for all he airus.

"The efficacy of Galvanism in the cure of dis-

The diffi-culty has been, that while the patient received a benefit in one direction, he was injured by the severity of the shocks. This difficulty has of late been in a great measure remedied, by an improved construction of the Galvanic Battery. But the great desideratum lay still beyond; it was to apply the Galt anic power gently and unceasingly. This important object has been accomplished by the Galvanic Rings, which have lately been invented. and have suddenly risen into much public favor,-In relation to these Rings, we have witnessed some very practical results, unless we are greatly mistaken in the cause. One was that of an or-phan girl in our own charge, and temporarily in our family, who had been a great sufferer under paralytic shocks, till she had nearly lost the use of her limbs. Numbness and Rheumatism.

HIS invaluable article is now for the first time offered to the public, after having been in use for twenty years, with anusual and astonishing success within the circle of the proprietor's immediate influence. It has received the unqualified approbation of some eminent Physicians, and also Mariners and Mechanics.

It is also recommended, and more than a thousand cases might be cited, when it has been used for Horses in cases of lameness or when galled, &c. &c.

The public are assured that in offering the above we

do recommend that which has not the least semblance of DUACKERY, but on the contrary it has done great and lasting good in its efficacious power and healing qualities.
As this medicine has been so long known in Salem

and its vicinity, and as there are many that would avail themselves of it if they knew where it could be obtained, therefore the subsciber would now offer it to the public. It will be found always on hand and to the public. It will be prepared by the subscriber.

TRUSS MANUFACTORY.

TRUSS MANUFACTORY.

THE subscriber continues to manufacture at the old stand, opposite 264, No. 305 Washington street, Boston, entrance in Temple Avenue, up stairs. All individuals can ee him alone, at any time, at the above place.

Having had twenty years' experience, he has afforded relief to three thousand persons, for the last five years. All may rest assured of relief who call and try a Truss of his manufacture. He is now confident he can give every individual relief who may call upon him.

The public are cautioned against the many quacks who promise what they cannot perform.

Having worn the different kinds of Trusses, more or less; that have been offered to the public for the last twenty years, from different patent manufactures, and now contines to wear those of his own manufacture, he is now able to decide, after examining the rapture, what sort of Truss

to decide, after examining the rapture, what sort of Truss is best to adopt to all the cases that occur; and he has on and as good Trusses, and will furnish any kind of a Truss that can he had elsewhere.

J. F. F. manufactures as many as twenty different kinds.

of Trusses, among which are all the different knots similar to those that the late Mr. Jonn Beath, of this city, formerly made, and all others advertised in Boston, together with imade, and all others advertised in Boston, together with the patent elastic spring Truss, with the spring pads.
Trusses without steel springs—these give relief in all cases of rapture, and a large proportion produce a perfect core— they can be worn day and night; haproved hinge and pivot Truss; umbellical spring Trusses, made in four different ways; Trusses with ball and socket joints, Trusses, for Prolapsus Ani, by wearing which persons troubled with a descent of the recom can ride on borseback with perfec-case and safety.

descent of the rectum can ride on borseback with perfecease and safety.

Mr. Foster also makes Trusses for Prolapus Uteri, which have answered in cases where possaries have failed. Suspensory Trusses, knee caps, and back board, are always kept on hand. As a matter of convenience and not of speculation, the undesigned will keep on hand the following kinds from other manufactories, which they can have, if his does not suit them; after a fair trial they can exchange for any of them;—Dr, Hull,s Read's spiral Truss; Rundel's do; Salmon's ball and sucket; Sherman's putent; French do; Marsh s Improved Truss; Bateman s do, donlie and single. Stone s Truss; also, Trusses for children of all sizes.

Any kind of Trusses repaired at short notice, and made as good as when new.

good as when new.

Ladies wishing for any of these instruments, will be waited upon by Mrs. Foster, at the above place. Mrs. F. has been engaged in the above business for ten years. Its likewise informs individuals he will not make their complaints known to any one, except when he is permitted orefer to them—it being a misfortune, and young persons do not want their cases known.

ca'The readers of this paper, are respectfully invited to ill and examine the variety of Trusses now on hand, May 31

POETRY.

The following beautiful Ode, which was sung at the Dedication of Holten Hall to the use of Helten Lodge-1 O. of O. F., on Wednesday evening of last socek, was cumposed for that areasion by one of our townsmen:

Emblems, rich in varied splendor, Nature's boundless hall festoon! Raptures they awaken render Vision's power a priceless boon. Sight and sense bedimmed and sordid Their enigmas ne'er unseal ; But to some is light awarded, Their areana to reveal,

Morning is Aurora blushing, As Night's veil aside she throws; Eve, the hour when tired Earth, hushing Day's loud murmur, seeks repose. And the azure sky outspreading

Is the gorgeous canopy O'er man's couch soft radiance shedding, While he sleeps, from cumbrance free.

Secred from association Are life's objects treasured most, Kindling friendship's admiration Ere its glowing spark be lust. Hallowed thus these walls! devoted To fraternul greetings now. Amity be here promoted ! Wisdom every rite endow !

Far hence ever be dissension ! Pages! here wave thy magic wand! Cherished be each kind intoution, Strengthening still the social bond; Limpid, sparkling water, flowing From the stainless fountain's hp, Life to arid fields bestowing, Symbol of our Fellowship!

of Danvers, who died Nov. 16, 1845.

He died; but not as many, who through months Of wearness and pain, have warning of their end. Death come suddenly, and with resistless power Bore han to his edent anosious.

The day on which he died found him pursuing His accustomed round, basied with the world. Returning home, at the usual time he sought His bed, but not his rest. Disease soon Proyed upon his vitals, and at the Midnight hour, his spirit fied.

We miss him. The world with whom he Mingled, miss him. The Church, the Lule band, will miss him. The Salbath will miss him. School with whom he met will miss him.
School with whom he met will miss him.
The praying circle where his voice was
Often heard, will miss him. The slave for

Reader! what are thy thoughts on Doath!
Thou seest that others die, and know
That Doath hath murked thee fur its own.
But art thou ready? Art thou armed
Against its sing! Hast thou the
Panoply of gaspel laith? Is Christ the
Lovely one, the chief among ten thousand?
If not, oh stup in thy carear! Improve
The present moment! and while life
And health remain, secure the golden treasure;
And then when Death shall come,
It shall be to thee the harbinger of peace.
Thou wilt enter to thy rest. Reader! what are thy thoughts on Death!

SONNET.

BY EMMA C. EMBURY. He who has travelled through some weary day,
And rea hed at summer eve a green-hill side,
Whence he can see, now veiled in twilight gray,
The dreary path through which he lately hied,
While o'er his onward read the setting son
Sheds its sweet heam on every waveide flower. While o'er his onward road the setting son
Sheds its sweet beam on every wayside flower;
Forgets his labors ere the goal be won,
And in his heart enjoys the quiet hour;
Father and mother—be it so with you!
While memory's pleasant twilight shades he past,
May hope illume the way ye still pursne,
And each new seene seem brighter than the last;
Thus wending on toward sunset, may ye find
Life's lengthening shadows over cast behind.

It was about six o'clock the same evening that servant tapped at the door of Delilah's chamber and delivered a message from her father, requiring her presence in the library. Shaking off her drowsiness, (for she had just been indulging in a short nap,) she hurried down to the library, where she found her father and mother. Dr. Mooie and her aunt Marcia, assembled in solema canclave. There was something in the profound silence of the group, and the awful gravity that sat upon their features, that filled her with an unpleasant forehoding, as she timidly inquired her father's

(Ah, father ! exclaimed Delilah, throwing her arms around his neck, with a gay smile, 'you are

only trying to frighten me.

Her father bit his lips and knit his brow in the effort to keep up the sternness which the caresses of his mischevious pet were fast dissipating, and disengaging her arms, referred her to her uncle for an explanation.

You have carried a joke too far for this time, neice, said the Ductor: the Franchman turned the tables on you. Under the protence of changing his vest, it seems, he slipped down to the clerk's office and procured a license; the young man who officiated was a regular official minister; the ceremony, although you went through it with mock solemnity, was in due form, and as you are of age, the marriage is perfectly valid.

Your husband has already instituted legal proceedings to compel your father to give you up, and the case is to have a private hearing before Squire

Playfair to-morrow.'
'Oh, uncle, you are jesting, surely,' said Delilah he tears springing from her eyes.

You judge others by yourself, neice, but I have

spoken the truth seriously. It would be impossible to describe the violence of the girl's griet, when convinced of the redlity of the Doctor's statement. Her parents, although they appeared to participate in her distress, made no effort to console her, nor held out any hope of escaping from the doom she had so inconsiderate-ly brought upon herself. Their seeming lack of sympathy shocked her more than the difficulty itsell; for she refused to believe that even the law could force her to live with a man whom she was sure she could never regard with other feelings than dislike and contempt. She relied, too, upon the strength of Walter Lake's affection, and lel' confident that his arm, if no other, would be found doubts began to gather in a sickening throng a-bout her heart. She retired to her chamber, at and to pass the other in a slumber disturbed by

dreadful visions. The hour for the hearing of the case before the magistrate arrived the next morning, and Delilah, in tears, accompanied by her father and uncle, eactered the coach to drive to Squire Playlair's. The Count's counsel, with a few witnesses, were a-waiting their arrival. There was one thing, how-ever, that struck Delilah as strange; that while the Frenchman's cause had been entrusted to the hands of a lawrer, she was compelled to appear in person, and her friends had neglected entirely to procure legal aid. She expressed her mind to her uncle, and insighed that Walter Lake should be

The provoking coolness and indifference toher feelings which she thought was displayed in the whole of these proceedings, by even her nearest and dearest relatives, aroused to the foll Delilah's pride, enabling her to conceal, for a time, her harrowing emotion. Monsieur nor a Monster.'
At the first sound of his altered voice, Delilah started from her seat, and ere he had finished the senience, overpowered with joyous emotion, she had thrown herself, with a scream of delight, in-to the arms of her own loved Walter.

Hulf an hour afterwards when Doctor Moore entered, he found his niece cheerfully laughing

over all she had suffered. 'How does the Countess Delilah de Laphinstack like homepathic remedies in alleopathic propor-tions now?' asked he, in a tone of affectionate raillery.

'It was a cruel jest, but perhaps I deserved it,' replied the laughing bride; 'at any rate, I am so happy in being so undeceived, that I cannot feel

ingry with the perpetrators.'
Delilah became to Walter a cheerful, devoted

and amiable wife, but from that day forth eschewed practical joking. She has, doubtless, by this time discovered that there are other and sufficient modes of amusing ourselves, and enjoying life, without sporting with the feelings or doing vio-lence to the prejudices of our fellow beings.

From the Bangor Courier. Remarks on Transplanting Trees.

By J. H. WHITF, Proprietor of the Mt. Hope Garden.

No work is more carelessly or heedlessly performed by individuals in general, than planting trees. Few persons seem to he aware that a tree is a living ob-To expect success, therefore, in transclanting them, some care must be taken in performing the operation. The following brief rules may be of some mide to those who have not had had much experience

in setting out trees :

1st. Never plant a tree unless the ground has been previously well pulverised and broken fine. To plant trees in holes, as 100 many do, is almost fatal to their

Deep planting is one of the greatest errors in ature growth. this country, and more particularly in those soils in this vicinity; and it is probable that more trees die from this cause than any other; if they thrive for a year or two, they soon languish and die, apparently without any cause. In cold, clayer soils this is fre-

quently the case. Avoid by all means this arrow has this vicinity. The very the sold.

3d. When the sold is ready for setting out, comso. When the soil is ready for setting out, com-mence planting by taking out the certain to the depth of a foot or more, and of a width to amount the roots engi-ly without bending or breaking. If the soil is not. urally very poor, some good rich compost is necessary to fid in among the roots with the earth

4th. Before planning, prune off all bruised or de-

sayed portions of the roots, and shorten such as are oo long; if the roots are thick and matted, they should be thinned out. Avoid cutting or injuring any of the small libres for they are indispensably necessary in the first stage of its growth.

5th. The most important rule to be observed in setting out trees, and one that should never be over-looked, is to fill in the corth firmly around and among the roots, so that no hollows or crevices may remain. To perform this operation successfully, the earth and compost should be moderately dry; the soil should be thrown in sporingly and not in too large quantities at once, so us to give the planter sufficient time to arrange the soil among the fibrous routs. Avoid jerking the tree op and down—give it a few taps at the bottom with your hand; a pail or two of water may be given to each tree, by a water pot, which as soon as it is scutled among the roots, should be earthed over to avoid evaporation. If the trees be crooked, they

No crop should be planted within six feet of the tree.

Strict attention to these rules will amply repay the cultivator for his labors—while without this, no success can be expected,

The Railroad -again.

The two Reports or statements from the two sec tions of the Rathrond Committee, have been printed and we acknowledge outselves indebted to Jonn I. BAKER, Esq., of Beverly, for several copies of this document, and also for the Argument of Mr. Derby. and another pamphles, containing the newspaper articles signed "N." which appeared in the Salem papers.

Of the Statement made by the Chairman and his colleagues against the road, it is sufficient to say to those who have read the Argument of Mr Derby, that; it is a condensed abstract of that speech put in the form of a Report, and fully sustains the obnoxious dostrines there advocated. We publish below the concluding portion which will sufficiently indicate its character. We also publish the closing part of the R port made by the three members of the House, who ther Lawrence. composed one balf of the Committee and who think the petitioners entitled to a charter. Unless the rotten Berough conservatism of English legislation is to be maintained in Mussachusetts, we may rely with the utmost confidence on obtaining our road. Sir Robert Peel is now far in advance of some of our sapient legislators in his deference to the will of the people.

There will probably be some action upon the subject in the early part of next week.

And when the State has invited individuals to such investments, there is a reasonable expectation that government will not unnecessarily aid in its destruction or deprive them of a fair return We say uunecessarily, for when the public good demands it, or a new exigency arises, there is not only the right but the duty of exercising the same powers again. Any other policy would defeat the worv ends sought to be obtained. Enterprize would be paralyzed, capital withheld, and the coarnoter and safety of our railroads retrograde instand of advancing.

To good faith and good policy go hard in hand, against that parrow and short-sighted sys-tem which would seek to cheapen present accommodations by a fatal and ruinous competition.

In the application of these principles to the cas In hand, to grant the prayer of the petitioners, would, to our minds, be against obvious and sound policy, and unjust towards the existing road. It would be a parallel road, compering for the same bosiness which now supports the Eastern Rail road, and giving no additional valuable accommo dation to the public.

It shows neither an exigency nor any reasonable prospect of remuneration to those who may build it; and a higher degree of safety, and convenience, and lower fares, will be realized by the Eastern Railroad alone, than with the additional road here prayed for. We therefore recommend that the peritioners have leave to withdraw their Which is respectively surrous.

Thomas Hopkinson, Jas. F. Baldwin, J. H. W.

It was testified, that their freight, which now goes by teams would be carried over the poposed route, if granted. There was some contradictory evidence, however, on this latter point.

There was much and strong evidence to prove that there would be amply sufficient business to warrant the construction of the road prayed for to sustain it, if granted.

There was also strong evidence to show that the road would be built, if chartered.

It was also proved that the route is a feasible one, having no objectionable grades or curves, and that it sould be built at a moderate expense.

The objection to taking the land of private holders for the construction of this road, is greatly obviated by the fact, that a large portion of the people, over whose land it passes, are favorable to the roud, and the land damages would consequently, in all probability, not be large. A strong fact in this case is, that there are no remonstran's a. gainst the proposed road excepting the Eastern Rail-road Company.

There has been no action of the cirizens of Sa their collective capacity, upon this sub-When notified that a hearing on the proposed road was to be had, they took no vote to appear or to remonstrate, nor did they appear before the Committee in reference to it. They stood and there is no doubt wisely so—entirely neutral Boxford, Bradford and Rowley yet to vote.

It is well known that openings to the country ficial to other towns and cities; and, that this opening to Danvers, Saugus, Lynn, Malden, and opening to Danvers, Oaugus, Lynn, Maiden, and other places, would, by the termination of this road in Salem, be highly beneficial to the interests of Salem, there can be very small doubt.

On the other hand, there is a very numerous body of petitioners for the proposed road, amount. State.

ing to over three thousand legal voters, besides more than a thousand females - with regard to in many cases, that their hearts and their intelligence go with their petitions.

If it were not, then, for the opposition of the

Rastern Railroad, it is apprehended, that a clear rase is made out for a charter, and that the Legis-i ure would readily grant it. The question than arises, whether that opposition should, under the circumstances, vary the decision of the case.

There was evidence, or uncontradicted statements made to the Committee, tending to show, the it was always understood that Danvers should be further accommodated than it now can be by the Eastern Railroad from the first building of tha Eastern Ruilroad. It appeared that the Eas e n Railroad had done nothing in reference to the accommodation of that place, until the presentation of the present polition of David Pingree and others to the last Legislature. The Eastern Railroad then presented a petition for a right to construct a branch to Danvers, which the Legislasure of last year, for obvious reasons, refused to

Has then, the Eastern Railroad any legal right to the travel and business proposed to be accommodated by the road prayed for by the petitioners?

The doctrine upon this point has been established beyond question in this Commonwealth, that they have not. Is it unjust them to grant the proposed roue? If it were, it certainly should never be granted. If the Legislature should should appropriate and noint out the line which

tune grant or reject it. If they grant it, the petiioners and those who build the road alone, take the responsibility of so locating it, that the public on which they depend for business, shall be fairly ac-remmodated by it. If not so accommodated, or if not accommodated at all, that public may certainy seek other accommodations in any manner by

which they may be better afforded. As to the question of public policy in granting a charter for this road; if it be conceded that a proper case for granting it, were made out, provided there were no opposition from the Eastern Railroad, or upon a withdrawal of that oppositionand if, in the absence of their opposition, it would be granted, as it is apprehended it would be-ond that public policy would not in that case forbid it how, it is respectfully asked, is the question of public policy varied from the fact of that opposi-They do not remonstrate on the ground of public policy, but of their own individual interests. Mr Editor .- I have been looking over the Statenent of the Town Expenses and have also read he remarks of Hog Hill about it and I think I have found out a way to make a much greater saving than he can with all his ingentally. I propose in the first place to sell off all the Engines and Engine houses and Fire apparatus at auction and Advertiser: then get our property insured. That would be a very great saving. Then I would sell the Alms very great saving. Then I would sell the Alms House and farm and turn off the inmates to be relieved by private charity and appropriate the proceeds of all the sales to pay off the town debt which would save the interest. I would then vote not to raise any money for public schools, which would be another great saving. It might be objected to this that the children would grow up in ignorance and crime but then I would ask if it would not be likely to save them from com-mitting trime? For instance if a child is brought up without being able to read and write is he not out of all danger of reading novels or committing forgery? Then I would have all the town officers serve for the honor of it or pay u small sum into the town treasury for the privilege. it there should be any expenses left I would recommend that a subscription paper should be circulated among the poorer part of the population to pay them up as it would be a shame to resort to axing property to pay town expenses. Mr Webster enlarged upon the merits of the question, and reminded the Senate of the frequent offers which had been made to compromise it is

settlement of this long pending-controvers.

The line eventually agreed upon would us-

doubtedly be the one which had been proposed by this country many times, and his with was that the whole controversy might be settled-b and now. The country, he entrestly desired should at once set about a friendly negotiation of the question. The question of notice, he has would be postponed for one month, in order to afford time for negotiation.

He meant 49 substantially, and the variations from it would be a matter of friendly negotiation. Great British must not expect any thing more He was willing to pass the notice, because i would quell the excitement at home; but he opened that it might disturb negociations which vere pending or in prospect.

I d in the days of Salem Witcheraft it would not have appeared half so strange. Does that dark and be nighted spirit still hover over Salem, which we hoped had been husned to silence nearly a century hoped had been husned to silence nearly a century ago—does it still find a resting place in some kindled boson? The circumstances which led to this great affair were simply these. On Monday P. M. I left Ham's Hotel, in S. Danvers, and as I had bust ness with several gentlemen in Boston St. I walked instead of taking the coach as usual. I had made instead of taking the coach as usual. I had made three calls which had taken up some time, I took out three calls which had taken up some time, I took out my watch to see if I had time to go to Mr Carlton's tannery in North-fields (so called) and get back to the Hotel in time for supper. It was by my watch the Hotel in time for supper. It was by my watch is 5 o'clock. At the same time I stopped to look a like streets to see whether I was in the direction for the streets to see whether I was in the direction for The streets to see whether I was in the direction for North-fields, not knowing or fearing who saw me at the time. Now I leave it for the public and intermetous acquaintances both in New England and New York, whether I had done anything worthy of neing pursued by such a fraternity of officers who seemed to follow my track with all the greediness to seek of blood hands. As it regards the ladies a pack of blood hounds. As it regards the ladies spoken of by the Sheriff, they are unknown to me. He for some wise purpose, perhaps, did not give me their names—and though I may never be honored with their presence or cheered with their smiles, I en tertain the hope that ere long I shall have the satisfaction of knowing who they are that are such close liscerners of men and things as the facts in this case show. What could have led them to this presump. tion, or what motive they could have in so doing to which I hope few are subject. Although we are exhaust to bear with the infirmities of the weak, yet

POETRY.

Bye-Gones.

"Let bye-gones be bye-gones"—they foolishly say,
And bid me be wise, and forget them;
But old recollections are active to-day,
And I can do nought but regret them;
Though the present be pleasant, all joyous and gay,
And promising well for the morrow,
I love to look back on the years past away,
Embalming my bye-gones in sorrow.

If the morning of life has a mantle of grey,
Its noon will be blyther and brighter.
If March has its storm, there is sunshine in May,
And light out of darkness is lighter;
Thus the present is pleasant, a cheerful to-day,
With a wiser, a soberer gladness,
Because it is tinged with a mellowing ray
Of a yesterday's sunset of sadness—[Tupper.

Nest among the Graves. BY MRS. SIGOURNEY.

The cloudless sun went down Upon a church-yard scene, And a quiet nest I marked And a quiet ness I marked
Hid in an evergreen,
As wandering 'mid the hallowed mounds
With velvet verdure drest,
I paused where two sisters lay
In death's unbroken rest.

There was a marble seat Beside that couch of clay, Where oft the mother sat
To pluck the weeds away,
And bless each infant bud, And every blossom fair, hat breathed a sigh of fragrance round The idols of her care.

The unfledged birds had flown Far from their uset away.
Yet still within the imprisoning tomb
Those gentle sleepers lay.
But surely as those bright winged birds
Forsook the sheltering tree,
And soared with joyous flight to heaven,
Such shall their rising be.

MISCELLANY. Temperance Prize Tales.

Two prizes, one of \$50, and another of \$25, were offered last fall by the publishers of the New England Washingtonian for the two best Tales illustrating the nature and effects of the Washingtonian Reform. Of these prizes, the first has been awarded to Mrs. Mary Livermore of Fall River, and the second to Harriette M. Carlton of Dorches

Mrs Livermore's tale, the "Trials of Charlotte Austin" appeared in the New England Washingtonian of last week. We extract a passage from it, promising that it is founded on facts,—it is the picture of a drunkard's wife.

when huge drifts of snow through the keen air the broad snow-flakes, Mrs. Austin, scantly clad, and illy calculated to brave the numerous seamen's clothing stores, called 'slop shops,' which were scattered throughout Ann street and its vicinity. In her hand was a large bundle of work just completed by herself, George and Emma, and upon the payment which she was expecting for her labor, the family was depending for their evening meal. During her absence, her husband staggered homewards in a shocking state of inebriety, where Emma, and Charles the younger son, were endeavoring to amuse the in-fant Charlotte, not yet a year old, who, always delicate, was now helpless as infancy itself, from a recent severe illness, and who lay in the cradle, wailing her mother's absence. As Mr Austin approached the little one, and raised her in his arms with the natural kindness which not even intemperance could banish from his nature, Emma, unaware of her father's deep intoxication, accustomed as she was to seeing him more or less so, constantly, and perceiving that the babe was quiet, ran down stairs to the almost empty wood-shed, where her brother George was seeking fuel to pre-pare their supper, and Charles followed after her. Mr. Austin moved towards the fire-place, and endeavored to seat himself; but losing his balance, he fell; and in falling, the babe rolled from his arms, with his face downwards, into the fiery bed of glowing coals that lay on the hearth-stone The child was too much enfeebled by recent illness to extricate itself, the father so dreadfully intoxicated that some minutes elapsed before he was fully aware of its condition, or could recover his feet; its cotton garments when then blazing, its tender face, neck and bosom were hissing on the hot coals, and its efforts to shriek were only convulsive and agonized gasps.

One glance at his infant's excruculating situa-

tion, drove the fumes of intoxication from his brain; clearness came to his head, steadiness to his hand, and with the quickness of lightning he drew the burning babe from the flames, dashed over it a vessel of water, and was hasting to the door for assistance, when the fleet and anxious whiter than the sheeted dead, his tongue rigid with horror, with the reeking, blistered, blackened, form of his babe in his arms, he stood face to face with its mother. with its mother.

Oh. God! who can tell the unspoken agony of the moment! paralyzed, rooted to the floor as i transformed to stone, with parted lips from whence issued no sound, her heart beating loud and heav-ily so that she almost reeled from the force of its

scorching gas of its fiery billow, and the severes of its burns, terrible as they were externally, could neither be seen or reached. The small veins of its neck were tense and knotted under the quivering, flesh, its every breath caused convulsive throbs and rolling upwards its sightless eyes, spasmodically clenching its feeble hands, its delicate sinew tightened with agony, the half-released soul that hung quivering on its lips, was speedily

freed. It was months ere Charlotte Austin could throw off from her spirit the horrible torpor which settled upon her, after the agonizing death of her del icate babe. It seemed as if paleness would never more leave her cheek, as if her eye would never more burn steadily, or her voice be cleared of its huskiness, as if she had forgotten even to smile or converse for she moved about as if al but the animal mechanism of her life were paraly None knew the secret of the accident which had occurred says the parents, and the vague re-ply of Mrs Austin, that ther babe fell in the fire during her absence,' fastened upon her the charge of carelessness and neglect, both among her neighbors, and in the multiform accounts of the occur-rence that found their way into the city. She never repelled the charge, but Christ-like, was content to bear the sins of him who had so cruelly wronged her and hers, and to receive the odium which he deserved. With the same meek, un-complaining kindness, she continued to minister to his wants, uttering no words of harshness looking no rebuke save what was conveyed by the mournful gaze of her eye.

Duties of Women to their Country. The shelter and protection of a free governmen also demand awakened and grateful energies .-Since its welfare is involved in the virtue and in telligence of its subjects, the character and habits of every member of its great family, are of importance. I imagine that I hear from the lips of some of the young and sprightly of my sex the inquiry, 'Why need we concern ourselves in the affairs of politicians? What share have we in the destinies of our country?' The same share that the rill has in the rivulet, and the rivulet has in the sea. Should every little streamlet tarry at the fountain head, where would be the river that dis-

She can tinge them with sweetness or bitterness, ere they have chosen the channels where to flow, or learned to murmar their story to the time-worn pebble.—Greece, that disciple and worshipper of wisdom. neglected to appreciate the value of the feebler sex, or to believe that they who had the moulding of the whole mass of mind in its first formation might help to infuse a principle of permanence into national existence. AGRICULTURAL. Strawberries.

There is no fruit more delicious than the straw perry, and as there is no difficulty attending its culivation, it has often been matter of surprise to us vhy it is no more common. Our markets aford only the native fruit, plucked in the fields-

not enough of the cultivated fruit appearing, to induce the supposition, in the minds of any one, that such an article can possibly be obtained. The following judicious observations and directions relative to the culture of this fruit we abstract from the American Gardener The writer, it should be observed, has reference only to the two

important requisites, soil and manure.

The soil proper for this last mentioned variety as well as all others, is light, warm and gravelly and the manure to be applied should be exclusive ly vegetable, and not animal manure. The usial practice is to manure the ground with rotten dung with a view to increase the size and quanti-ty of fruit; but, in doing this, the flavor of the fruit is destroyed in proportion to the richness of the soil. Besides, high manuring produces strong vines and little fruit. Rotten leaves, decayed wood, ashes, in small quantity, mixed with other vegetable substances in a compost heap, will make better manure for strawberries than any animal substance whatever. As the vines which bear this fruit require great moisture to bring the fruit to its proper size, the soil and situation in which crowded, and the most intense excitement prevails. they are placed must not be too dry.

[Republished from last Sajurday's Courier.] Awful Calamity! Entire Destruction of a Railroad more than ten miles long! Loss of Life! Great Excitement!

It becomes our painful duty to record one of the we have reason to fear, with loss of life. It seems that on Wednesday of last week, a slight rumbling sound was heard, and after that a cracking noise as of the breaking of timbers and sleepers in connection with the gradual sinking of the bed of the road. This continued until the next day, when the final catastrophe took place with a tremendous crash. We are at this anoment only able to state

The pe cuniary loss to private individuals as well as to the public is immense. The depreciation of property in the immediate vicinity of the several depots must also be very great. Grief is depicted on al-

As to the cause of this terrible catastrophe there appears to be various conjectures, some attributing it to one thing and some to another, and we shall probably not be able to arrive at the extract truth until the matter shall undergo a complete investigation. We learn that most of the bodies have been recovered from the ruins, and that the coroner is holding an inquest over the remains, by which we hope some light will be elicited. At present the excitement is so great that we can give credit to scarcely any of the rumors afloat. The prevailing was designedly caused by the Directors of the Eastern Railroad, a rival corporation, who had been suspected of being engaged in undermining this road. Among the thousand rumors, to which of course we do not give much credit, it is reported that they have employed some infernal machines' to accomplish their object, and that the excavations have been going on all winter. Verdict of the Coroner's Jury.

After a long and laborious investigation the jury have agreed on a verdict. One of the jurors, an honest Hibernian, wished to render it "accidental murder." Another of the jury was desirous of calling it "suicide by hanging by parallel lines." Others were for "wilful murder," but whether by the hands of the Restern Reilroad or bushe Market the hands of the Eastern Railroad or by the Massachusetts Senate, they could not determine. At length they compromised all their difficulties by agreement on the simple verdict of "murder." which was accordingly rendered.

He expected to make it appear that they had, for a long time—ever since the new road was contemplated—openly declared their intention to do all in their power to prevent the construction of the road, and after its construction, to destroy it. It was upon these confessions and upon their acts in accordance with them that he principally relied to make out the case against the prisoners. The first witnesses examined were the medical gentlemen who gave their testimony in ralation to the appearance of the bodies of the deceased, and their situation previous to the sitting of the inquest. Soon after the prisoners were placed at the bar, the members of the Court came in, preceded by the High Sheriff with his sword and staff of office. The prisoners looked very pale and emaciated from their confinement and anxiety in regard to their fate. The jurors and members of the bar rose and kept standing until the Judges were seated.

Mr Choate then called one of the conductors on the Georgetown Railroad, who was sworn.

Mr C. Please state to the jury what you know the disaster of the 8th of April.

Witness. I was on that part of the Georgetown Railroad lying between Salem and Danvers, when the disaster happened. Acted as conductor and sometimes as brakeman on one of the invisible cars Saw the train on the Malden Road as it was coming at a very rapid rate in the direction of Salem. Heard a rumbling sound long before I saw the train coming. It was different from the usual sound of cars on a Railroad. Heard a cracking noise at the same time. Observed that the Malden train had an undulating motion as the cars approached. Our road began to shake a little. Our Engineer noticed it and reversed the motion of his engine. We applied the brakes and checked our speed a little just as the Malden train came within about a hundred rods of us, and then stopped the train. Their road was shaking and g and their locomotive leaping and plunging dreadfully. Just as they cause opposite to us, the en-gine tost the track and the rails flew into the air while the road and the whole train, passengers and all, sunk into the ground with a tremendous crash.-Fragments of the cars and bodies of the passengers were scattered in every direction. Heard a should from a crowd of people on the Essex Railroad. Saw the prisoners among them and am confident I saw them swing their hats and shout with the others -Saw these people run from the track of the Malden Railroad as our train came along. Many of had shovels and crow-bars and other tools. Think I

Corporation?

By the Corporation. Mr. By the Corporation.

Mr Derby wished to address the Court on a point of law. He wished to know whether the prisoners could lawfully be taken up as individuals when all their acts were the acts of a Corporation? Whether, if they should by any possibility be found guilty by the jury, the individuals or the Corporation should suffer the extreme penalty of the law. If the Corporation was guilty of the crime charged, surely the Corporation should be hung. If the individuals are hung, the Corporation still lives and society is exposed to its incendiary acts which would thus defeat the true intent of the law. Mr D. quoted from Comic Blackstone as follows:

"The law, like a worker in wax-work, has made certain antificial persons. These are called bodies corporate or corporations, and being composed of natural persons they stick together like wax, having a common seal. It therefore matters not what they say till the corporation sealing-wax renders at incumbant on them to stick to it.

bent on them to stick to it."

I maintain therefore, may it please your Honors, that the Corperation is on trial and not the individual.

Mr Choate addressed the Court in reply and quoted from the same learned authority as follows.

"A corporation has some disabilities, and is in-capable, for instance, of being committed to prison, for there can be no catchee where there is no

Now, may it please your Honors, I contend that if a Corporation cannot be arrested and put in prison, neither can it be hung. I will call your attention for a moment to the celebrated case of the State of New York vs M'Leod. Although in that case the British Government assumed the act for which the prisoner was on trial, instead of letting the accused at liberty and attempting to arrest the British Government, the State of New York wisely held the individual and released the Corporation, or body politic. I will make one citation more from the same chapter, to show the utter imposibility of fixing the hangman's noose around the neck of a Corporation.

'We come now to the rights and powers of corporations; the first of which is, the right of perpetual succession, for as every man has a right to established; that is to say, their very endlessness is the end they are designed to answer."

I trust therefore, that your Honors will instruct the jury that their verdict must be made up in reevence to the guilt of the prisoners at the har and not of the corporation to which they belong. The Court took time to make up their opinion

on the point. Bell ringer at the Salem Depot, called again. [This witness wished to make some explanation of

s testimony given yesterday.] Never said he could bite his left ear. Don't be lieve any body can do it. Never said he could lift himself in a basket ten inches high—has lifted himself six inches from the ground in that manner when he was younger. Cannot do it now. Never was in Gineral Count por out of it in his life—but once—and then he went on top to see Boston Common and the Railroads. Don't remember whether he saw the Malden Rawlroad. Never had any thing to do with a train to blow up that road. Always told Danvers people that he was in favor of that road.

Mr Derby then rose and addressed the jury, cautioning them not to lose sight of the solemn and immensely important duty intrusted to them of decid ing a question affecting the lives of seven of their fellow beings. When we consider the respectable position as society but recently occupied by the prisoners at the bar, the number arraigned, the crimes of which they were accused, the feeling of popular indignation aroused and the eminent Counsel in the service of the State,—this trial has no parallel in the judicial history of the Commonwealth. The charge against the accused is no less than the wilful destruction of a Railroad and its train of cars with all their living freight, by which the lives of many human bengs were cut off in an instant of time.
In making their defence I shall introduce testime.

After proving to the satisfaction of the jury by the nost unquestionable testimony, that the unfortunate deceased came to their untimely end by a conflict in W. No, I chalk it on my boot "five and tally which they were the aggressors, and by which the and take it off when I get home. When the prisoners at the bar in protection of their own lives, most unfortunately and without malice, caused their cleath, I shall proceed to the second point and make equally clear that this is not only a case of justifiable homicide, but that the whole calamity was caused by one of those accidents which so often happen on Railroads as well as other public conveyances where

'no blame whatever is to be attached to the driver." On the third and last point, which, to a superficial observer might be considered inconsistent with the ther two, I hope to make it as clear as noon day, not only that the deceased fell in a conflict where hey were the aggressors, and that their deaths were caused by a Railroad accident, but that nobody, after all, has been killed. Before proceeding, however, I cannot but express my surprise that my learned friend on the other side should attempt to prejudice the minds of the jury against the prisoners, by intimating that they were in any manner guilty of the blood of those who perished on the road. The eloquent counsel on the other side is well aware, gentlenen of the jury, that those unfortunate persons only men of the jury, that these unicriunate persons only suffered official death. That they were only deprived of life as Railroad Directors, Engineers, &c., and not as men. On the contrary, you can see them in this Court room, looking calmly on as interested spectators of this trial for their own murder, while at the same time they are, in the Railroad sense, ghastly corpses. It is therefore important to keep this disfinction in view in the present trial. I shall not at-tempt to deny the fact of the deceased having been killed in the above sense, but I hope to prove by my witnesses the entire innocence of the prisoners and to

Mr C. Sit down. Engineer who constructed the E. R. Road .-

Have surveyed and constructed several Railroads. Am often in friendly intercourse with Directors of different Railroads. Think it is the universal belief among Directors, with regard to competing Railroads, that killing is no murder. New Railroads are considered aggressors and they are usually overpowered and killed by the old roads in self detence. Never heard of a non-resistant Railroad. Think the Malden Railroad petitioners deserved punishment for presuming to ask for a parallel road. Think the Government should not aid in waste of capital. It ought to pre vent it.

Mr C. Is it not as safe to trust the community with the use of their own capital in Railroad enterprises as in any other?

W. I dont know—the Railroad Directors done

Mr Choate. Did you not, at the time of asking for the Charler of the E. R. Road state that Ferry boats might be built so as to take the train of cars on board and across to Boston?

W. Ithink I did. Mr C. When do you think this will take place ?

Probably not until the tide ceases to rise and fall and remains stationary in Boston har-

The next witness called was the man who kept the "log" on board the Ferry boat. After being sworn he testified as follows.

Was on board the boat at the time the catastrophe happened to the Malden Road. It took place minutes and 27 2-3 seconds after the boat left the East Boston side. Noticed that the speed of the boat increased immediately and she arrived at the Boston slip 73-8 seconds sooner than usual. Several of the prisoners at the bar were or board the boat and could not have been present

Cross questioned by Mr Choate. How can you be so certain of the exact time ?

W. I always set it down in my log book. Mr C. Do you always keep your log book with

W. No. I chalk it on my boot "five and tally piece of chalk makes two marks, I call it double

Mr C. Do you always carry a watch? W. Yes, and I set down every thing in the log book. I always set down the exact time I go to sleep-to a second, by the watch. Can tell to a second the exact time I went to sleep for any time this ten years.

Mr C. Can you offer any proof of that? W. Proof? yes. I can prove it by this (shows his watch triumphantly.) There's the very watch. Aint that proof enough?

Very satisfactory. Take your seat. The Chairman of the 1st Railroad Committee

Was chaiman of the joint Committee on Railroads this session. Heard the evidence in the case of the Malden Railroad. Committee were equally divided. I drew up the Report against it Government should protest Bailroads already built and be careful not to let new ones take the same business. Free competition tends to monopoly. Dont know as it does in may other business but carrying passengers nor that except they are carried on Railroads. One great objection to the Malden Road is that it would increase the obstructions to navagation.

* W. Four.

sea Railroad notwithstanding this increased ob-

struction to navigation?

W. Why—ye—yes.

Mr C. What reason do you assign for bestow ing a charter to the Chelsea and witholding one

from the Malden road?
W. Why? Because the Eastern Railread did not oppose the Chelsen project.

Mr C. Then you regard the claims of existing Railroads as entitled to more respect than those W. Certainly.

Mr C. Did you have many petitioners for the Malden road? W. About 3,000 Mr C. Did the prisoners at the bar oppose it?
W. They did.
Mr C. Did any body else oppose it except at

he instigation of the prisoners? W. Nobody else that I know of. Mr. C. Sit down.

W. I-I- [to the Court] Am I obliged to crimnate myself?

Court. Certainly not. Mr C. Sit down, sir.

Mr Derby and Mr Choate made their closing arguments, which we regret to say we shall not be ble to present to our readers for want of space .-They were both able, ingenious and eloquent .-The appeal of Mr Choate the jury was most powerful and was said by gentlemen of the bar to be one of his greatest efforts.

The charge to the jury by the Chief Justice was able and impartial. He gave the opinion of the Court in favor of Mr Choate's views in regard to the offence being one by which the individuals and not the corporation should suffer, if found guilty. He also said that it should make no difference on account of the kind of death suffered by the deceased, as, if found guilty, the same description of death would be inflicted on the prisoners. After further explanations of the law and an impartial summary of the evidence on both sides, the case was given to the jury at 11 o'clock, A.M., with instructions if they should agree, to bring in their verdict in the afternoon.

The jurors were then conducted by a sworn offier to their room and charged not to separate until they could render a unanimous verdict. The Court then adjourned until the aftereoon.

Afternoon The court met at the usual hour. At 20 minutes past 4 o'clock, the jury came in and resumed their seats. It was a time of most intense excitement and anxiety, a great part of the crowd havng waited in the court room from the time the jury retired. After a testless movement among the multitude succeeded by a solemn stillness, the foreman was asked if the jury had agreed on a verdict.

Foreman. We have. Clerk of the Court. Mr Foreman and you gentlemen of the jury, stand up and look upon the prisoners. Prisoners, stand up and look upon the oreman. Mr Foreman, what is your verdict?

Foreman. GUILTY. Clerk of the Court. So you say, Mr Foreman; o you all say, gentlemen of the jury?

All the jury nodded assent. As the word cultry was pronounced the countenances of the prisoners fell and several of them came near fainting away. Great sensation was exhibited in the court room and a suppressed murmur ran among the spectators. Although the verdict was expected and not much feeling had een hither to manifested in favor of the prisoners, their present situation as convicted criminals seemed to excite much commiseration.

Mr Derby wished to ask if the verdict was unecompanied by any recommendation to mercy. The foreman replied that the jury had no dispoition to interfere with the ordinary course of law Mr Derby then made several exceptions to the

verdict which were all overruled by the Court. Mr Choate suggested to the Court that sentence be now passed upon the prisoners. Much as he commiserated their unhappy situation, he thought that a due regard to the exercise of public justice required an inflexible and speedy infliction of the penalty of the law. These who had so unfeelingly been guilty of such wholesale butchery on so many unoffending citizens of the community, could surely have no claim to mercy or even delay of tached to questions of this kind. There is of

The Sentence.

The criminals were directed to stand up and were then asked if they had any thing to say why the sentence of the law should not be massed upon

They replied that they had nothing more to say W. Ten or twelve.
Mr C. Did you not consent to charter the Chelwere innocent of the crime of which they had been convicted.

The Chief Justice, after a short consultation with the other members of the Court, put on the fatal black cap and proceeded to pass the sentence of the law upon the prisoners as follows:-

Prisoners at the bar! It becomes my solemn ourselves to be entitled. but painful duty, holding the position I do on this bench, to pronounce the sente you, for the crime of which you have been convict-

ed. You have had a fair and impartial trial, been defended by most able counsel, every lenity consistent with justice has been shown and you have been found guilty of the wilful murder of scores of your fellow beings!

Your guilt has not only been fully proved, but it has been shown that the wholesale assassination was committed under the most aggravating circumstances.

You used not only open violence, but secret stratagems to accomplish your horrid purpose.— You reserted to undermining, to well laid trains, to turn-outs and turn-abouts, to double tracks and heavy iron rails, to spurs and other infernal machines, and alas! with too fatal success. On that calm and beautiful morning of the 8th

of April, when your unfortunate victims came forth full of hope to enjoy their first excursion on their newly built railroad, while they were sur-rounded by troops of friends assembled at their station, their iron steed apparently impatient of restraint, they stepped for the first time into their elegant cars, and at this joyous moment, you, prisoners at the bar, had just completed your insendiary designs and were waiting to witness in that letter took the ground, and the precise the issue of your diabolical plot. You watched the glittering train as it moved majestically forward ground, which he has invariably supported for the to what you knew was certain destruction!

You witnessed the yielding structure as it sunk into the ground and heard the awful crash, mingled with the shricks of your victims! Instead of lending your aid when this awful calamity came lege to vilify and abuse private individuals their upon them, you uttered an exulting and demoniac meanness in so doing is proportionable to the proshout at their downfall! May you, in yout last tection to which they are entitled. extremity, receive that mercy you would not extend to others!

It only remains for me to pronounce the sentence of the law, which is, that you severally pope, Esq., at the North Parish, which entirely the 31st of April, between the hours of one and consumed the portion occupied as a kitchen, but four o'clock in the afternoon, he taken from thence and carried to the place of execution, where you will be hung by the neck until you are dead-dead-DEAD!

DANVERS COURIER.

SATURDAY MORNING APRIL 18, 184

We have been induced by repeated reque to republish on our first page that portion of the of the Eastern Railroad Directors which appear in our last paper. We have concluded to do partly because many of our subscribers failed receiving the paper last week. We wish our trons would report to the office any omissions the carriers, and we will endeavor to see that the are supplied. The "Disaster" has occupied much of our space, that we are obliged to several communications intended for this pap and the summary of Congressional proceeding and other items.

We have been honored with a call from th accomplished Bell Ringer at the Eastern Railroad Depot at Salem, Joshua Pitman, Esq., who wishe us to state that there were several missiatement in regard to him in our last paper. We regre this extremely and cheerfully take it all back, a we have a high respect for the Corporal. We am very glad to learn from Mr. Pitman himself, the he has always been in favor of our Malden Road because we before supposed that he had been "bought up by the Eastern Railroad," and was against it. When we have a railroad depot in Danvers, our people will know where to go to find a bell ringer. We never looked through our spectacles upon a man to ring a bell at all equal to the Corporal.

The Malden Railroad. The Committee of conference appointed by the

wo houses of the Legislature, as was expected were unable to agree and Mr Hopkinson, Chairman on the part of the Senate, and Mr Fowler of this town, chairman on the part of the house, have so reported to their several branches, each insisting on its own vote. Thus falls between the two houses this favorite project of our culzens under circumstances almost without a papilel in Legislative proceedings. The tie on the Committee, the twin Reports, the strong vote of four fifths, in one house against, and a vote equally strong in the other branch, in favor of the polltioners-all these circumstances give a novely and importance to this decision not usually to course much regret felt at its unfortunate result as so much was hoped from its success. It is useless to deny that it is having and will have an

We however hope that the thoughtful and con siderate of the whig party will not forget that there are principles and measures advocated by our political opponents of vastly more importance as they would affect the business interests of this town than the postponement of those rail road facilities to which we are, and shall always claim

The Annual Town Meeting has been a second time adjourned, to Monday afternoon next, when there will be considerable important business to come before the town. Proposals will be received for Collecting the

An anecdote has recently been related to us of the celebrated Vincent De Camp, well known throughout the Southwest as the most polite man of the day and a very correct actor. On one accasion he had been driving hard from morning till night over the rough roads in the neighborheed of Columbia, S. C., and alighted at the only comfortable inn in the place, very hungry and tired. Sticking his eye-glass to his one had depended a histografical form. morning till night ever the rough roads in the neighborhead of Columbia, S. C., and allighted at the only comfortable inn in the place, very hungry and tired. Sticking his eye-glass to his eye, he demanded a hot roast fowl, some good brandy, and a comfortable room for the night. The landtord was exceedingly sorry, but he couldn't give him a comfortable room; the only place he could sleep would be in a double-bedded room with another gentleman. 'Very welly said D., 'let's have the best you've got.' After discussing his supper he turned in, and was soon sound asleep. His slambers we're doomed to be of short duration, however, for before is ir! from the other bed. 'God bless my sou! ' cried D., thrusting his glass up to his eye and endeavoring to peer through the dark; 'what's the matter, my dear fellow? Is the house on fire or are there bugs in your bed?'

'Neither, sir; hut, sir, you snore so terribly that I can't sleep, sir—i'v's terrifie, sir.' 'God bless my sou!! 'replied D., very much shocked, 'that ever I should be so rude as to snore in a gentleman's presence! I really ask your pardon, sir, and beg you'll overlook It; it wasn't intentional, I assure you.'

The apology was accepted, 'good night' wasn't intentional, I assure you.'

TRUSS MANUFACTORY.

TRUSS MANUFACTORY.

THE subscriber continues to manufacture old stand, opposite 264, No. 305 Washington street, Boston, entrance in Temple Avenue, np stairs. All individuals can ee him alone, at any time, at the above place.

Having lad twenty years' experience, he has afforded relief to three thousand persons, for the last five years. All may rest assured of relief who call and try a Truss of his manufacture. He is now confident he can give every individual relief who may call upon him.

The public are sautioned against the many quacks who promise what they cannot perform.

If a ving worn the different kinds of Trusses, more or less; that have been offered to the public for the last twenty years, from different patent manufactories, and now continues to wear those of his own manufacture, he is now able to decide, after examining the rapture, what sort of Truss

nanu as goon Trusses, and will furnish any kind of a Truss
that can be had elsewhere.

J. F. F. manufactures as many as twenty different kinds
of Trusses, among which are all the different kinds similar
to those that the late Mr. Joan Beath, of this city, formerly
made, and all others advertised in Boston, together with
the patent elastic spring Truss, with the spring pads.
Trasses without steel springs—these give relief in all cases
of rupture, and a large proportion produce a perfect cure—
they can be worn day and night; improved hinge and pivo:
Truss; unbellical spring Trusses, made in four different
ways; Trusses with ball and socket joints. Trusses, for
Prolipsus Ani, by wearing witch persons troubled with a
descent of the rectum can ride on horseback with perfec

earc and safety.

Mr. Foster also makes Trusses for Prolapus Uteri, which have answered in cases where possaries have failed. Suspensory Trusses, knee caps, and back board, are always kept on hand. As a matter of convenience and not of speculation, the undesigned will keep on hand the following kinds from other manufactories, which they can have, if his does not suit them; after a fair trial they can exchange for any of them;—Dr. Hull, s Read's spiral Truss; Rundel's do; Salmon's ball and socket; Sherman's patent; French do; Marsh s Improved Truss; Bateman s do, double and single. Stone s Truss; also, Trusses for children of all sizes.

an sizes. Any kind of Trusses repaired at short notice, and made as

good as when new.

Ladies wishing for any of these instruments, will be waited upon by Mrs. Foster, at the above place. Mrs. F. has been engaged in the above business for ten years. He likewise informs individuals he will not make their complaints known to any one, except when he is permitted o refer to them—it being a misfortune, and young persons

o refer to them—it being a mistortune, and young persons do not want their cases known.

caThe readers of this paper, are respectfully invited to ll and examine the variety of Trusses now on hand.

MISCELLANY.

Letters from Cuba. JOURNEY IN THE COUNTRY.

Mansanillo, March 9, 1846. It seems a long while since I wrote to you by the Nereus, though it is only about three weeks, and she has hardly reached Boston by this time. I went on my journey as I anticipated, the morning after she saited, and only got back to Mansanillo day before yesterday, having been gone more than a fortnight. The Angola arrived here yesterday, after a passage of only 16 days from New Yesterday.

to leave us, to bid them good bye, after having taken a social supper at Mrs. Bertold's together. Of course I was very sorry to have them go, my most confidential friends, but I did not feel it as I knew I should afterwards, when I came back from my journey and missed them. The last words were spoken, and we that were left gave a parting glance to the brig in the distance, and the little company in the boat, and then Capt. R., the American Consul, and I walked home, to sleep and refresh us for our next day's journey.

The journey was on Romagosa's account, he having been troubled with illness, and he was in a great nurry to be on into the country. It hamed her hist both son wan-bu-hung-o, an would be well if our people at home held "the Indian word for the Morning Star. In a neighboring wigwam, was a girl named have Manuel's little horse, and his straw saddle, and cheroon, which is an oblong palm leaf bag placed across the saddle, which leaves a place at each side for the load. I put in a few articles of clothing, and other little things I thought I should need, including a hammock, blanket and sheets. Romagosa sent a negro to wake us at 3 o'clock before the hour appointed for starting, 4, we were all at the rendezvous bofore his house. There we took a cup of coffee, and started off at 5 minutes of 4, in the bright moon light, and clear cool air. I had on my pea jacket once more, and it was not uncomfortable. I must speak more particularly of our party, who in fact made quite a caravan, as we moved along through the woods, a little distance apart, and lighted only by the moon and stars. First rode the guide, with his machete, pretty little girl. The old gentleman, Romagosa, one nother, a chubby, pleasant young lady, somewhere, a chubby, pleasant young lady, somewhere between 20 and 25. I found that Senor Santiago had quite a pleasant place, a nice little house in the midst of a cleared space of about 8 or 10 acres, surrounded on all sides by woods. He has a first rate wife, Rosa by name, (and a real smart woman she is,) and quite a family (and a real smart woman she is,) and quite a family of children, and a good many workmen. He has but two or three slaves that do any work, most of them being superannuated. Maria Josephine is the name of the negro girl who does the cooking and house work. As usual in such places there were plenty of domestic animals who seemed to think the house bedomestic animals. longed parily to them, dogs, cats, hens, turkeys, pigs,

We heard a few wild pigeons cooing, but did not get a shot at any. They are generally found eating the nuts on the high palm trees.

Santiago's house is of an oblong form, with a bed room at each end, and a hall in the middle. Near this is a spacious cook house, merely a roof upon posts open on all sides but one, and between the two in the dining room, open to the air on one side. At night we are all glad to get to bed and rest. Rosa, Clara, Mariana and the smaller children slept in one me!

I rolled myself up in my sheet and blanket, on my cot, went to sleep, and so ended the first day.

Friday, second day. The next morning I went out again with Capt R. and the gun, but with no better success. However when we got back he shot a pirrot from one of the orange trees near the house. Parrens are very plenty, they always by in paore and make as much noise as crows, and much like them. Their bright plumage gives them a beautiful appear ance in the trees, but it looks almost strange to see them wild, as those we are used to seeing have little use for their wings. It light from the control of the blossoms, by the bunning-go gathered one of the blossoms, by the dim silvery light, and placing it in the hand of O-ge-bu-no-qua, he said, in a voice tender and bashful as a young girl's, 'Thou knowest the bashful as a young girl's, 'Thou know to the boat with our American friends who were treasured up all the old traditions, and though she

At fourteen years old, she was shut up in a hut by herself, to tast and dream, according to the custom of the Indians. She dreamed that the Morning Star came down and nestled in her bosom, like a bird; therefore, she chose it for the Manitou, or Protecting Spirit of her life, and named her first born son Wah-bu-nung-o, an country' in as high esteem as they do here, for the prevention and cure of disease generally.—
Every one that is ailing desires to reside for a while in 'el campo,' or 'el monte,' or at least to take a journey into the interior.

He was kied account to invite me to go too and in full bloom, and heard a voice series (the bloom and heard a voice series). O.ge-bu-no-qua, which signifies the Wild Rose.— When she, at twelve years old, was sent into re-tirement to fast and dream, she dreamed of a Star; but she could tell nothing about it, only that it was mild and looked at her. She was a pretty child, and grew into beautiful maidenhood. The motions of her well rounded figure were pliant and graceful. Her dark cheek looked like a rich brown autumn leaf, faintly tinged with crimson. Her long almond-shaped eyes, shaded with deep black fringe, had a shy and somewhat mournful tenderness of expression. Her voice seemed but the echo of her glance, it was so low and musical in tone, so plaintive in its cadences.

The handsome boy was but two years older than the beautiful girl. In childhood, they swung together in the same boughs, hand in hand they

Sometime O-ge-bu-no-qua was waiting for him on the island, and sometimes he seered the boat for the grove of willows, while she urged it forward with the light swift stroke of her paddle.

She reasured up all the old traditions, and though she reasured up all the old traditions, and though she reasured up all the old traditions.

She nestled closer in his bosom, and gazing earnestly on a bright Star in the heavens, the Manitou of her own existence, she murmured almost inaudibly, 'How dost thou?' His brave strong arm encircled her in a closer embrace, as he answered with great solemnity, 'The Rose will go to the spirit-land, and leave her Star to mourn alone.' They sat silently leaning on each other, till Wah-bu-nung-o took up the pipe, that lay beside him, and began to play. Birds sing only during the mating seasons; their twintorn love and music pass away together, with the roses; and the Indian plays on his pipe only while he is courting.
It is a rude kind of flute, with two or three stops, and very limited variety of tone. The life of a savage would not be fitly expressed in rich harmonics, and life in any form, payer fashions to inside nies; and life in any form never fashions to itself one calm fixed resolution. He determined to instruments beyond the wints of the soul. But relinquish all his cherished plans of vengeance the sound of this pipe, with its perpetual return nies; and life in any form never fashions to itself the sound of this pipe, with its perpetual return of sweet simple chords, and its wild flourishes like the closing strain of a bobolink, was in pleasing accord with the primeval beauty of the scene. When the pipe paused for awhile, Oge-bu-no-qua warbled a wild, plaintive little air, which her mother used to sing to her, when she swung from the boughs in her queer linke birchbark cradle. Indian nusic, like the voices of inanimate nature, the wind, the forest, and the sea, is almost invariably in the manner in the minor moon; and wit the shadow of the dream intermode; and breathed as it now was to the silent pretation still resting on their souls, it was oppretation still resting on their souls, it was oppressive in its mournfulness. The song hushed;

dians had never taught that nature was a sin, and therefore nature was troubled with an sinful consciousness. When Wah-bu-ung o hunted squirels, O-ge-bu-no-qua thought it no harm to gather basket-stuff in the same woods. There was a basket-stuff in the same woods. There was a basket-stuff in the same woods. There was a lovely, crescent-shaped island opposite the village, profusely covered with rich grasses and mosses, strewn with flowers. Clumps of young birches strewn among the dark shrubbery, like slender columns of silver, and willows stooped so low to look in the mirror of the waters, that their gracecolumns of silver, and willows stooped so low to look in the mirror of the waters, that their grace-look in the mirror of the waters, that their grace-looked down and blushed deeply. Here, above all were for the new wigwam, and so were the mats other places, did the maiden love to go to gather other places, did the maiden love to go to gather she was braiding; and she had promised her lover that as soon as the wigwam was finished, she would come and live with him. He conjectured her thoughts; but he did not smile, neither did he tell her that her blush was as beautiful as the brilliant flower of the Wickapee; but that bashful loving glance filled him with an inward warmth. Its beaming, yet half-veiled tenderness passed into his soul, and was sever afterward

That afternoon all the young men of the tribe went a few miles up the river to fish. Sad tidings awaited their return. Our pa-ten ga, the Big Elk, chiel of a neighboring tribe, in revenge buke by her innocence the unclean self-consciousness of artificial society. With a quiet, grave tenderness, the young Indian estated his beautiful companion in her tasks, or space to her from time to time, as they met by brook or grove, in the pursuit of their avocations. The Manitou, the Morning Star of the sky, could not have been to some trifling affront, had attacked the village in their absence, wounded some of the old war. The blooming Wild Rose was among the captives. Wah-bu nung-o was frantic with rage and despair. A demon seemed to have taken possession of his brave, but usually gentle soul. for some trifling affront, had attacked the village Morning Star of the sky, could not mave over more truly her protecting spirit.

But in the midst of this whirlwind of grief, the memory of his dream came like a still small voice, and whispered, 'she waits for thee in a spirit land. Do not forsake her. The mad fire of his eye changed to the mildest and deepest melancholy. He promised the captive that she and her children should be treated kindly, and allowed to return to her tribe if she would guide him to the maiden's grave. At last, he turned to take a careful inspection of the scene around him, and marked inspection of the scene around him, and marked a tree with the point of his arrow. Then commanding the woman to walk before him, he strode homeward in perfect silence. A monotonic accompanity of free whitespaces. Along the property of the nous accompaniment of free-whispering alone responded to the farewell dirge in his heart. As he looked on the boundless wilderness, and gazed into its dark and mysterious depths; wild and solemn reveries came over him; vast shadowy visions of life and death; but through all the changes of his thoughts sounded the ever-recurring strain, 'she waits for thee in the spirit-land.' Then came the dread that Big Elk would go there before him, and would persecute his beloved, as he had done during her life in the body. An impatient shudder went over him, and he longed for death; but he had been taught to consider suicide a cowardly act and he was awe-stricken before the great mystery of the soul The dreadful conflict terminated in over Big Elk, and guard his life from danger that he might not go to the spirit-land till he himselt was there to protect his beloved. The day after his return home, he told his moth-

He feared neither wild beast nor enemies; for he had fulfilled his duties to the dead, and now his only wish was to go and meet her. Big Elk and his companions soon discovered him, and came upon him with their war clubs. He stood tharmed and quietly told him he had consecrated limit. self by a vow to the Great Spirit, and would fight no more. He gazed steadily in the face of his enemy, and told him if they wanted his life they were welcome to take it. The deep, mournful, supernatural expressions of his eyes inspired them with the company of the c with awe. They thought him mesane; and all such are regarded by the Indians with superst tious fear and reverence. He has seen the door of the spirit-land opened, they said, the moon has spoken secrets to him, and the Great Spirit is angly when such are harmed. So they left him in peace; but he sighed as they (uned away, for he had hoped to die by their hands. From that time he followed Big Elk like his shadow; hut always to do him sarvice. At first his but always to do him service. At first, his ene my was uneasy and on his goard; but after # while, he became accustomed to his presence, and even seemed to be attached to him. At one time, a fever brought the strong man to the verge of the grave. Wah-bu-nung-o watched over him with a trembling anxiety, and through weary days and sleepless nights tended him as carefully as a steepless nights tended him as carefully as a mother who tends her suffering babe. Another time, when Big Elk was wounded by an enemy, he drew out the arrow, sought medical herbs, and healed him. Once when he was shown in healed him. Once, when he was about to cross a wide deep ditch, bridged by a single tree, Wah-hu-nong-o perceived a rattlesnake on the bridge, and just as the venomous reptile was about to spring, his arrow nailed him to the tree.

Thus weary months passed away. The mouraer, meek and silent, held communion outy with his Manitou, the rose-bush, to which he often bid her look to the Morning Star, and fear noillying. I will protect her. Tell her we shall ment again in the spirit land, as we met in the Isle pl Willows. Sadly but mildly has eye rested on the nurderer of his beloved, and he tended upon him with patient gentleness, that seemed almost like affection. Very beautiful and holy was this triamph of love over hatred, seeking no reward but leath. But the 'twin-brother of sleep' came, not where he was so much desired. Others who clang to life were taken, but the widowed heart could be life were taken, but the widowed heart could be life were taken, but the constant prayer of

his faithful love was answered. By suntained dent Big Elk became separated from his hunting dent big bis occame separated from his finiting companions, late in the afternoon of a winter's day. There came on a blinding storm of wind and snow and sleet. The deep drifts were almost impossable, and the keen air cut the lungs, like pasticles of sharpened steel. Night came like particles of sharpened steel. Night came down in robes of thick darkness. Nothing interrupted her solemn silence, but the crackling of ice from the trees, and the mouning and screaming of the winds. The very wolves hid themselves from the fury of the elements. While light enough remained to choose a shelter the wanderers took refuge in a deep cleft screened by protecting rocks. The morning found them stiff and hungry, and almost beried in snow. With much difficulty they made their way out into the forest, completely bewildered and guided only by the sun, which glimmered gloomy through the thick atmosphere. Two Bays they wandered without tood. Toward night, Wah-bu-nung-o discovered with a few crimsoned seed-vessels shining through the snow. He stripped some trees, and covered Ong-pa-tonga with the back, then piling up snow before the entrance to the tree, to screen him from the cold, he bade him sleep, while he kept watch. Ong-pa-tonga asked to be awaken, that he might watch his turn; but to this his auxious guardian returned no answer. The storm had passed away, and left an atmosphere of intense cold. The stars glinered in the deep blue sky, like points of steel. Weary, faint and starving, Wah-bu nung o walked slowly back and forth. When he felt an increasing numbness stealing over his limbs, a disconsolate smile gleamed on his countenance and he offered thanks to the Manitou bush by his side. It was the first time he had smiled since his Wild Rose was taken trom him. Presently, the howl of wolves was heard far off. He kept more carefully near the tree where his enemy slept, and distened to ascertain in what directions the ravenous beasts would come. They shall eat me first, before they find their way to him, he said: 'she would be so frightened to see his spirit, before mine come to protect her.' But disma sounds died away in the distance, and were hour no more,

Panting and staggering, the patient sufferer fell on the ground, at the foot of the rose-bush, and prayed imploringly, 'let not the wild beast devour him, while I lie here insensible. Oh, send me to the spirit land, that I may protect her !' He gasped for breath, and a film came over his eyes, so that he could no longer see the stars. How long he remained thus, no one ever knew.

The Manufactures of Essex County.

We stated a short time since that the Capital Stock of the Naumkeag Cotton Manufacturing Co. in Salem, had been increased, so far as a vote of the Corporation could do it, to a Million of Dollars, and that a new Factory would soon be built. We rejoice in this evidence that Salem is about to take a new start in a prosperous career, as we well know that our own citizens are deeply identified in all that tends to her advancement. It is in Salem that our butchers, gardeners and other market men find a market for their produce and the business intercourse between the two places is large and frequent.

We learn that at the manufacturing city, that is to be, on the Merrimack, capital has already been subscribed to the amount of some millions for manufacturing purposes. The large outlay which will be required and which will be made at that place, together with the numerous factories the county, will render a Railroad communication between them and the south part not only desirable but almost indispensible before many years .-We learn that a subscription for stock in the Essex Railroad has been commenced but we do not and be fair game for the shafts of ridicule.

The vessels built on the banks of the Merrimac, have ong been held, in high repute for their durability and I am told that of late years, they have been n less distinguished for their beauty, than for their strength. One of those strong built ships at this instant occurs to my mind. Several years ago on returning home from the Island of Cuba, by the way of New Orleans and the western rivers, while walking on the levee of that city, and gazing at the long inter minable line of magnificent vessels and lying abreas of one another in treble and quadruple tiers, my atention was attracted to a dark object in the distance which singularly contrasted with the flaunting crafts On a near approach, I discovered it to be stem to the stern was black as night. The communication below, on the habit of smoking, is the production of a young girl of 12 years of age, and was read as a composition at the recent examination of the School in Dist. No. 8. (the Rocks.) Several other compositions quite creditable to the young ladies of that school were read at the same time.

SMOKING.

Smoking has become one of the vilest habits, that we have to contend with among old, and young, rich and poor. We can see the little bright eyed boy, as charge as teacher of the school in District No. 1, in this town.

So W. King has been invited to take soon as he is old enough to go from his mother's care, going with his play-mates, and this is the first thing to be thought of. Among his comrades he is to have a cigar, to commence the habit of smoking. At first it is hard to get used to it, for it makes him sick, but he tries again and again, until he hankers for it as he does for his food. And as he grows older and strong-er, in mind, the habit grows the same and he is as willing to give up eating as smoking, it has so become the fixed babit. He has forgot that cause, that his mother told about smoking, that it was the first step to intemperance, that it had led many a bright, young boy, to the intoxicating cup. Smoking is indecent and filthy, and to some individuals highly offensive. It has been estimated that the amount of tobacco used in the United States, annually, amount of tobacco us-ed in the United States, annually, amounts to \$16,000, 000 and \$9,000,000, of this, there is supposed to be expended for Spanish cigars; if these were all collect ed in a pile together, and set on fire, they would make quite a smoke, I think enough to smoke the inhabi-itants, of one town like this, sufficiently. There is something great, or a resemblence of it, in a smoker, we read of mountains that send forth smoke from their tops, and a smoker if he would remain stationa along, and cloud after cloud passing over their heads and rising to the sky, and sometimes causing them to walk in a crooked line; besides, not improving ECLIPSE. There will be a total eclipse of the their countenances for the better.

The news is not particularly important.

The commercial accounts from all parts of the country are desponding and gloomy.

Parliament was still occupied with the Tariff
Bill and the Irish Coercion Bill. The latter meets

with great opposition.
The Corn Bill on the 27th of March, passed to a second reading in the house of Commons, it be ing the fourth night of the debate, by a vote of 304

to 216, majority 88. The attempt of revolution by the Poles, as was anticipated from the beginning, has proved a failure, and it was in a great measure suppressed.

ABDOMINAL SUPPORTERS. NEW ENGLAND TRUSS MANUFACTORY, BOSTON, MASS.

CERTIFICATES.

From Dr. Coffin, Lynn. I have recommended the Trusses made by James Frederick Foster, of Boston, in a great many instances for these few years past, and it is due to him to declare that, in every instance that has come to my knowledge, his work hat given complete satisfaction. EDWARD L. COFFIN, M. D.

From Dr. Robbins, Roxbury. Since the death of Mr. John Beath, I have used, in preference to all other Trusses those made by Mr. J. F. Coster, of Boston.

From Dr. Collamore, Pembroke.

Mr. James F. Foster having for many years given his attention to the manafacture of Trusses, and fitting them to the particular classes of individuals who call on him, and having furnished for more than three hundred persons, and the state of the state and having furnished for more than three hundred persons, in Plymouth county, is hereby recommended to all who need Trusses, Supporters, &c., as ingenious in contrivance, and skilful in adapting them to all variety of cases that occur; and is believed to have given general satisfaction to all who have employed hints.

ANTHONY COLLAMORE, M. D.

From Dr. Gordon, Plymouth.

Mr. James F. Foster, manufacturer of Trusses, Boston. Mass., from what I have seen of his Trusses, and from the

sons in ranssachuser, it is well calculated to the design with an article that I think is well calculated to the design of the inventer, I have no hesitation in recommending his Truss to the public; and I believe him to possess, the ability of fadapting Trusses to any case that may be presented to him.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James F. Foster, and he has uniformly given full satisfaction in tneir application.

The benefit of such instruments is often lost, in consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted.

Christie's Galvanic Rings and Magnetic Fluid.

This remarkable discovery comprises an entirely safe and novel application of the mysterious power of

Galvanism as a remedial agent. The Galvanic Rings in connection with the Magnetic Fluid, have been used with entire success in all cases of Rheumatism, acute or chronic, applying to netic Finia, nave been used as with the head, nave been used or chronic, applying to the head, face or limbs; Gout, Tie Doloreux, Toothache, Bronchitis, Vertigo, Nervous or Siek Headache, Indigestion, Paralysis, Palsy, Epilepsy, Fits, Cramp, Indigestion, Paralysis, Palsy, Epilepsy, Fits, Cramp, Balpitation of the Heart, Apoplexy, Stiffness of Joints, Spinal Complaints, Lumbago, Neuralga, Nervous Tremors, Dizziness of the Head, Painf in the Chest and Side, General Debility, Deficiency of Nervous and Physical Energy, and all nervous disorders. In cases of Dyspepsia, which is simply a nervous derangement of the digestive organs, they have been found equally successful. The Rings are of different prices, being made of all sizes, and of various ornative and the stightest inconvenience.

females without the slightest inconvenience.

The Galvanic Belts, Bracelets, Bands, &c.

Are modifications of the invention, and are recommended in more chronic cases of disease, where the

Rings do not posses sufficient in ensity or power. They are adapted to the waist, arms, wrists, anches, chest, or any part of the body with perfect ease. Any galvanic power that is required may thus be obtained, and no complaint which the mysterious agent of Galvanism can effect, will fail to be permanently reheved. Christie's Magnetic Fluid

is used in connection with the Rings and their modifications. This composition has been pronounced by the French Chemists, to be one of the most valuable discoveries of modern science. It is believed to possess the remarkable power of rendering the nerves sensible to Galvanic action, by this means causing a concentration of the influence at the seat of disease, and thus giving rapid and permanent relief.

OBITUARY. Lines, suggested by the death of Lieutenant Timothy Tompkins, Esq.

He shall not float upon his watery bler Without the meed of one melodious lear.—Millon. Death's fatal scythe is ever on the swing, And countless numbers daily prostrate sink Before the glittering grass-cutter; all ranks, All sects, all parties, nations and degrees. The wise and foolish, good and bad, the sage Whose eye anointed, sees philosophy Walk hand in hand with wisdom o'er the earth; And ragged loafer, costly ensconced In empty hogshead, plunged in problem deep, How (lacking com) to compass his next drink. "All flesh is grass;"—but, fondly, wandering wide In the Destroyer's field, I must return From such far cicuit unto one poor blade Cut off untimely in his green estate;— For thon, Lieutenant Tompkins, dost demand A pyramid of bones piled to thy praise:
So now, with sleeves uprolled, I am prepared
And competent to handle a few bricks
Towards thy well deserved monument.

The manner of his death was thus; one morn Ere rose the sun above the heaving wave, He sallied forth with shovel and wheelbarrow, His business (clam-digging) to pursue. Hope swelled his heart, (deceitfully, alas!) As rose upon him the inspiring thought, That the production of his daily toil, Unlike the toil of others, quickly changed, By aid of magic commerce, into cash. He reached the spot; 'twas where a low, flat bar Projected far into the yielding tide, Rich in the shelly tenants of the mud Though not in classic fable,—better far the first As present clams are worth more than past crimes. But, ere his purposed labor he began, His spade he planted in the cozy mire, As twere a standard, such as oft of yore, Have been set up in lone, secluded glens, By kingly wandering fugitives, to draw The wild and disaffected to their sides, Then his great coat unbuttoning, opened wide And took from out a pocket in the breast A vessel, which the vulgar call a "smuggler," Trilled with the drops that heat and cold dispel Whenever either forcibly prevails;
This to his lips applied, with head thrown back, And long and steadfast looked upon the sky. His invocation o'er, straight he returned The spirit and the body to their tomb, And then commenced with vigorous zeal his task. Not long he plodded, ere, again he reared The 'standard,' (just removed,) again invaded The 'standard,' finst removed,) again invaded The 'spirit's' resting place, with fated hand, And looked absorbingly on high. This pleasing rite repeated, he, until A change came o'er his spirit and himself, An 'hour of weakness,' yea, most wond'rous weak—
An hour of darkness, for he saw not how Th' advancing tide came stealthily to fold The destined victim in its stern embrace. His 'standard' lost, his basket and his clams He floundered on among the flounders, till Striving to pass between two treacherous holes That, yawning in his way, he dimly spied,
He sank in one, ileep, inextricable!
And now with added power, the waves came on,
Rushing and rising round the hapless man: Up! up! ascending, gaining inch by inch, They reached his waistcoat; button after button Was hidden 'neath the wild, submerging sea! Higher! and then his flaming face alone, Glowed like a beacon-fire upon the deep! Higher!! and then the first rude billow met That visage rubicand, when, wonderful! Such hissing rose, as oft in crowded hall, In times political, greets some poor wight, Who, undesignedly stumbles on a truth, Which is unwelcome to soap-loving ears. But why protract the scene? no longer now Lientenant Tompkins is beheld 'mong men, And we are left to weep his loss, withdrawn In life's young morning, scarcely forty-five, When he was full of hope, and gay and fresh He will be missed by those who nightly deal Clam chowder forth to hungry stomachs lank, We lack his presence at the old resort— The village bar room, where he oft would sit, And with calm, placid, philosophic grace, Puff out the cloudy incense of his pipe. We lack his presence when the annual call

No more,—but I forbear; the saddening theme Must be resigned, for whelming grief compels Abrupt conclusion to the doleful song. BILL BUTTERNUT.

LORRAINE'S PILLS.

All persons require Facts.

Remember in all cases that you are not deceived by thing that appear to be facts.

EMEMBER also, that, Lorraine's Vegetable
Pills have in their composition two of the most valuable medicines in the world, viz: Sursapurilla and Tomatoes. These two articles need no praise, neither do the celebrated Lorraine Pills, when they have once been taken.

Physicians, and people of every class are willing o come forward and announce, in the most public manner, that they have been cured of long standing complaints—after all other medicines had failed. In fact there can be no doubt but that Lorraine's veg-etable Pills is the best medicine ever offered to the

APRIL-SONNET.

BY REV. JOHN PRINCE.
The bright gay season hath again come round,
When Earth arouses from her dormant sleep—
When through half-opened lids of wild flowers peep

THE BEAM OF DEVOTION. BY G P MORRIS.

I never could find a good reason,
Why sorrow unbidden should stay,
And all the bright joys of life's season,
Be driven unbeeded away.
Our cares would make no more emotion,
Were we to our lot but resigned,
Than pebbles flung into the ocean,
what leave scarce a ripple behind.

e world hath a spirit of heanty,
Which looks upon all for the hest,
if while it discharges its duty,
To Providence leaves all the rest;
at spirit's the beam of devotion,
Which lights us through life to its close,
if sets like the sun in the ocean,
More beautiful far than it rose.

Time passed, and in the interval great changes took place in the position of the Jews in Spain. The popular opinion hegan to run strongly against them; always a despised people, the hatre: of the mob began to find vent in open persecution. Already the monarch was meditating their expulsion, that most fatal error to the prosperity of his kingdom, from the effects of which Spain has not yet recovered, nor never will. The Jews were in consternation. In a few months the edict came, and then matched in other respects, and their respective native land, the persecuted persecuted persecuted native land, and put on sackcloth and selves in the dust, and put on sackcloth and selves the amount of \$50 to be staked upon the askes—but this was not the whole of their mise-

Suddenly she started from her reverie—a low, hollow murmur, like the sound of the autumn wind, penetrated to the retirement of her chamber. She had heard such a sound once hefore, when a furious mob sacked the house of the Rabbi Benjamin, and her cheek turned of the Rabbi Benjamin, and her cheek turned ashy white. Louder and louder their cries approached. Miriam trembled with vague apprehension. Snatching a crucifix from her bosom, she kissed it fervently; and had just replaced it when the door of her apartment opened, and her aged parent rushed into the room, alarm depicted on every feature of his countenance.

SATURDAY MORNING MAY 2, 1846.

A REPREIVE

Great disappointment and some indignation was expressed by the populace who visited Gallows Hill on the 31st ultimo to witness the public execution of him. those convicted of the late murder, on account of a Repreive having arrived from the Executive. Early in the morning of that day, great numbers of people came in from the country in all kinds of vehicles, while many others who have a distaste for such exhibitions, left the city for the day. Not only the private carriages and wagons, but the stage coaches and Railroad cars were crowded with passengers having a morbid curiosity to see their fellow beings put out with the same eagerness. of existence by the hands of the law. Not only the Eastern Railroad, but the Essex and Georgetown Roads must have made an exceedingly profitable day of it. The crowd increased until the hour appointed for the execution, when Gallows Hill was completely covered by the multitudes who were situated favorably to see the execution and to look down upon the spot where the road disappeared and where those who were in the cars met their untimely fate. It was probably partly owing to this circumstance that so little sympathy was felt by the throng for the unhappy criminals, and symptoms of impatience began to be manifested on account of the slow march of the procession from the jail. At length it came in sight, and as it slowly wound its way up the hill, all eyes were directed to the carts containing the condemned persons who were seated on their coffins. They appeared to be in conversation with the attendant clermade a few years since, to preach on the "moral influence of Railroads." It was generally known that a strong representation had been made to the Governor, in favor of their pardon and that the friends of the deceased had, in generous sympathy for their wretched condition, united in asking a commutation of their punishment, and the eminent counsel who procured their conviction had exerted himself in their behalf. Until the moving of the procession it is believed that the prisoners had retained strong hopes of a repreive.

They had now arrived at the gallows and were placed in a row on the platform, the ringleader on ropes were attached to the beam, the knots adjusted, and unnatural condition at the time of perpetrating gain a poor renown for their departed friend by the fatal caps drawn over their pale faces and by the dial of the Sheriff's watch, the moment had just arrive them from this state of existence! horseback with a roll of paper in his hand, rode rap idly to the foot of the gallows and presented his scroll to the Sheriff. The instrument proved to be a repreive of all the prisoners whose execution so many had as. sembled to witness. Although the news of the pardon had at first given satisfaction and a joyous shout ran through the crowd, there was evidently much disappointment and many seemed greatly exasperat ed at this unexpected result. Whole editions of 'dying confessions' and 'last words' all ready for distri bution were suppressed, and a bevy of medical students who had procured a powerful galvanic battery to make experiments on the bodies of the criminals, were exceedingly disappointed, as they had been practising all the morning with perfect success on the legs of frogs and were entirely satisfied that they should be equally successful with the human subject

We have been made acquainted, through a member of the Executive Counsel, with the history of the application made for the pardon of these criminals. It seems that after every attempt had been made to set aside the verdict of the jury and obtain a new trial. the friends of the prisoners succeeded in obtaining the services of the gentleman who acted as counsel for the government in procuring their conviction, to appear before the Governor and his advisers, and obtain their pardon. As there was no possible doubt that the prisoners committed the act for which the law condemned them to suffer, the learned gentleman was driven to the necessity of pleading for their repreive on the ground that the act was committed while the actors were in a state of somnambulism.

To prove this, he introduced several witnesses who testified to facts bearing on this point and going to show that the prisoners were inveterate sleep walkers That they have always while in this unconscious state been in the habit of walking into people, that they walked into the East Boston Company-into the Railroad Committees-into the Essex Railroad, the

'em City Council and the Massachusetts Senate .- season. hey commenced sleep walking in their early youth and walked into the Ferry at East Beston. They then walked into the State for half a million and are now walking into the people to pay for it,

The learned counsel also proved that the prisoners were not only somnambulists themselves but that they had the power to put others to sleep. It has been known that some people who have been quite for life. The prisoners have been seen in the lobbies per foot.

ake up the dead hody of Miriam's father, and lifting into of the State House and in the Senate chamber, put his saddle her now lifeless form, he galloped with his troop ting members to sleep. Several witnesses testified ting members to sleep. Several witnesses testified that they had seen the prisoners looking very hard atcertain Senators, and described the various manipulaions and how the subjects were offected. One of the victims was made apparently very dizzy and be gan to take a zig zag course, and would spin round like a top. Some would go to sleep by a simple look and others required tremend ous staring and manipulation to be put into the unconscious state. After like appearance which its name indicates and being put into this mesmeric condition the subjecwas entirely in the power of the operators. He would be made to believe the same facts, advocate the same doctrines and come to the same results as those who operated upon him. In the case of a certain Senator who drew a Railroad Report, it was said that he even went beyond the knowledge of the operators (as sometimes happens in the case of clairvoyant subjects) and actually showed wonderful facts and results not in the minds of those who operated upon

One respectable witness testified to some experi ments on a Senator showing the entire subjection of the subject to the will of the prisoners. After the u sual trials of willing water to be vinegar, brandy, mo lasses, &c. with complete success, a handful of salt was given to him, and willed to be sugar, upon which he swallowed it all with great relish. Dear Sir,-

SALEM, April 27, 1846.

In reply to your question, whether on either of the trials of William Wyman for embezzling the funds of the Phonix Bank, there was any evidence tending to implicate the conduct or character of Jonathan Shove, Esq., late Bank Commissioner I have great pleasure in saying, there was no such evidence. I mean to say, there was no evidence implicating the conduct or character of Mr. Shove as an upright officer, and an honest man. In all the trials, to which the transaction in the Phœnix Bank gave rise, I never heard the slightest imputation upon the integrity or honorable intention of Mr. S. from any quarter, neither from the pre siding Judge, the Counsel on either side, any of the Bank Directors, or any other individual, ac quainted with the facts developed at such trials. certainly never had any reason to entertain ev en a suspicion of any connivance between Mr S and the accused officers of the Bank. The only unfortunate circumstances in the case, so far as Mr S. was concerned, were, that his last examination of the Bank was less thorough than his former examination had, been, and less thorough than it ought to have been, and that he was a lebtor to the Bank at the time of its failure. The examination made by Mr S., immediately preceding the last, was more thorough and perfect, and upon the projected Rail Road from Salon a full and minute record of it was presented, and den. While I take the trouble to deny the at that time, he was more largely indebted to the of having written the piece alluded to be Bank, than he was at the time of its failure. At your request I wrote Mr Chief Justice Wells and enclose you his answer.

Yours very truly, A. HUNTINGTON.

My Dear Sir,-

Your letter has been handed to me this after-I certainly received no impressions unfavorable

to the integrity of Mr Shove, by the investigations I made during the Wyman trials. The last examinations were less thorough and satisfactory than a strict discharge of duty by the Commissioners would have rendered proper, but this was owing to circumstances, which in my opinion, fully exonerated Mr S. from any ground for supposing, that there was any collusion or understanding between him and Mr Wyman.

I am sorry to learn that Mr Shove is in any

danger of suffering in his character of these transactions: I think they ought not to impair the confidence of any one in his integrity.

I am reluctant to do any thing which may seem

like taking part in a question in which I have no interest, but if the publication of my opinion as above stated, it is needed for the viudication of Mr S. you may make such use of this letter as

you think proper.
With much respect,

Yours truly, DANIEL WELLS. A HUNTINGTON, Esq.

"OAK HALL"

Visited by upwards of 80,000 PEOPLE! HE YOUNG LION, taking a short nap, skakes the dew drops from his mane, and gives a real

old fashioned "ROAR." Those who remember the events of 1812, in Boston,

the raising of the sign of the raising of the sign of the raising of the sign of the raising of the sign of the si will not easily ferget the tremendous excitement prowill not easily leight that the last leight and fur duced in the la shionable ready made clothing and fur

It first developed itself in gende ripples upon the sluggish sea of this branch of trade; anon the ripples took the of this branch of trade; anon the ripples took the form of swelling waves, rolling each upon another, unform of swelling waves, rolling each upon another, til its deep bosom was lashed into a tempest fearful to behold, sweeping the high price and long credit system into the deep gulf below. But to descend from this high state of metaphor.

Until April 1842, when GEORGE W. SIMMONS took the field it was not supposed by

took the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established customs of trade.

Until this time, men had gone on their old plodding

Until this time, men had gone on their old plonding way giving long credits, demanding as a recompense for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling announcement was heard, emanating from "OAK HALL,"

LARGE SALES AND SMALL PROFITS!

This annouc ement awoke the dreaming thousands Old men arose from their recumbent position, rubbed their heavy eye-lids, stretched their cramped and benumbed limbs; young men congregated on the corners of the streets and looked unutterable things—guesses and surprises were rife,—when straight all began to cry "Mad Dog." Still on I went, unawed by threats, nor cajoled by flattery, until finally I have laid fast and strong, a pinnacle stone as lasting and durable as the hills. To prove the advantage of the CASH SYSTEM

over all others, needs no lengthy tale. It must be apparent to the most casual observer, that while it shields the venur from the ruinous losses often attendant upor the venur from the runous tosses often attendant upon the crediesystem, it protects the purchaser from the equally runous profits demanded by merchants to cover bad debt, created by a system of long credits. To those, therefore, who can command the READY CASH,

this Establishment offers the strongest inducements. The Stock being purchased fresh this Spring, at auction, and direct from the manufacturers, at some 25 cent less than the cost of importation, and being satisfied with small profits, will sell at a slight advance upon auction prices.

And I would te pecifully invite the attention of the

citizens of Boston and vicinity to my unusual RICH DISPLAY AND NEW DESIGNS OF FRESH SPRING GOODS!

Received by the late arrivals per steamers and packet ships from England and France. I have also purchased from our own home manufacture, at low prices, an ELEGANT ASSORTMENT,

TRUSS MANUFACTORY BOSTON, MASS. CERTIFICATES.

From Dr. Coffin, Lynn. I have recommended the Trusses made by James Frederick Foster, of Boston, in a great many instances for these few years past, and it is due to him to declare that, in every instance that has come to my knowledge, his work has given complete satisfaction.

* FD VARD L. COFFIN, M. D.

From Dr. Robbins, Roxbury. Since the death of Mr. John Beath, I have used, in preference to all other Trusses those made by Mr. J. F. Foster, of Boston. P. G. ROBBINS, M. D.

From Dr. Collamore, Pembroke.

Mr. James F. Foster having for many years given his attention to the manafacture of Trusses, and fitting them to the particular classes of individuals who call on him, and having furnished for more than three hundred persons, in Plymerth, contract in least the case of the contract of t and having furnished for more than three hundred persons, in Plymouth county, is hereby recommended to all who need Trusses, Supporters, &c., as ingenious in contrivance, and skilful in adapting them to all variety of cases that occur; and is believed to have given general satisfaction to all who have employed him

ANTHONY COLLAMORE, M. D.

From Dr. Gordon, Plymouth.

Mr. James F. Foster, manufacturer of Trusses, Boston. Mass., from what I have seen of his Trusses, and from the circumstance of his having supplied several thousand persons in Massachusetts, and other parts of the country, with an article that I think is well calculated to the design if the Inventor, I have no hesitation in recommending his fruss to the public; and I believe him to possess, the ability of fadapting Trusses to any case that may be presented to him.

T. GORDON, M. D.

From Dr. Greene, Boston.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James F. Foster, and he has uniformly given full satisfaction in their application.

The benefit of such instruments is often lost, in consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted

If you have not time to peruse this at present preserve it for a leisure moment—it is of

importance. In again presenting
to the public the

DANDELION AND TOMATO PANACEA,

THE Proprietor would not claim for it, that it

THE Proprietor would not claim for it, that it is a specific for ALL the diseases to which the human frame is subject: but does claim that in all complaints where a purifier of the Blood is required that this Panacca is infallible, and it has the sanction of our first Physicians.

He would ask for it only, that meed to which the public may deem it entitled—and would prefer that its beueffeial results be its sole recommendation, and the relief and health which must accrue to the diseased and suffering from its use should proclaim its virtues.

For any of the following complaints, the Dandelion and Tomato Panacca, is the best remedy that has yet been oftered, and no article has given such universal satisfaction for Headache, Dizziness, Sleepiness, Loss of Appetite, Indigestion, Dyspepsia, Erysipelas, Salt-Rheum, Jaundice, Scrofula, Scurvy, and all cutaneous cruptions of the Skin, Chronic Diseases, Rheumatism, General debility, or any complaint that HAS ITS ORIGIN IN IMPURITIES OF THE BLOOD.

This PANECEA is composed as all must be aware who know anything of the DANDELION, TOMATO, and SARSAPARILLA, its principal ingredients, from the most innocent as well as the most effectual remedies to be found in the Vegetable kingdom; and who does not know that for all those Diseases, in which a complete and radical change in the composition of the Blood, in the secretions of the Liver, and in the formation of the solid parts of the body, are regarded there are no remedies, that will for a moment compare with them.

That it is parely a Vegetable composition, the public may rest assuced; but should any prove skeptical, I can show them the VOUCHERS of EMINENT PHYS1-CIANS to that effect, who have examined the formula, have tested its virtues.

CAUTION.

THE FRIENDS WHOM I HAVE KNOWN.

The bark flies fast before the wind,
That bears me from my home,
I leave my native laml behind
Amt care not where I roam; All fellowship with human kind, Henceforward I disown, And cast forever from my mind The triends whom I have known.

A drop of water from the brook, An acord from the tree,
An acord from the tree,
Are found in nature's wildest mok,
And would suffice for me: With these I'd welcome anywhere, So I lought hve alone, And never more be doomed to know The friends whom I have known.

While fortune smiled they filled my hall, A lond-a faithful hand; Who came, like vassals at my call, And moved at my command; ml I their silly dupe and prey, Believed their hearts my own; But forming frowind—and where are they,
The friends whom I have known?

Gone-gone to court the rich and proud, They hardly know me now; Or, if they greet me in the growd, "Tis with a silent how; I see the smiling face no more, Or hear the kindly lone, With which they welcomed me of yore, The friends whom I have known?

Then fly, my bark, and bear me on Front shores I loathe to see, Unto some savage isle—where none May lawn or frown on me; Some far-off wilderness—where I May live or die alone, Forgetting and forgotten by The friends whom I have known.

The demand for grain in Great Britain for a series of years to come, he has estimated raised and will speedily be finished. It is a large at 15,000 900bushels, annually. This will be the same and noble looking structure in its unfinished state, very nearly whether the Bruish ports are opened or and when finished will be an ornament to the not. But where is the grain all to come from? If village. But statistics show that we have, in the past, supplied but about one twentieth of this demand. say less than 1,000,000 bushels annually. The remainder has come from the continent of Europe .--And a repeal of the tariff cannot effect the proportion in our favor. And is this a market worth making sacrifice for? The grain crop of the United States in 1844 was over 95,000,000 bushels; of this the boasted British market has received but one ninety fifth part. The British market at the best, has, and can have, but the most trifling effect upon our agricultural productions. If a tariff exists, it operates with the same effect upon all countries which furnish grain to the Bruish market, and if the tariff is taken off, the effect will be precisely the same to all, with this difference, adverse to the United States, that the trade through Canada which has been two thirds of our whole trade with Great Britain, will be cut off, because now grain can be admitted through that country under the colonial duty, which is much lower than the duty on wheat direct from this country .-Therefore the effect will be instead of increasing the demand from this country, to decrease it two thirds, and bring the remainder in direct competition with the great wheat-growing countries on the continent, motion and hear the hum of machinery which would where laborers can be obtained for from 8 pence to a shilling a day and board themselves. This shows be taken and it will be seen that that the project will the utter absurdity of the prevailing opinion that the be carried through by the unanimous co-operation of repeal of the corn laws will operate beneficially upon the agricultural interests of this country. Let the United States pursue the same general policy which England ever has; let her regard what will be for her own interests-for the prosperity of the great mass of her laborers, without fear or favor, - and the same success will always attend her, which mvariably has in the past. But let her neglect these -- let her be tampered with and cajoled by foreign influences, and the locks of her glory will be shorn forever and her laborers reduced to a serfdom more miserable than that of the laborers of Europe.

Anti-Slavery Movements.

Clergymen of the Universalist denomination, to he number of 306 have published a protest against American Slavery, with a view to "add something to the moral power that is creating a deep horror at the monstrous wrongs of Slavery, and that shall cannot withstand the majesty of the demand to 'let the eppressed go free,' but shall glory God by loyality to Right and Duty."

This protest makes no allusion to any political arty, but confines itself to a against the wrong and sin of slavery, for good reasons set forth.

It will be remembered that a similar protest was published a few months since signed by a large portion of the Unitarian clergy. Rev. Theodore Parker remarked concerning this protest that it was signed 'not by the captains and colonels but by the rank and file of the preachers of that denomination.'

New School Houses.

The School House erected for District No.1. is just completed. It is finished for the accommodation of three schools and will comfortably seat 220 scholars, writing desks being furnished bread stuffs, by the British government, is anuelpated for 100 pupils. It is finely located, in a pleasant and airy situation, retired from the noise and dust mand for their produce, as ample compensation for from all the populous parts of the District. The great and important concessions which may bereafter spot of ground contains about three quarters of an acre, affording ample play-ground for the scholars believe to be a stupendous error, and a knowledge of where they may pursue their sports in safety and for our produce by such a repeal, will show this matter grounds are enclosed for the older and younger pupils. By the recent census of the children it is cumstances, and would alleviate immense suffering of the population, there being a few more children west, than east of the new house including among the latter all who come from the north side

The new School House in District No. 11 is being designed for a primary school. The new house will be divided into two apartments, the upper story being wholly occupied for the principal school, which will contain desks for 96 scholars and the lower, for a primary or intermediate school. We understand that it is the intention to adopt all the modern improvements in the finish. ing and furnishing of the house, which will make it one of the best school houses in the vicinity, the only drawback to its completeness being the want of suitable play ground around it.

WHAT SHALL BE DONE!

This is an important question with reference to the one which ought to be answered by a vigorous effort to introduce among us some kild of manufactures which shall keep our citizens at home, prevent the decline of real estate, and give employment to labor. If our people would only devote the same effort, with only half the zeal which was manifested in behalf of our Railroad, towards establishing some kind of manufactures which would create business as well as a fford facilities for it, we might see the busy wheels in give life and activity to our village. Let the first step all our citizens.

School Census.

From a census of the children in School District No. One, just completed, it appears that there are 278 rhildren between the ages of four and sixteen years. By this it appears that, contrary to the usual expectation, there has been an increase instead of decrease of this part of the population in the District. This result is accounted for on the supposition that many new houses in process of building when the last census was taken are now finished and occupied; and from the fact that most of those who have been thrown out of employment and removed from town, have been single men while those having families have remained.

By the rensus of last year, the number of children of the required age was 270, showing an increase this year, of & scholars. We hope the result of the enumeration in the other parts of the town will show that gather strength and greatness till human nature there has been no diminution of our population. The removal from town and those in prospect, show the need of the introduction of some stable and standard business to give support to our store-keepers, mechanics and laborers.

All persons require Facts. Remember in all cases that you are not deceived by thing

that appear to be facts.

EMEMBER also, that, Lorraine's Vegetable
Pills have in their composition two of the most
valuable medicines in the world, viz: Sarsaparilla and Tomatoes. These two articles need no praise, neither do the celebrated Lorraine' Pills, when they have once been taken.

Physicians, and people of every class are willing o come forward and announce, in the most public manner, that they have been cured of long standing complaints-after all other medicines had failed. In fact there can be no doubt but that Lorraine's veg etable Pills is the best medicine ever offered to the public.

See a few public statements of men of truth and vir-

Lynn, Dec. 17th, 1813. Sir; I have sold all the pills I last had of you, please send another lot immediately. The sale of Lorraine's vegetable Pills is rapidly on the increase they are becoming very popular. I sell more and more every day. As a curative medicines and purifier of the blood, I think they stand unrivalled. One fact I have noticed, that no one that has used them finds any fault with them; they have wronght some very great cures. One lady, who has been confined to the house and bed, a great part of the time. for to the house and bed, a great part of the time, for twenty years, is now cured and able to work most of her time, after having taken 3 boxes only of Lorraine's Pills!! A hacking cough coustantly annoyed me! Boston, Mass.

Boston, Mass.,

June 1st; IS14

Sir,—In February last, I took a sudden cold, after which a hacking cough constantly annoyed me, and this, combined with my other maladies, rendered me truly miserable, as everybody told me that I was in a consumption. Since, I have taken LORRAINE'S PILLS and now every body tells me that I am well;—I fee as well as ever I did.

J. E. S. McKEY.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James I. Foster, and he has unformly given full satisfaction in their application.

The benefit of such instruments is often lost, in consecutive in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good stricle, and see that they are well fitted.

Portland, Me., Nov. 7th, 1843 Sir: Please send us one gross of Lorraine's Pills, we have sold all we had last. They have given very good satisfaction, better than any other pills which we have in our market. I think in a short time they will take the place of others. We have had no fault found with them whatever; but, on the contra-

confined with the Rheumatism nearly the whole winter, have had some of the best physicians of Boston and conid get nothing that would relieve me more than temperarily. I heard of the wonderful virtue of Lorraine's Fills, I nad no faith whatever, but I took them, and it is a solemn fact that when I had taken but eight pills! my Rheumatism had entirely left me, and I have remained well ever since. N. B. I never took more than one pill at a time

Unable to raise the Hands to the Head!

Sir-For three years, Scrofula had produced such effect upon my constitution, that I was unable to raise my hand; the bones were in different places destroyed by ulcertion, and I feared it might reach the brain or vital organs. My pains were violent— all medicines recommended did no good. At last, I tock LORRAINE'S VEGETABLE PLLLS, which gave immediate relief, and have entirely cured me. Respecifully, your ob't serv't,

BEAUTY SLEEPING.

BY IDEUT. G. W. PATTEN. She shell! Along her arm of smow lier check of ruse serenely lad, While way curl heaved to and fro, At every sigh her breathings made; The very heecze that passed along, Went o'er her couch with gentle air, As louth to wake with pinion strong, The thing of joy that slumbered there.

She slept! The thin transparent lid, Curved calmly after her eye of blue; But though the earthly orlewas had, The spirit-light still struggled through? While after her lip unconscious wrough! A privering pulse which went and came, As if some drawn renewed the though! The waking hour had ceased to name.

She slept! And as the wandering rays
Of moralight kissed her forchead pale.
Bright truants! nothing loath to gaze
On charms which eight forgets to veil!
He marvelled not, why shapes of air,
Blest works which once in heav'n had shown,
Enraptured with a farm so fair!
For wanna's home had left their own.

SERENADE.

BY THUS. ROBB. Ah, aweet, then little knowest how
I awake and pensionale watches keep;
And yet while I address ther now,
Methicks thou smiles in thy sleep.
This sweet enough to make me weep,
That tender thought of love and thee,
That while the world is hushed so deep,
Thy soul's perhaps awake to me!

MAGNETIC TELEGRAPH.—The Magnetic Telegraph is causing great wonderment throughout the country amongst the rural population, of whom many anecdotes are told. We find the following in a country power page. in a country newspaper:

Last week, we are informed, a young genins from a northern town, who had been disturbed in his agricultural retirement by the vague reports of the wonderful lightning despatch, walked into the railroad house in this village, and inquired when the "telegraph would be along." Some mischieves ous boys, seeing a chance for sport, gravely informed him that it was about time for it, but that he would have to look sharp to see it, it went so quick, assigned him a station on a wood-pile, and directed him to fasten his eye along a direct line directed him to fasten his eye along a direct line between two of the posts. PEACH TREES,-Bogs of salt have been recommended to be placed around peach trees as a presmended to be placed around peach dees as a preservation against the werm which is supposed to be the cause of dying, generally at the age of five or six years. This has undoubtedly preserved them in some instances, longer than they would have lived yet it has not proved an infallible

Mr. Amzi Plume, of this city, has discovered a novel mode of reviving peach trees. Three years since he noticed that one of the best and youn jest bearing trees was dying, and thinking it would bear no more, he cut off all the limbs, leaving nothing but the trunk, and then merely for an experi-ment, he scraped it, and tied a salt cod fish a-round it, so high as to be out of the reach of dogs, with the raw side to the bark, and fixing it so that the drainings from the fish would run down the trunk. Shortly after this the tree sprouted. and grew quite thefity; and the following year bore peaches. Last year Mr. P. gathered from it a bushel of fine large fruit. This spring it was more backward than usual in blossoming, and Mr. P. thinking that the virtues the fish had posessed might have become exhausted procured another, and bound that in the same manner around it.—
The tree has since blossomed, and in all probability will produce a fine crop of peaches the ensuing harvest, as it looks as healthy as any other tree in the grader. Now whaten it was the sistence of the the garden. Now whether it was the virtues of the the garden. Now whether it was the virtues of the lish, or the effect of the brine that the fish contained, which revived the tree, Mr. P. cannot say; but he is certain it would have died, like other trees around it, had it would been for the assistance

WAR WITH MEXICG.

It is very clear now that a war with Mexico cannot be avoided. A war is actually commenced between that country and the United States. And what is it for? For what purpose are the people of this nation, the freest and and most enlightened people on the face of the globe, about to enter into a sanguinary contest? The answer is distinctly and obequivocally, for the extension and perpetuation of American Slavery, for the riveling in the District. We should be much pleased did more closely of the fetters of the slave. What an answer, and what a position for Americans. Shame upon a country which will go to war in such a case. Words too strong or too severe cannot be uttered in view of such iniquity and disgrace to our country.

The whole slave power has been concentrated for the last ten years to effect the annexation of Texas. In the last Presidential election it was amply with that essential aid to teachers in comfought for with desperation by the South .-The portion of the Democratic party from the was made in some of the addresses to the imporslave states, controlling as it always does the remainder, made the Texas question the great party sist the teacher in his instructions in the higher issue. The whole Democratic party supported it, and by the assistance of the Liberty party they rode into power. Texas, without which the South asserted, slavery could not exist ten years, was immediately annexed, regardless of consequences. And as a direct result of that annexation, war with Mexico has followed. This result object will have their influence and aid. They was anticipated by the Whig party. They solemnly protested against the annexation-that it would confirm the system of Slavery-that it would give undue power to one section of the country-and that it would inevitably involve us in a war with Mexico. The whole of this train be obtained for about \$200, and the attempt ought of disasters has followed in rapid succession .-But the Whig party have washed their hands clean of this iniquity. They have no lot or parcel in the matter any further than to defend their country and their homes. They cannot enlist in this war of aggression-this crusade for Slavery. Let the party which brought about this evil with their eyes open, bear the brunt of it. Let Col. Polk ren equal to most of the Academies in the country lead off his Democratic army and his corps du reserve of Liberty men, and let him and them reap all the laurels of this war with the barbarians, as rlansed to style it. If it were a war for may be immediately obtained. liberty-to defend our rights or our property-the free North would rise as one man to the struggle. But to sustain a national disgrace, to extend the separated. horrible system of Slavery, the North will not do it. It is a war in which the battle will not be for the strong-in which the right is on the weaker side. We shall march to battle with the murky clouds of slavery and oppression overshadowing the glorious stars on our banner-while the cry of freedom uttered from barbarian lips-liberty glittering from every fold of their flag-will strike consternation and dread to the hearts of their enemy. God forbid that we should go to war in such a cause.

Presidential Logic.

The President says in his War Message, refer ring to Mexico, that

"A government either unable or unwilling to entorce the execution of such treaties, fails to perform one of its plainest duties."

Now with due deference to Mr. Polk, we should like to know how it becomes the duty of the government of Mexico to do that which it is unable to do? We suppose it would be considered a hard case if Mr. Polk should be required to do what he greed to adjourn on the 13th July next. School House Dedication.

On Thursday evening, dedicatory exercises were performed at the principal room in the new School House in District No. 1. About 150 persons were present who assembled from a short and very imperfect notice given the same day to the primary pupils. The exercises were of an interesting character and were listened to-with great attention by the audience. Rev. Mr. Collyer opened with prayer and the audience was addressed by J. W. Proctor, Esq., Mr. Charles Northend, and Rev. Messrs. Prince and Field; all of them residents space and time permit, to remark on these excellent addresses which were so well calculated to impress on parents the importance of attention to the education of their children. LeBreton, and Emery Hale, of that town. The mill was erected in 1796, and manufactured the first cotton cloth which was made in a mill in Massachusetts, the cloth selling at that time for seventy five cents a yarā. The original cost was about \$50,000, and in 1823, the property was sold for 25,000. The water power is ample for nine months in the year, and probably at an expense of two thousand dollars might be made sufficient for the dry months. A grist mill occupied the spot as long ago as 1638.

CONGRESS.

MONDAY, May 11.

The President sent in a message to Congress on Monday, respecting our affairs with Mexico. The following is a synopsis of the message: The President opens by referring to his state-

ments in his annual message on the state of Mexican affairs, and explains his desire to fix the boundary question, and to settle the claim of United States citizens against Mexico, which had been standing for no less than twenty years. He stated that all open negotiations and efforts had failed to accomplish these desirable results. He had now to announce a state of War, and that open hostilities had already commenced. He shows how Hor Mr. Stidell came to be appointed last October, and states that our Council at Mata naras had been equested to inquire of the Mexican Government whether a Minister would be received by that Government. To this inquiry an affirmative answer was given, under certain conditions, which were, that our forces should be withdrawn Vera Cruz. The forces were withdrawn, and Gen Herrera, it was stated, was extremely anxious to receive the American Minister, Mr. Slidell, whom the President had despatched upon this intimation but events connected with affairs in Mexico had prevented his reception, and on the 24th of December last he was refused to be received.

In January, Gen. Paredes succeeded to the head We give a translation of a proclamation of affairs, and Mr. Slidell was again instructed to thich Gen. Amoudia has found the means of present his credentials, which were refused. The American forces thus far had been kept at Corpus Christi. But now Mexico would not recognize the The Commander-in Chief of the Mexican army to American Minister; and as Texas had asserted the English and Irish under the orders of the Rio Bravo or the Rio del Norie as the line of boundary in 1836, the army was ordered there on account of convenience in procuring provisions and obtaining the requisite supplies. Gen. Ampu dia, however, had notified Gen. Taylor on the 12th ult. that he must retire from his position, and on had called on Texas and Louisiana for troops, an the President wishes Congress to recognize a war He asserts that a state of war exists, and recommends that a War be recognized by Congress. He suggests that authority be given him to call a large body of volunteers into the service of the United States, to be enlisted for twelve months and that liberal provisions be made for the requi site supplies.

In the Senate, Mr. Calhoun pointed out the die linction between a state of war and a state of hostilities. War could not exist without the tion of Congress. After a long debate the message and docume

were referred jointly to the committee on militar affairs and the committee on foreign relations an 20,000 exira copies were ordered to be printed.

This is considered as tantamount to a declaration of war; besides, the preamble of a bill which the military committee will report is to contain a man festo to all nations of the grievances under which these hostile steps are taken.

CERTIFICATES. From Dr. Coffin, Lynn.

I have recommended the Trusses made by James Frederick Foster, of Bostou, in a great many instances for these few years past, and it is due to him to declare that, in every instance that has come to my knowledge, his work has given complete satisfaction.

T. GORDON, M. D.

From Dr. Greene, Boston.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James F. Foster, and he has uniformly given full satisfaction in tneir application.

The benefit of such instruments is often lost, in consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted.

BENJ EDWARDS, til its deep bosom was lashed into a tempest fearful to behold, sweeping the high price and long credit system into the deep gulf below. But to descend from this high state of metaphor.

Until April 1842, when GEORGE W. SIMMONS took the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established customs of trade.

Until this time, men had gone on their old plodding way giving long credits, demanding as a recompense for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling annoucement was heard, emanating from "OAK HALL."
LARGE SALES AND SMALL PROFITS!

This annoucement awoke the dreaming thousands. Old men arose from their recumbent position, rubbed their heavy eye-lids, stretched their cramped and be numbed limbs; young men congregated on the corners of the streets and looked unutterable things—guesses and surprises were rife,—when straight all began to cry "Mad Dog." Still on I went, unawed by threats nor cajoled by flattery, until finally I have laid fast and strong, a pinnacle stone as lasting and durable as the hills. To prove the advantage of the CASH SYSTEM

over all others, needs no lengthy tale. It must be ap parent to the most casual observer, that while it shields the vener from the ruinous losses often attendant upon the crediesystem, it protects the purchaser from the equally rutnous profits demanded by merchants to cover bad deby, created by a system of long credits. To those, therefore, who can command the READY CASH,

this Establishment offers the strongest inducements. The Stock being purchased fresh this Spring, at auction, and direct from the manufacturers, at some 25 per cent less than the cost of importation, and being satisfied with small profits, will sell at a slight advance upon auction prices.

And I would respectfully invite the attention of th citizens of Boston and vicinity to my unusual RICH DISPLAY

FOR THE COURIER.

Rat Bong. Translated from the German of Goethe's Faust.

In a cellar lived a rat, And grease and hatter got him fat; His belly puffed so round about, Bent Doctor Luther's out and out. The cook for kim had poison laid, Which hat his little belly made. As in a hody is love's flume. As in a hody is leve's flame.

He scampered round, both down and up, Stopp'd, galp'd some water from a cap, Then garwed and scratched at every ceiling, But ah, pour rat was far past healing ; As in a body is love's flame. As in a hody is love's flame.

Into the room at last he jumped, And on the hearth, his head he thumped. His brenth grows short, convulsed he lies, And soon in agony he dies. The poisoner looked on and laughed, As near to death the old rat gasped. As in a body is love's flame. As in a hody is love's flame.

That evening, any uncle invited Kate to walk with him by mountight; so you see the old gen-deman had a spark of romance after all. I was sure to be in the room when they returned, for I never could have encountered them with a sober face. I soon heard Kate ascending the steps; but as soon as she had entered my room, and closed the door, she burst into an immoderate fit of suppressed laughter.

Well, Kate, said I, as soon as we had controled aurselves a little, how did you come off Kate? On, capital? exclaimed Kate. Uncle John coffee, sending off its tempting fumes, was cause commenced by a few coughs and hems, and asked if I thought he was too old to marry. Oh no, said I, just a good age. I assented to all my hostess said; but, after all, it was a redious hour, this waiting for the bread to bake, while all after supper operations were suspended. My hostess after giving the dodgers' three successive thumpings, pronounced them baked, to my very great satisfaction, as boiling coffee, sending off its tempting fumes, was cause

Massachusetts State's Prison.

The following article; which we copy from the New York Tribune, presents a practical illustration of the superior excellence of the gospel principle, for the government and reformation of mankind, even the wicked and disobedient.

It was Saturday afternoon when we visited the Prison, and there were two circumstances which interested us deeply. One was the sight of the prisoners coming one after another to a window through which they received books from the hand of the Librarian. The other was the meeting in the Chapel of the Prison Choir, composing of such prisoners as had learned to read music er upon the bed right into the midst of balf a dozen lace collars newly done up, and kleked of his boots with such energy, that one of them landed upon the bureau, and the the other in the clothes' basket, soiling a white dress just from clothes' basket, soiling a white dress just from the ironing table. Poor Mrs. Jones was grievitie ironing table. Poor Mrs. Jones was grievituely tried. The husband expected a storm, but no storm broke. Ever since we were privileged to witness the effects produced by the delightful harmony of the Hutchiuson Family upon the prisoners at Sing Hutchinson Family upon the prisoners at Sing Sing, our faith in the power of music to repress unboly passion, and awaken the best feelings of the heart, had steadily increased. We were pleased to learn that the Choir in the Charlestown Prison were allowed Saturday afternoons to prepare themselves to perform their part in the Sunday services, and at daily morning and evening devotions. The Warden and the Chaplain spoke in the highest terms of approval of this arrangement, and of its happy effects upon the rangement, and of its happy effects upon the whole body of prisoners.

We wish the inspectors of the Prisons in our

own State could be persuaded to copy this excel-lent example. We are confident that such a measure would exert a highly salutary influence and be attended by no evil whatever.

Flogging in this Prison has almost entirely cased. We think Mr Robinson informed us that the lash had been used only once in a period ceased. of six months. This is in itself a great triumph of Christianity over barbacism.

LEGAL ANEODOTE. The Knickerbocker relates the following. It used to be told of Hon. Jeremiah Mason, as having occurred at Portsmouth,

"There is a well known custom prevailing in our N. H. criminal courts of assigning counsel to such prisoners as have no one to defend them. On one Now, just look at you, Mr. Jones! I delare! it gives me a chill to see you go to a lrawer. What do you want? Tell me and I will get it.

SATURDAY MORNING, MAY 22, 1846.

War with Mexico.

Our leading article of last week, deprecating the war between this country and Mexico, has brought down upon our heads a thunder of anathemas from our sapient neighbors of the Salem Advertiser. Words too strong cannot be uttered, to show their utter abhorrence of the sentiments expressed in that article; and they even go so far as to say, that it "would need but slight alteration, to satisfy the taste of the bitterest blood-hound, that fights under Arista's ensanguined flag."

The gentlemen of the Advertiser seem to imagine, that if a war is declared, or a band of American intruders upon Mexican soil are attacked, the whole country is bound to justify the war, or the intrusion, without any regard to justice or right. Now in this we differ widely. We do not regard a war with such patriotic emotions, that we would plunge the country into one right or wrong. We believe that a war is a serious, a very serious affair for our country, even if we are cannot be estimated. And as such, we have the audacity to express our views upon it even though Patriots of the Advertiser.

We say that Texas was admitted solely and exclusively for the extension and perpetuation of death. slavery-that a war with Mexico was necessarily incidental to that annexation-and as we protested against the one, we as strongly deprecate the other. We believe it to be disgraceful for our country to go to war in such a cause. We have ever regarded slavery as the greatest curse and: blight resting upon our national fame. We regard it as an unmixed evil, in any and every point of view; and we regard a war to support it, as the greatest evil that can befal our country. As we should loathe a war for the protection of piracy, so are our feelings enlisted against a war for the protection of slavery. And so regarding it, we express our views, and would to God that they could be heard, and would be heeded, by every true American, and this unholy war be crushed in the

We regard the feeling shown by the editors of the Advertiser as becoming the party which has brought about this war. We think their patriotsm should be excited—their enthusiasm fired and if they believe slavery to be such a noble in stitution as they pretend to, we think they should even dare to spill their blood in defence of it. It was for this that we penned the paragraph which is paraded by the Advertiser under the head of 'Whig Patriotism,' which is as follows:-

"Let the party which brought about this evil bear the brunt of it. Let Col. Polk lead off his Democratic army and his corps de reserve of Liberty men, and let him, and them, reap all the laurels

We think that as they have brought on the war they should have all the glory of it, and Whig schemes of the Southern slave-holding atistocrapatriotism is willing to yield to them all the lau- cy. Having of their own free will placed the rels.

Hero Worship.

One of the lasting evils to be apprehended to this country from a war, is that the heads of the people will beceme giddy with the 'pomp and circumstance' of military glory, and that a new crop enrolled soldier of Capt Polk's army of hungry of heroes will rise up to claim all the offices and office-seekers discharge at him a volley of popreceive the adulation of the multitude. When guns. we reflect on the claims as a military man by which Gen. Jackson obtained the Presidency, and the evils brought on the country by his want of knowledge and experience as a statesman, we may well have fears of the consequences of such an example. We have seen with what pertinacity the friends of Col. Johnson have every four years brought forth their Hero as a candidate for the Presidency, urging as the main qualification for that high office, his valor in killing an Indian Chief. We may therefore confidently look forward in future Presidential elections, to see nomnations of military chieftains, and all the catchwords and gasconade of party tactics used to eleyata the man of epaulettes. We should not be greatly surprised if, at the very next election, we should see a party rally under the standard of Gen. Taylor, and the magnified exploits of "the Hero of Matamoras," held up to dazzle the eyes of a thoughtless multitude. We should also probably see in Congress a plentiful sprinkling of Generals, Colonels and Commodores, owing their elevation to their success in their sanguinary vocation.

In making these remarks we do not wish to b understood to undervalue the services of the military man in the proper sphere of his duties, and much less to discourage a patriotic zeal in defending our country and institutions in time of danger. We heve no objection to a military man for office if he possesses the proper civil qualifications. Gen. WINFIELD SCOTT is a rare instance of a distinguished military character who is even more eminent as a civilian, and of such enlarged views and sound statesmanship as qualify him for the highest place in the gilt of the people.

We understand it is the intention of his friends to erect a Monument to his memory in Mount Auburn. With such a memorial, having a suitable inscription, though dead he may yet speak in the cause of humanity. The many travellers from the South, nearly all of whom visit that sacred depository may there find 'sermons in stones' whose faithfulness will cause the blush of shame to their cheeks and may we not hope produce a reform in their principles.

Whiskey for the Army. The Government has advertised for sixty-five thousand gallons of whiskey, for the use of the army that is going to invade Mexico.

What a disgusting spectacle does this present to the world! What better demonstration is needed of the sinfulness of war, and its inevitable tendency to degrade our race and lower the standard of true civilization! Think of it ye Washingtonians, and friends of war. Since man in his sober senses' with an equilibrium of thought and reason will not murder his fellow-men, the gov in the right; and if we are in the wrong, its evils ernment of the United States being very desirous to rob a weak and defenceless nation of her right called the "Brigade Alarm Post." has thought it wisdom to obtain (not an army of they grate harshly upon the ears of the excited blood-hounds) but an army of whiskey, which when it has converted a portion of its citizans into beasts will become a most successful instrument of

Slavery.

We have always been disposed to look upon the system of slavery as unholy, unnecessary, unjust and corrupt. But never have we been impressed with a keener sense of its wickedness than in the perusal of the following "Bill of Lading which was handed us by a friend and which we copy verbatim :-

SHIPPED, In good order and well conditioned by Doane & Ring, for account of whom it may concern, on board the good Steamboat called the Oio Vernon, whereof Deune is Master for the present voyage, now lying at the port of St. Louis and bound for Alexandria, Mi., the following articles, marked as below, which are to be delivered, without delay, in like good order, at the Port of Alexandria, Mi., (unavoidable dangers of the river, and fire, only accepted,) unto J. S. Hening & Co., or to his assigns, he or they paying freight for said goods at the rate of \$6 per lot.

In witness whereof, the Master or Clerk of said Steamboat hath affirmed to three bills of Lading, all of this tenor and date, one of which being accomplished, the others to stand void.

Dated at St. Lewis, this first day of April, 11846. Articles—3 negro men; 2 negro women; 1 ne-to boy. Dan Plasurd, Clerk. gro boy.

It is to protect and increase this abominable traffic, and to perpetuate this accursed system of slavery, that innocent blood has been and is to be shed and millions of dollars expended. Who is it that furnishes four-fifths of the large amount expended? Who supports the Army and Navy? Why the citizens of the free states, and thus they are directly the agents for promoting the faulest reins of government into unsanctified hands, they can now only submit with tameness to the fruits of their indiscretion, and should they now even dare to intimate that they are not willing to defend the foolish and indiscreet acts of President Polk and his coadjutors, let them beware lest some

Woman Missing !

A very singular case of mysterious disappearance happened recently in this place, which has given rise to various surmises as to its cause. A woman about 40 years of age, who has always resided on the Derby farm and has been so much attached to the place that she has remained there under every change of proprietorship, suddenly disappeared within a short period, leaving her husband without the least intimation of her intention to depart. The case is the more surprising, as this couple have lived together for many years, have been known to be very peaceable, quiet people and most unexceptionable neighbors. They have always, from their earliest connection been together on the same estate as a part of the domestic establishment, the woman having formerly been employed as milkmaid, until she threw aside her milking pail for a higher position. We will not attempt to describe the feelings of her anxious partner at the melancholy separation, but all attempts at consolation have been wholly unavailing- The unhappy man has appeared wholly unconscious since the sad event and remains in fixed position as if incapable of motion.

The woman had on when she went away gypsy straw hat, a short loose gown, a white aoron and light under dress and high heeled walking shoes. She is a little above the common height and a graceful figure. There are some reasons for believing that she intended to go to the northern part of the county, and she may possibly be connected with some one of the factories in that region. Any information concerning her will be thankfully received by communicating it at this

Since receiving the above information we have visited the farm house (now owned by Mr Amos King) and seen the "disconsolate partner" whom we found on the top of a building, standing in a his scythe. It seems that his lady who had always been near him, eloped while his back was

The Invading Army.

The proportion of troops to be drafted from the State of Massachusetts will be about 1800 men. This lraft must in the first instance be taken from the volunteer troops who are already armed and drilled until this portion of the militia is exhausted. If more should be required the enrolled militia will next be

Under the present requisition upon Massachusetts, each of her Volunteer Companies would be liable to a draft of about 10 men. The Danvers Light Infaniry having a larger number of curolled men than the average in the Commonwealth would probably be subject to a draft of 12 men. There is little probability that there will be any call from the northern states for active service in the war unless it should be longer and more serious than is now expected.

In the last war with Great Britain, the Militia of the Brigade in Essex South under command of Gen. Hovey, were subjected to a draft and the drafted men or those who were hired as substitutes, met for drill in front of the old South Church in Danvers, which was

ARISTA, GIVE EAR!

Should the successor of Ampudia, to the command States, in making up his Proclamations. we would suggest to him the propriety of adopting the loathsome slang of many of our opposition prints, at this time, to supply any deficiency. The leading article in the Danvers Courier of the 16th inst. would need but slight alteration, to satisfy the taste of the bitterest blood-hound, that fights under Arista's ensanguined

flag.

Arista would thus perform a double duty to his cause. He would call out the savage enormity of his followers towards our countrymen, and at the same time, give courage and succor to his co-adjutors and co-workers, within the heart of our country. He would bear on their ignoble banner in their present treasonable struggle for political power, and should Providence leave this people, he would aid the whigs o raise their victorious flag over the groans and tears and blood of our innocent women and children, and over the trials, disgrace and defeat of our army and navy, that are now enlisted under the gloribus stars and stripes, under which a Washington and a Jackson were once proud to lead their countrymen on to victory and to glory. Madison, and all the heroes of the last war, received just such mean abuse from the federalism of 1812 that Mr. Polk receives from the same federalism at the present time.

The whigs mean to prove to the world, that they are the true inheritors of the patriotism of such men as Benedict Arnold and Wm. Hull. Push on your columns, brave defenders of your country's savage enemies! Your end will be as ignoble as your predecessors of the last war. Your countrymen have set a mark upon you! Traitors will never be forgotten nor forgiven, by the true lovers of their country's honor. You have proved remant to your country in the hour of her calamity! Even the honorable portion of your country's enemies will remember you with loathing and disgust .- Salem Advertiser, May 16.

Listen all ye faithless sons of freedom, ye who dare oppose this crusade against the presumptuous Mexicans-the offspring of the christian, republican, democratic scheme by which so many millions of souls were added to the stock in trade of our Land of Lib. erty, by which also such a promising market for the traffic in these "goods and chattels" was opened. Give ear ye rebels, and stand confused, ashamed, abashed. Let bitter remorse now good your consciences, while the hand-organ of the Salem democracy grinds out your sentence of condemnation. Hope not for pardon, for it declares that you "will never be forgiven or forgotten." Let no smile ever disturb the melancholy befitting your doom; but with blood shot eyes and melancholy countenance, pass the remainder of your days in renitence, for this patriotic oracle as declared that 'your countrymen have set a mark exaggerated :upon you,' and 'even the honorable portion of your country's enemies will remember you with loathing and disgust.'

We would call the attention of our readers to the advertisement of Improved Perifocal Spectacles in another column, they are said by those who have used them to be superior to any others. Wm Archer jr., No 222 Essex st. Salem, is sole Agent for the sale of these Spectacles for Essex Co.

Concert. It will be seen by an advertisement in another column, that our citizens will have an opportunity on Thursday, of listening to some rich music. Messrs Emilio and Fenollosa are so well known in this community as talented and accomplished musicians as to render it unnecessary for us to speak of heir merits.

WAR NEWS

An escort of U. S. Troops, consisting of Capt Walker and twenty three men, Texian Rangers, having several wagon loads of supplies for Gen. Taylor's Camp, were attacked on the 27th April by the main body of the Mexican army, three thousand strong, half way between Point Isabel and the camp, on the long road, about fifteen or twenty miles from each point. Capt. Walker immediately placed himself on the defensive. The overwhelming forces of the enemy now bore down upon him like infuriated madmen, uttering the most savage yells. Although his troops were undisciplined—mere raw militia—the devoted litle band of twenty four nobly contested the ground with three thousand for fifteen minutes, in which thirty-five of the enemy were seen to fall dead on the field. At last the American lines were broker and the surviving dozen or sixteen fled in the di-rection of Point Isabel, pursued to within three or four miles of the post by a large force of the enemy. Captain Walker and seven men arrived safe at Point Isabel on the evening of 28th April. THE BATTLE.

Taking advantage of the American position low weakened as he supposed by the withdrawal of our forces, the enemy at day light on the mornng of the 3d May, opened a well directed fire on our camp, from his batteries at Matamoras. His artillery, although of light calibre, was served with a degree of skill which betokened the presence of some of the ablest English and French officers. The gallant Major Ringgold, commanding our artillerists, lost no time in returning the fire of the enemy.
Simultaneous with this attack on our front, the

enemy attacked our rear with a strong detatchment 2,500 men) of his forces this side of the Rio Frande, but was immediately repulsed. The Yankee pieces at once vomited forth a

tream of six, twelve, eighteen and twenty four pounders, on the Mexican batteries, in Matamoas, which silenced them in thirty minutes. The firing on our side continued during

whole of the day (Sunday, 3d inst.) until the forts and the greater part of the buildings in Matamoras had been destroyed. The un-official accounts (and we have no other) of the battle vary materlally.

The slaughter among the Mexicans was tremen

FROM THE RIO GRANDE.-We learn that dispatches were received this evening from Gen Tayor, dated the 3d and 5th inst-both Point Isabe and the fort on the Rio Grande pefectly safe.

On the 1st, the defences on the river being made strong, (nearly completed,) Gen Taylor left a garrison of some 500 men, under Major Brown, of the 7th infantry, and marched with the remainder of the army, (27 miles) to Point Isabel. Not an enemy was seen in the whole distance. Al apprehensions for the safety of that depot of supolies were thus dissipated.

But on the morning (5 o'clock) of the 3d, the enemy, from the side of Matamoras, opened a heavy cannonade upon our fort, which lasted, with but little intermission, till midnight. In the meantime the enemy's guns, (all but one mortar) were silenced by our fort. Major Brown lost one serieant killed, and not another man wounded -Our gallant little band expected an assault from this side of the river at the same time, and was fully prepared to repel it. None was made. Matamoras was necessarily fired upon in the

act of silencing the enemy's batteries, and also to kill or disperse the troops therein quartered.— The buildings were probably but little damaged. The inhabitants no doubt, had mostly fled before the commencement of the cannonade. What number of Mexican troops were killed was only known by conjecture; no doubt a considerable number.

General Taylor at Point Isabel, expected, on the 5th to march the next day with a heavy train of supplies for the fort on the river, and hence to assume offensive operations against the Mexicans; but a private letter makes the probable conjecture that General Arista had returned with his regulars to the other side of the river-leaving in the chapparals only the rancheros-his irregular cavalry It is not likely that he will reinvade, Texas, as General T. had received, or expected to receive Carolina 3-South Carolina 2-Georgia 3-Ala. the 6th inst., several detachments of troops (reg-

ESSEX RAILROAD.

A meetings of subscribers to stock in this Railroad was held in Salem yesterday, and was very fully attended. We learn that nearly \$100,000 of the stock is already subscribed, and a determination exists among the friends of the project to complete the undertaking with as little delay as possible. Committees were chosen to prepare by-laws, to solicit subscriptions to stock, and to report a list of offieers for the Corporation.

Total invaluable artible is now for the first time offered to the public, after having been in use or twenty years, with unusual and astonishing suceast within the livele of the proprietor's immediate reference. It has received the unqualified approbation of some entirent Physicians, and also Mariners

It is also recommended, and more than a thousand cases might be cited, when it has been used for Horses in cases of lameness or when galled, &c. &c.

The publicare assured that in offering the above we

do recommend that which has not the least semblance of wacaries, but on the contrary it has done great and lasting good in its efficacious power and healing As this medicine has been so long known in Salem

and its vicinity, and as there are many that would a-tail themselves of it if they knew where it could be obtained; therefore the subsciber would now offer it to the public. It will be found always on hand and to the public. It wanted to be prepared by the subscriber.

fact there can be no doubt but that Lorraine's veget: ble Pills is the best medicine ever offered to the public.

See a few public statements of men of truth and virue.

Lynn, Dec. 17th, 1843.

Sir; I have sold all the pills I last had of you, please send another lot immediately. The sale of Lorraine's vegetable Pills is rapidly on the increase they are becoming very popular. I sell more and more every day. As a curative medicines and purifier of the blood, I think they stand unrivalled. One

most innocent as well as the most effectual remedies to be found in the Vegetable kingdom; and who does not know hat for all those Diseases, in which a complete and radical change in the composition of the Blood; in the secretions of the Liver, and in the formation of the solid parts of the body, are regarded there are no remedies, that will for a moment compare with them.

That it is purely a Vegetable composition, the public may rest assued; but should any prove skeptical, I can show them the VOUGHERS of EMINENT PHYSICIANS to that effect, who have examined the formula, have tested its virtues.

Clans to max care, have tested its virtues.

CAUTION.

CERTIFICATES.

From Dr. Coffin, Lynn. I have recommended the Trusses made by Jame Frederick Foster, of Boston, in a great many instances for these few years past, and it is due to him to declare that, in every instance that has come to my knowledge, his work has given complete satisfaction.

EDWARD L. COFFIN, M. D.

From Dr. Rubbins, Roxbury.

Since the death of Mr. John Beath, I have used. preference to all other Trusses those made by Mr. J. l Foster, of Boston. P. G. ROBBINS, M. D,

From Dr. Collamore, Pembroke. Mr. James F. Foster having for many years given his attention to the manafacture of Trusses, and fitting them to the particular classes of individuals who call on him and having furnished for more than three hundred persons in Plymouth county, is hereby recommended to all who need Trusses, Supporters, &c., as ingenious in contri-vance, and skilful in adapting them to all variety of cases that occur; and is believed to have given general satisfaction to all who have employed him
ANTHONY COLLAMORE, M. D.

From Dr. Gordon, Plymouth.

Mr. James F. Foster, manufacturer of Trusses. Boston. Mass., from what I have seen of his Trusses, and from the circumstance of his having supplied several thousand persons in Massachusetts; and other parts of the country, with an article that I think is well calculated to the design of the inventor, I have no hesitation in recommending his Truss to the public; and I believe him to possess, the ability of adapting Trusses to any case that may be presented to him.

T. GORDON, M. D.

From Dr. Greene, Boston.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James F. Foster, and he has un-iformly given full satisfaction in their application.

MEXICO!-WAR! HY J. WESLEY HANSON.

All stocks are falling but gun-stocks ! Hurra! to the rescue! down, down with the slaves! Kick the vile hordes into premature graves ! Have they dared, the paor caltiffs, to injure, or vex us? Upon them,—repeat what we gave them in Texas! Will the dail fools of Mexico make a new trial? Will the data roots of Alexico make a new frint? Then empty of vengeance the Death-angel's vial! We are freemen, enlightened, we care for no man, And we to the nation where rests our dread ban. From the South and the West, from the East and the

Shall be like the grain, -and the sickles, our swords In the pride of his strength, our bold eagle will sweep, With a wing on the land, and a wing on the deep, And we to the place where he stoops in his wrath, Like the red-linked lightning, he'll tear him a path!

Ob, the Engle of Freedom's a proud, noble bird ! th, the ragge of receasing a produ, note but in the smoke of the buttle his screamings are heard; With a broad wing all gloom, and a bright eye all fire, the sweepeth along in the pride of his ire! He fears no assault, and he spurus all control, , wo to the Nation where he deals his dole ! One shrill, deathly scream—one swoop on the prey, And they pass like the shadows of sunset away.

Does he fear not at all? Ah, histories tell us, He is not at all times for buttle so zeatons; A day or two since, when from England's broad shore, The old Bellish beast was heard loudly to rour, And the music came booming across the Atlantic And the music can't friedom had almost gone frantic! The brave Bird of Friedom had almost gone frantic! In his terror he lost his great bundle of arraws, In his terror he jost his great bundle of arraws, And shook like a hawk-hunted covey of sparrows. Yes; there he sat trendthing, and timidly shivering, And each grey feather with terror was quivering. His screams were all hushed,—he was note as an owl, Awed silent and sull at the Lion's dread howl. His peace branch he waved with a suppliant motion, Peace, peace," was his cry, "on the land, on the

And now that the Mexican buzzard, half dead, Has dared in his own uest, to raise up his head, Our proud Bird of Freedom, with thame kindling eye, Proclaims with a shrick, "I am king of the sky!" Oh, a right cunning bird is this Eagle, I ween!
As cunning a bird as there ever was seen;
When Bagland shall speak, then he boweth his plume, As though in the sunnd there were judgment and doom As mongh in the summa there were judgment and doom this scream is all silent, his plumage is drooping. No more in his pride, from his eyric he's stooping, Thank's something, I think, in the Lion's hoarse growl, That changes the Eird to a barn-yard fow! But poor little Mazica, what right has she To speak e'er a word to the BIRD OF THE FREE? I don't think they know anything about such maiters. I have my own principles, and I have seen enough of the bud effects of giving out at the door never to do it. There is a drove of Irish go up this street, and we shall never get rid of them till all the neighborhood agree uniformly to refuse them—they are a wretched set of people.

'Very wretched,' I said, modestly.

'Yes, and very undeserving,' resumed Mrs Dave

'But do you know,' asked Mrs Devon, apparent ly quite shocked, what a line she is? She had the hardthood to tell me—and she is fatter than any of my children ever were—that she never had

DANVERS COURIER.

SATURD AY MORNING MAY 30, 1846.

Population of Danvers.

By the School Census recently taken, it appear that there has been an increase of only 35 children between the ages of 4 and 16 since last year. The whole number this year, as will be seen by the rable which we publish in another column, is 1713, which will require an appropriation from the town treasury, for schools, of \$3 each, making \$5139 n all. This does not vary marenally from the estimate made at the Annual Town Meeting, which was founded on the supposition what the number would be.

The number of children of the legal age in 1840 was only 1249, and the whole pupulation by the U. S. census of that year, was 5020. If the increase has been in the same ratio with the school census, our papulation must now be 6995. It will be recollected that when the Railroad Committee last winter were collecting statistics of the probable wants of the inhabitants, the population was then modestly estimated at 6500. If there had been the same increase last year as the average of the five preceding, the town would have had considerably more than 7000 inhubitants. Should there continue to be the same increase as indicated by the school returns, it will have in about 12 years the constitutional number to entitle it to become a city, which is 12,000.

WAR.

The actual commencement of hostilities between this country and Mexico, and the call upon the different States for troops to repair to the scat of war, have given cause for serious reflection among the more considerate in the community .-After a long series of years of uninterrupted peace, in which this country has been rapidly progressing in all that enable and advance a people, the tide of prosperity is at souce amested, the nation's impetus as cheched, and the sable vesiments of war shroull the country in gloom. The natural enquiry which suggests itself in view of this exent is, is it a necessary war-is our country in the right in this important movement? We do not hold that all wars are wrong. Wars strictly defensive we believe to be right. We do not believe it to be our duty to sit tamely hy and see our fields ravaged, our property seized, our homes wiolated, and our neighbors murdered. We would be among the first to resist invasion, to defend information in foreign countries, which ought to be our country from foreign aggression. We believe had in our public libraries at home. We have there is nothing more noble, more patriotic, than for a man to fight, and aye die if it may be, in New York and Washington but all are deficient defence of his country and his home; and we consider him little less than a monster who will pefuse to do it. But we believe there are very of foreign books in the United States is the Limartyrdem of the unfortunate Poles, who covered their country's soil with their dead bodies to de- of that institution who has the reputation of justified, and gloriously justified, as defensive wars. ry will show that there have been few, wery few. We believe that the misery, the crime, we protest against the present war with Mexico. ces of the Institution. We think that in that war soular our country is

We took Texas into the union with the inevitable certainty of a war with Mexico on account of it, and for the sole purpose of sustaining Slavery. This then is nothing more or less than a war for: Slavery. The sole motive and purpose of the war is to sustain that "institution." This is sufwar. But there are higher, more pre-eminent grounds, on which we contend that our country is in the wrong. They are that the war was actual-Ly commenced in the enemy's termony. The Republic of Texas, according to all the best authorities, never extended farther south than the Neuces River. The distance between this river and the Rio Grande, is about one degree and a half. Between these two rivers where is the extensive desert Mustang, and a large-salt lake. Texans had settled a part of the section between the Neuces and the desert, and over this had gradually extended their political organization. But in the section between the desert and the Rio Grande, Texas mover had any settlements, or maintained any authority. At has ever been speopled by the Mexicans, and known no other, laws than the laws of Mexico. Her authorities held undisputed oircumstances, as the facts will show. In June last, President Rolk-ordered the American army Rio Grande. He arrived with a part of his army at Point Isabel, or Santiago, March 25th. Within a few days he took a position within 300 yards ed to the citizens of Boston for this meritorious of the public square of Matamoras, and mounted upon it heavy ordnance. The Mexicans had a port of entry, and a custom house at, or near, east taken by the sculptor from the face of Wash. Point Isabel. The custom house was fired by the ington himself. The Legislature of Virginia had Maxicans upon the advance of the Americans,-

We should like to exlized nations. This is briefly the position of the hibit the 'crittur' at full length but must be content two nations at the commencement of hostilities. That the American army was at least on territory which the United States had no settled claim to, cannot be disputed. Even Mr. Benton of Missouri, in the debate upon the treaty in the Senate, in 1844, held the following language open it:

"The treaty in all that relates to the houndary of the Rie Grande, is an act of unparalleled outrage on Mexico. It is the seizure of two thousand miles of her territory without a word of explanation with her, and by virtue of a treaty with Cexas, to which she is no party."

We say in view of these facts that we are opposed to-that we protest against, this Mexican war. We believe it to be iniquituous in its inception and in all its subsequent stages. It is a war in which we are in the wrong, and which it is our duty as patriots and freemen to put a stop o as soon as possible.

The Smithsomian Fund.

After years of shameful neglect we are glad to earn that this noble bequest has at last neceived the attention of Congress and an act passed the House creating the "Smirmsonian Institution."

The object of this institution will be the diffusion of literary and scientific knowledge and a building is to be erected for the collection and arrangement on a liberal scale, of objects of natural history, including a geological cabinet, a chemical labratory, a library, a gallery of art and the necessary lecture rooms. The main object of the Institution at present will be the collection of a LIBRARY composed of valuable works pertaining out in the closing paragraph. to all departments of human knowledge.

We have read the speech of Hoa. M. Mexican commander to abandon it, but instead of ing the marble statue after the cast itself. Ger other statue of him that can be compared to it.

A Curios ity.

We copy the following amusing specimen of bom After these events, the Mexican commander bast from that precious Democratic print, the Sulem with the following specimen. The pathetic parts an peculiary rich, especially when we consider that those poor broken down old men and blooming and inno cent women and children-those exposed and unof fending babes,' shricking out in wild and maddening affright,' are nearly all Mexicans, speaking the Spanish language and considering themselves, although residents of a territory claimed by the United States as citizens of Mexico. But we must not keep our readers from the precious morsel. After copying an extract from our article of the preceding week, our Bumbastes Furioso breaks out in this strain: -

Would not such language emisfy the most ferocious appente of our barbarous enemy? Is it not filled full against our country' enough of venom and wrath just and glorious cause, the waterly, the wishes of cruelest enemy to our country and her honor, that follows the bloody footsteps of Arista?

The federalism of 1812 is far out done in this bitter and scurrillous tirade against our country in this time of her trial, and suffering. How think you, Mr. Courier such vituperation and mean abuse of your own country's glorious banner, in times of savage war, would sound in the ears of those broken down men-those blooming and innocent women and and unoffending babes, who children-those exposed are within the reach of the fury savage of our terribli and exasperated foes? Would they thank you for your encouragement of those infuriated men who stan over them sword in hand, eager to shed their innocent blood—to pollute their honor, or to burn their humble dwellings? Would not they shriek out in wild and maddening affright—Oh, save us! save us! Not sharpen the assassin daggers of our crasel and bar barous enemies!

Now, gentle reader is not that Pro-di-gi-ous ! Bo there is more to come. This doughty patriot is not quite exhausted yet. See how his gentle spirit oozes

The patriotism of the Courier is such as infuriated men, or dark and damned spirits alone, could suction, at such a time as this. It is such patriotism as nourishes and strengthens the hands of the enemies notifistes and steeples and deals destruction and death, blood and flame, riot and pollution, in the millst of the wives and worthy daughters, and disabled old men, near the scat of war.

developed itself in gentle ripples upon the sluggish sea of this branch of trade; anon the ripples took the form of swelking waves, rolling each apon another, until its deep bosom was lashed into a tempest fearful to behold, sweeping the high price and long credit system nto the deep gulf below. But to descend from this high state of metaphor.

Until April 1842, when GEORGE W. SIMMONS ook the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of imnovator of old established customs of trade.

Dutil this time, men had gone on their old plodding way giving long credits, demanding as a recompense for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling announcement was heard, emanating from "OAK HALL."

numbed limbs; young men congregated on the corners of the streets and looked unutterable things—guesses and surprises were rife,—when straight all began to ery "Mad Dog." Still on I went, unawed by threats, nor cajoled by flattery, until finally I have laid fast and strong a pinnacle stone as lasting and durable as the hills. To prove the advantage of the CASH SYSTEM

over all others, needs no lengthy tale. It must be ap parent to the most casual observer, that while it shields the venue from the ruinous losses often attendant upon the creditesystem, it protects the purchaser from the equally rutnows profits demanded by merchants to cover bad deb₁, created by a system of long credits. To those, therefore, who can command the READY CASH,

this Establishment offers the strongest inducements. The Stock being purchased fresh this Spring, at auction, and direct from the manufacturers, at some 25 per cent less than the cost of importation, and being satisfied with small profits, will sell at a slight advance

CERTIFICATES. From Dr. Coffin, Lynn.

I have recommended the Trusses made by James Frederick Foster, of Boston, in a great many instances for these few years past, and it is due to him to declare that, in every instance that has come to my knowledge, his work has given complete satisfaction.

EDWARD L, COFFIN, M. D.

From Dr. Robbins, Roxbury.

Since the death of Mr. John Beath, I have used, in preference to all other Trusses those made by Mr. J. F. Foster, of Boston.

P. G. ROBBINS, M. D., oster, of Boston.

From Dr. Collamore, Pembroke.

Mr. James F. Foster having for many years given his attention to the manafacture of Trusses, and fitting them to the particular classes of individuals who call on him, to the particular classes of individuals who can on min, and having furnished for more than three hundred persons, in Plymouth county, is hereby recommended to all who need Trusses, Supporters, &c., as ingenious in contrivance, and skilful in adapting them to all variety of cases that occur; and is believed to have given general satisfaction to all who have employed him

ANTHONY COLLAMORE, M. D.

From Dr. Gordon, Plymouth.

Mr. James F. Foster, manufacturer of Trusses. Boston. Mass., from what I have seen of his Trusses, and from the circumstance of his having supplied several thousand persons in Massachusetts, and other parts of the country with an article that I think is well calculated to the design of the inventor, I have no liesitation in recommending his Truss to the public; and I believe him to possess, the ability of radapting Trusses to any case that may be presented to him.

T. GORDON, M. D.

From Dr. Greene, Boston.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, hy James F. Foster, and he has uniformly given full satisfaction in their application.

The benefit of such instruments is often lost, in consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted.

H. B. C. GREENE, M. D.

This is the grand and largest fashianable Depot of Trade, where all can be fitted, from the largest man down the smallest boy, and in every walk of life, from the smallest boy are smallest boy.

But art has contrived appliances by which either nature is enabled to sew up her torn curtain, which she generally does in a short time, or all the serious consequences of her failing to do so are prevented.

For an excellent workman in this department of art, see the advertisement of James Frederick Foster in another column. We have been through Mr. Foster, setablishment, seen his voluminous correspondence with all parts of the country, and know him to be gifted with true Yankee ingenuity which always places itself and keeps at the head of any art to which it is devoted,

POETRY.

THE LONELY MOTHER.

BY FRANCES BROWN.

My home is not what it hath been, When the leaves of other years were green, When the leaves of inner years were green, Though its hearth is bright and its chambers fair, And the sammer beams fall brightly there; Int they fall no more on the clear young eye, and the fine of planning the control of the contr And the lip of pleasant song, And the gleany night that was wont to lie On the curls so dark and long.

O! pleasant is the voice of youth, For it tells of the heart's confiding trath. And keeps that free and fearless tone That ac'er to our after years is known: I bear it rise in each hamlet cot, O'er evening prayer and page, But wee for the hearth that heareth naught But the dreary tones of age.

The glow is gone from our winter blaze, The glow is gone from our winter blaze,
And the light hath pass'd from our summer days,
And our dwelling hath no household now,
For the sad of heart and the grey of brow; For its young lies low neath the churchyard tree, Where the grass grows green and wild; And thy mother's heart is sad for thee, My lost, mine only child.

But a wakening music seems to flow On me from the years of long ago, As thy babe's first words come sweet and clear, Like a voice fram thy childhoad to mine ear; And her smile beams back on my soul again Thy beauty's early morn,
Ere thine eyes grew dim with tears of pain,
Or thy lovely locks were shorn.

Their carly lost in that orphan face.
What after light will his memory mark,
Like the dove, that in spring time sought her ark?
For long in that far and better land Alas! for the widowed eyes that trace Were her spirct's treasures laid, she might not stay from its golden strand For the lave of hearts that fade.

But wee for her on whose path may shine The light of no mother's love but mine, Ol well if that lonely path led on To the land where her mother's steps have gone, The Lind where the aged lind their youth, And the young no whitening hair;
O! safe, my child, from buth time and death,
Let us hupe to meet thee there.

A NARRATIVE OF THE REVOLUTIONARY WAR IN TEXAS. BY PERCY B. ST. JOHN.

Before the war which for many year with desolation and rapine the whole of Texas colonization was extending its heneficial influence into the very heart of the country. The untiring energy and perseverance of the Anglo-Saxon race were carrying the arts of pence and civilization into the wilds; and in every district where wood, water, and fertile land tempted the adventurer, arose farms and cultivated fields. The savages, even the wild and warlike Comanches, were casily conciliated, and the whole land was dottedat vast distances one from the other, it is fruewith smilling homesteads. That happy and no the results would have ensued, none can doubt, had not the trump of war shaken the fabric of society, and replaced the back settlements in the condition of a wild and unproductive waste.

Andrew Pollock, a Kentuckian land-owner of no inconsiderable wealth, had been one of the earliest colonists who determined, at the instance of Moses Austin, the original settler, to make Texas his bome. Of peculiar tastes, however, which led bim to love the solitude and sublimity of the woods and the mighty prairies, where none but the painted Indian is found to dwell. Pollock with his family, passed the ontermost horders of civilization, and erected his lent some thirty miles beyond San Antonio de Bexar, within the district where the Arabs of the American desert, the Camanches, * hunted and fought. His habitadevoted to it, a most pleasing sight. Andrew Helen and the rest of the women were placed in tion presented, after two years of care had been month of a valley, where a stream burst from its pent-up position between craggy heights. To the north and cast spread a vast plain, dotted with its lands of timber, while a thick grove in the vicinity of the dwelling showed that the wary Kentickian was as much alive to the importance of his proximity to wood as to water. The dwelling and its appurtenances had been erected with care and its appurtenances had been erected with care and taste; its size betokening that room had been agraculty in using deeply within shall be saved.' Oh, Cristobal, do that: save shall be saved.' Oh, Cristobal, and my father, my mother, my my father, my mother, my mother, my my father, my mother, my mother, my father, my mother, my mother, my father, my father, my father, my mother, my father, my father, my father, my father, my mother, my father, my father,

dejection: 'look up the valley; the sombreros of the Mexicans are rising on the edge of the clift.'

It was too true: the peace of that quiet spot was to be invaded, and by the ruthless and pitiless Mexicans, with orders to treat Americans as Fray Christobal bad perilled life, all, for her and rebels, and put them to death on the spot. Before the strength of Texas was discovered, such was the terrible policy of the President Santa An-A loud shout from the Megican cavalry proclaimed their delight at a habitation; and in a few moment the house was surrounded, and all its inhabitants made prisoners, with the excep-tions of Fray Cristobal, who had instantly sought the cover of the wood. The wild appearance of the centralist troops was little calculated to reassure the captives. With huge low-crowned hats, gaudy jackets adorned with buttons, pantaluons covered with tinsel, and the scrape saltillero, or fancy blanket, they at the first glance looked picturesque enough; but black and unwashed fires, and in which showed to fire of the showed to fives, eyes in which gleamed no fire of mind or intellect, the knowledge of their gross ignorance, with their huge moustaches, blunderhusses, and every variety of firearms, filled the thoughts with visions of handati, to whom, in guise and conduct the Mexican soldiers unfortunately approximate

This was Colonel Dan Jose de Sarmiento, who, eyeing his prisaners with little favor—except indeed the fair-haired and now publid Helen—intuited who they were and what pallid Helen—inquired who they were and what they did within the conlines of the Mexican territory? Andrew Pollock, who understood Spanish replied somewhat haughtily that he was a freeborn replied somewhat haughtly that he was a freeboun American citizen, and, by adoption, a member of the new republic of Texes. Colonel Don Jose scarcely permitted him to finish his reply, ere he cried, 'A rubel! a rebel! his devotion she now had no claim.

The day passed; the Mexican saldiers are, drank, slept, and amused themselves, a few keep-ing watch. Night came, and then sentinels were pasted at every weak point : in fact a chain were pasted at every weak point; in fact a chain of suldiers surrouned the louse. Ingress and egress appeared equally impossible. Hours passed; the last meal was brought to the prisoners, with an intimation that at daybreak the terrible traggery would be appeared. For greater sufety tragedy would be enacted. For greater safety, lights were denied them, though the guards omitted to deprive the captives of their pipes and tohacco pouches, in which flint and steel were al-ways kept. For about two hours after sunset, no sound was heard save the measured tramp of the according to Indian custom manned sentinels with the stockade, and of the the ceremony of an adicu. observing sentinel. A heavy plunge was heard in the water, and when the alarmed sintinels reached the spot, a dark mass was seen floating

Early on the first sabbath morn in May, 1835, the whole family and the laborers were congregated on a kind of lawn in front of the dwelling at breakfast. The family was composed of th most dear to you, and doubt not but time will courage and prowess recorded in this book: When prove you not far wrong.' There was a tenderness in Helen's tone which carried irresistible been taken to Quebec had been exchanged and young man glided away towards the shed in which

the men were confirmed. A brief and hurried conversation now ensued, buildings and granaries, while hundfuls of burning sticks were cast from narrow loop holes, which were intended to supply light and air to the erection. The alarm was given ; the sentinels rushed to stay the flames and punish the audicious sternly around upon the British officers and draws ca to stay, the hames and poursa the addictors captives, when the door flew open, and a valley of musketry was poured upon the assonished Mexicans. The prisoners had been placed in the arsenal of the whole hamlet. And now, amid the roar of musketry and the crackling of the flames came the fearful Comanche w rewhoon lames, came the fearful Comanche w r-whoop from the plains apon the bewildered and affright ed Mexicans. To defend the house was impossible, as the fire would soon wrap it in one mass of flames; but for this a successful resistance might have been made. As it was, without attempting to recapture the armed Anglo-Saxons, who poured a galling fire upon them, the Mexican cavalry mounted, and collecting in one dense body, retreated towards the valley, followed by the Couranche horse, of whom they entertained a most wholesome and salutary fear.

Efforts were now made to extinguish the flames which had been the main instrument in dislodg ing the Mexicans, who, but for this, would have ield good the house against the Comanches. It was, however, in vain, and all that could be done was to remove the wagons and every kind of valuable from their proximity to the conflagration. This the party soon effected, the furniture in the house being all saved and placed upon the green sward, At dawn of day nothing remained

GEN. WINFIELD SCOTT.

As this brave and honored officer seems desfined to come more immediately before the public, than for same time past, in consequence af the share allotted to him in the conduct of the Mexican war, the following fine anecdote, related of him in a biography recently published by Prof. E. D. Minsfield, of Cincinnati, must prove highly

There is a striking instance of Gen. SATURDAY MORNING JUNE 6, 1846. The War Spirit.

It is melancholy to witness the recklessness with which a portion of the public press is endeavoring to awaken and foster the military spirit in our population. The most wonderful and extravagant statements of the success of our arms and the slaughter of the enemy, embellished with all the catch-words of a spurious patriotism are sent forth to cherish this love of military glory and promote a fondness for the sanguinary trade of war. It may, to some true lovers of peace be considered the wrong time now to attempt to counteract this spirit, as it may possibly give the appearance of want of that love of country which every true patriot is proud to feel and acknowledge. But a pacific spirit is not at all incompatible with a true and enlightened patriotism and the best evidence we can give of our love of country, will be to preserve to her the blessings of peace. In doing this we must expect to receive the low abuse of those gasconnding presses which are striving to make party capital out of everything even the wreck of the business, honor and prosperity of the country for which they are so loud in their praise.

One of the most encouraging indications in favor of a feeling of brotherly love towards other nations, is the fact that the clergy are giving this great practical question of national morality such attention as will make it a subject of solemu consideration among the great body of the people .-In this village on Sabhath before last, four of the five clergymen made this important subject the theme of their discourses and as might well be expected, they applied to it the high standard of Christian love as taught by their great master the prince of Peace.

Patriotic Gift.

Judge Saffield, of Washington county, in this State, has, we learn, says the Savannah Republican, written to Maj. Wade, U. S. A., in this city, that he has a fine blooded horse, which he is auxious to forward to Capt. Thornton, of the 2d regiment of Dragoons, with the army in Texas. Judge goes further, we understand, and states is too old to take the field himself, but he

The above generous offer of a "fine blooded horse" to the Capt, Thornton who was put under arrest on complaint of some of his junior officers learned Judge Saffield. But it seems that the Judge "goes further," and being "too old to take the field himself," offers to let the country have and many of their wounded died through neglect .not only the "horse" but his "negro fifer," to act as musician and he shot at by the Mexicans. As flaming patriots in Salem, who are not "too old" fifers" to lend with them!

We learn that this work has been approved by our School Committee and that it is contemplated to introduce it to our Schools in the place of those now in use. The need of a grammar, better adanted to the minds of children, than those of tioned, fifty-seven dead bothes were counted in one Murray. Smith and others, generally used in group, and not so much wounded as torn to pieces by this vicinity, has long been felt. The efforts of Brown and Felton had done something to meet this deficiency. Mr. Wells has completed in a good measure what they had begun. And we doubt not that his work, when perfected in the manner he contemplates, and published in a form the country are affected by it, but my main object adopted to the wants of scholars will be found a now is to propose some better suppleyment for those valuable acquisition to our common schools. So who are in the service of the government, than the far as we have had opportunity to examine this work, it appears to have been prepared with great care and intelligence. We hope our teachers will inform themselves respecting it, and if it shall prove such as we have described it, see that it becomes the text book in all our Schools.

Interesting Correspondence.

Danvers, May 24, 1846.

JAMES K. POLE, Esq., My dear Sir, I now take the liberty of addressing few lines to you, for which, as they are meant in kindness to you as my fellow citizen placed in a high and responsible office, I hope to have your indulgence. shall make some suggestions, such as you may not in the first instance fully approve, but which I hope will gain your attention and afterward your confidence. I am aware that you are surrounded with such advisers, and so many of your personal and political friends hold opinions so directly opposed to those to which I now call your attention, that it may be by some considered presumptuous in me to present them for your consideration. I hope however the circumstance that you have not the honor of my acquaintance, nor I of yours, will not prevent you from giving my suggestions all the attention they may be governed by the precepts of Christianity, and wars

the country at heart and wish to do all in your power to promote its welfare. As a citizen of this Republic, I have watched with some interest the events of your administration, and think I can discern too plainly a disposition to quarrel with other nations .--The suggestion I wish to make is, that the credit and honor of the country would probably be much better sustained by an apright, dignified and pacific course, rather than by blustering, threats and bravado. A nation, like an individual, will always appear more respectable and be more respected, by always preserving a gentlemanly and bland deportment towards others, and will stand little chance of being insulted and drawn into a quarrel; but if it attempts to ac the bravado, going about doubling up its fists in its neighbors' faces, it loses its dignity and respectability, and provokes assault from others. It not only loses its character, but does itself other great and positive injury, to say nothing of its being deprived of the pecuniary ability of doing good to its own citizens.

Just look at some of the evils of the existing war with Mexico, short as it has been, now only a month Look at the loss of life. More than 400 men, mostly young or middle-aged, have been killed, yes killed in this brief space of time ! They have been destroyed by the bloody weapons of war, as effectually as were the lamented Upshur, Gilmore and others whose awful deaths by an engine of war, produced such excitement throughout the country. That sad event causad a solemn gloom to spread over the nation, and the most heartfelt sympathy was felt for the surviving relatives. Suppose the mangled remains of these 400 human beings, now huddled promiscuously in ditches on the banks of the Del Norte, were laid out in the grounds of the Presidential mausion, what a speciacle of the horrors of war would they present! On the score of humanity, it matters not that most of these men were foreigners and enemies. They all had friends, parents, brothers, sisters, and it may be children, who mourn their loss as sincerely as did the friends of those who were killed on board the

After viewing the mangled remains of the dead, let us imagine the surviving wounded of that struggle brought to the same mansion and laid out on their cots, in the East Room. That extensive apartment is too small for their accomodation and they are crowded for want of space, lacking the fresh air so essential to their recovery. But how is it in the confined hospital barracks of Matamoras and Puint Isabel ? Probably far worse. We should suppose that a sight of has a negro filer, who, as a n usician, is at the such spectacles as these at the Capital, would make command of any of our volunteer corps. you and your advisers pause before lending your aid to such atrocities. Just read the following, which we take from a newspaper, giving an account of the wounded after the conflict was over, and reflect that

The Mexicans are reported to have lost 100 men in crossing the river, after the battle of the 9th, The reports from our own wounded men are not altogether favorable. The hospital at Point Isabel contained 53 wounded officers and soldiers. Some of to the willingness of the 'horse' or the 'negro fifer' to be sent to the Rio Grande, the Judge doubless considers the consent of one as unimportant as that of the other. We hardly know which most to admire, the patriotism or the justice of Judge Saffield, but we think he limitates the discretion—that "better part of valor," which prompted some that "better part of valor," which prompted some than "several places. I might dwell longer on the horrors of war and its immense evils as the business, safety and morals of destruction of their brethren. My proposition I fear, will be considered a strange one, and among those who are most immediately interested in the business of destroying human life it may excite ridicule. Yet. as I am convinced that if carried out it would result in great utility to the country, I will venture to name it. My proposition is this: I would have the whole Smith's Patent Fleeting Shower Baths .- This force of the Army and Navy applied to the development if the 50,000 volunteers and 10,000 000 of money | 1 canal round the Sault St, Marie.

With Army and Navy, Rallroads could be built connecting States and Territories, and giving increased value to the public domain. We learn that the person who passed off the bill at the Danvers Bank, had the appearance of an ordinary business man, and when he called at the Village Bank, he was disguised with a pair of false whiskers. The lady who called at the Warren Bank, was no doubt his accomplice.

The Congressional proceedings of Wednesday were unimportant, no question of general interest being before the Senate, and the House being engaged on the bill to increase the number of Gen.

CONGRESS

From the Regular Correspondent of the Tribune. SATURDAY, May 30, 1846. The Loco Foco Members of the House of Rep.

agree upon a programme of the proceedings .--They agreed to take up the Tariff two Weeks from Monday next, which will be the 15th of June, and also that they would refuse to entertain any motion to fix a day for adjournment till that question was disposed of. II the discussion should last a month un this subject, it would run us into the middle of July before they would a-gree to think of an adjournment. Before the 15th priation bill, and other matters of pressing importance. There was a proposition made, I believe, to pass over the Private Calendar hereafter altogether. They also agreed to make the hour of meeting at 10 o'clock. This measure they attempted this morning in the House, but could not carry it. Other matters were agreed upon in

The speech of Mr. Benton hus so completely used up the 54 40 boys that unless they can musnow only seen in chalk charts on old barus or in neighbor Slamm's paper.

The Senate seem determined to pass no more and his Cabinet have settled the boundary. It is said that a Treaty is expected soon. It may come from England.

Ex Presiden: Tyler has given a clear testimony in layor of Mr. Wenster. I believe he overturns the evidence of some of the partisans now in office in this city. If the whole truth clicied he published, Mr. Webster stated his belief that the Oregon furnace brighter than ever. Mr. TYLER is still in town. He has been examined by both Com-

All the witnesses have been examined by both Committees, I believe. Mr. Vinton's may report on Tuesday or Wednesday next. Mr. Shenck's will also soon report. The party have only dirtied their net and caught nothing.

FORTUNATE RESCUE. On Thursday afternoon us the steam ferry boat was crossing from the city to East Boston, it came in contact with a small boat, containing a young man and three small bays, and passed completely over it. Formuntely, at this moment, the stenmer R. B. Forbes was in the vicinity, and Captain Fowler, with great promptifude, faunched a cance, which was on deck covered with canvass, and succeeded in resening all four. One boy he saved by the hair denvoring to hold up the other boys (whuse heads however, were a foot under water,) and got them Boston Traveller. nto the boat.

> ARRIVAL OF THE HIBERNIA. Ten days later from Europe.

The steam ship Hibernia arrived at Boston on

Monday, making the passage in thirteen days. The money market has improved since the last news came to hand, from the United States.

The Provision trade is not brisk, and prices are receding. Nearly all kinds of Irish provisions have given way during the last few days, caused in a great measure by the immense arrivals from On the field, was found a dog lying by the dead the United States, and still more from the supein vision trade with the Union, promises to become one of the greatest importance.

The Queen's acconchement was laily expected. The English captitalists are very angry at the improdent conduct of the Mexican government, to their creditors.

The relaxation of the English Tariff has been the subject of fierce debate in the House of Lards. A debate upon the Corn bill has been had in the House of Commons. The House divided at 4 in the morning, and affirmed the third reading by a majority of 98.

It is said that the Premier will retire from office, when the measures upon which he has hased his character, have passed. He is solicitous for

FRANCE.

The intelligence of the passage of the Oregon notice, caused but little sensation in France.—The state of affairs between the United States and Mexica, excites considerable interest. The opinion is, that if the Mexicans go to war with the United States, they will get badly whipped.

THE OREGON QUESTION.

The London Times of Thursday says-"The packet which will sail from Liverpool in a few lays will convey to the United States the impression produced here by the late intelligence. If the resolution was intended as a threat or a hosile measure, it has totally failed to have any effect whatever, except that it is probable Mr. Pakenham will be at once empowered to bring he controversy to a prompt and linal issue. The ondon Economist state, on what it considers nigh and unquestionable authority, that the Orecon question is on the point of a satisfactory setlement.

Attention for some time past has been aufficiently fixed on the Oregon question by the pror dated Tuesday evening, says:

'An express has this afternoon been despatched concentrated the gaze of all who take an interest by the Secretary of War to Col. Kearney, with in the peace of the world. Now the scene is passed a bill incorporating a company to construct canal round the Sault St. Marie.

ARTIFICIAL LEG !- The Greatest Yet! Professor B. Frank Palmer, of Meredith, N. H., exhibits at the Fair, an Artificial Leg, which is attracting great attention. It is a most complete piece of Vankee mechanism, and does much honor to the loventor. Professor Palmer himself emphytone of these legs, (having an artificial knee) and walks so well that no one would suppose it an artificial leg. Its operation and appearance are centainly, to our apprehension, most admirable and wonderful. We believe it to be entirely superior to all artificial limbs heretofore in use, as it involves new and important principles which give it all the elasticity and freedom of motion of anatural limb. There are many rare and ingenwe think more curious and useful than this,-(Nat. Intel.

Sub Treasury-In Congress on Monday, Senator Miles said he was alraid the Sub Treasury would sleep the sleep of death. Senator Lewis said the Suh Treasury Bill would be reported in a few days; to be postponed, we hope, to the first Monday in December. This or any time is inauspicious for such a project.—N. Y. Sun.

SMITH'S PATENT

FLEETING SHOWER BATH

WHICH is far hetter than any other and WHICH is far better than any other and very nucl superior to the objectionable Cast Iron Bath. The proprietors of this justly celebrated Bath have extensively introduced it into different parts of the United States, and are now manufacturing them in large quantities, of different style and finish, to meet the wants of the public. The increasing demand for this desirable and useful piece of furniture only substantiates what the subscriber has before asserted, that it has been and continues to be the most preferable Portable Shower Bath in the market, and for the following reasons:

the most precedure I traine Shorter Barn and for the foliwing reasons:

Ist. It is not encambered with heavy weights and pulleys, or a clumsy cast from trop and bottom, which would make it expensive, liable to rust, break, and get out of repair, not easily moved about, inconvenient in its operations, and impleasant for the batter. But on the other hand, it is very leave and divebble, light and purtable, ungrates effectually.

easily moved about, inconvenient in its operations, and impleasant for the batter. But on the other hand, it is very cheap and durable, light and partable, operates effectually, and can be agreeably and pleasantly used.

2d. It does not require a ten horse-power to lower the fountain; neither is it necessary to fasten it down when lowered, to prevent its running away like an unruly horse—but can be lowered in an instant by the slightest exertion, and readily raised, without compelling the bather to exhaust all his strength. In short, this Bath is what hundreds of individuals of the best respectability have pronounced it—all that mechanical skill could put within the same compass and expense. I would therefore respectivity say to those who wish to purchase or examine this desirable article, call on the subscriber, at No. 121 Boston street, Salem, who will take great pleasure in more minutely detailing to them the respective merits of the Fleeting Shower Bath, by personal demonstration.

"ROAR." Those who remember the events of 1842, in Boston

he raising of the sign of "OAK HALL,"

will not easily forget the tremendous excitement pro-uced in the fa shionable ready made clothing and fur nishing line, in the debut of the subscriber. It first developed itself in gentle ripples upon the singgish sea of this branch of trade; anon the ripples took the of this branch of trade; anon the ripples took the form of swelling waves, rolling each upon another, until its deep bosom was lashed into a tempest fearful to behold, sweeping the high price and long credit system into the deep gulf below. But to descend from this high state of metaphor.

Until April 1842, when GEORGE W. SIMMONS ook the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established customs of trade.

of innovator of old established customs of trade.

Until this time men had gone on their old plodding way giving long credits, demanding as a recompense for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling annoucement was heard, emanating from "OAK HALL." LARGE SALES AND SMALL PROFITS

This annoucement awoke the dreaming thousands Old men arose from their recumbent position, rubbed heir heavy eye-lids, stretched their cramped and be numbed limbs; young men congregated on the corners of the streets and looked mutterable things—guesses and surprises were rife,—when straight all began to cry "Mad Dog." Still on I went, unawed by threats, nor cajoled by flattery, until finally I have Inid fast and strong, a pinnacle stone as lasting and durable as the hills. To prove the advantage of the CASH SYSTEM

over all others, needs no lengthy tale. It must be apparent to the most casual observer, that while it shields the venur from the ruinous losses often attendant upon the crediesystem, it protects the purchaser from the equally runous profits demanded by merchants to cover bad deby created by a system of long credits. To those, therefore, who can command the READY CASH,

this Establishment offers the strongest inducements. The Stock being purchased fresh this Spring, at auction, and direct from the manufacturers, at some 26 per cent less than the cost of importation, and being satisfied with small profits, will sell at a slight advance upon auction prices. A hacking cough constantly annoyed me! Bosyon, Mass., June 1st; 1844

Sir,—In February last, I took a sudden cold, after which a hacking cough constantly annoyed me, and this, combined with my other maladies, rendered ma truly miserable, as everybody told me that I was in e consumption. Since, I have taken Lorrance's Pills and now every body tells me that I am well;—I fee as well as ever I did,

Portland, Me., Nov. 7th, 1843 Sir: Please send us one gross of Lorraine's Pills, we have sold all we had last. They have given very good satisfaction, better than any other pills which we have in our market. I think in a short time they will take the place of others. We have had no fault found with them, whatever; but, on the contra ry, they have been praised loudly. I think we could have quite a number of highly respectable cer theates from our citizens.

pointeation, soften and the words with the Rheumatism nearly the whole winter, have had some of the best physicians of Boston and could get nothing that would relieve me more than temporarily. Fheard of the wonderful virtue of Lorraine's Fills, I had no faith whatever, but I ook them, and it is a solemn fact that when I had a ken but eight pills! my Rheumatism had entirefy of time, and I have remained well ever since.

N. B. I never took more than one pill at a time and that on going to bed.

Yours respectfully,

> CERTIFICATES. From Dr. Coffin, Lynn.

E. MASON.

Chelsea. Jan-3d, 1844

Sir: I transmit to you an account of my case for publication, believing it to be my duty. I have been confined with the Rheumatism nearly the whole wince the have had some of the beet physicians of Roston.

EDWARD L. Coffin, M. D.

From Dr. Robbins, Roxbury. Since the death of Mr. John Beath, I have used, in preference to all other Trusses those made by Mr. J. F. Foster, of Boston.

P. G. ROBBINS, M. D,

From Dr. Collamore, Pembroke.

From Dr. Collamore, Pembroke.

Mr. James F. Foster having for many years given his attention to the manafacture of Trusses, and fitting them to the particular classes of individuals who call on him, and having furnished for more than three hundred persons, in Plymouth county, is hereby recommended to all who need Trusses, Supporters, &c., as ingenions in contrivance, and skilful in adapting them to all variety of cases that occur; and is believed to have given general satisfaction to all who have employed him

ANTHONY COLLAMORE, M. D.

From Dr. Gordon, Plymouth.

Mr. James F. Foster, manufacturer of Trusses, Boston, Mass., from what I have seen of his Trusses, and from the circumstance of his having supplied several thousand persons in Massachusetts, and other parts of the country, with an article that I think is well calculated to the design of the inventor, I have no hesitation in recommending his Truss to the public; and I helieve him to possess, the ability of adapting Trusses to any case that may be presented to him.

T. GORDON, M. D.

From Dr. Greene, Boston.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James F. Foster, and he has uniformly given full satisfaction in their application.
The benefit of such instruments is often lost, in consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted.

POETRY.

Extract of a Letter on the subject of War; dated Danvers, Sept., 1814.

To-morrow our brigade turns out To-morrow our original turns out
To have a military bout.—
To be reviewed to mimic war—
But that's an art I do abhor;
I've lost each spark of martial pride,
And have become quite quakerfied.
I deem that painter much to blame Who hands the hero up to fame, And thereby tans of war the flame : The poet too who does emblaze
Such deeds of blood with deathless praise,
Must counteract the Christian plan And prove the enemy of man! And prove the enemy of thath:
You ask, "whence I such precepts draw,
Since self-defence is Nature's law?
How I can dare to thus debase,
The greatest of the human race?" Revenge has not a place assigned Within the humble Christian's mind; Misnamed the great the world's disgrace, The scourges of the human race, Are raised by flatt'ry to the skies And hailed the just, the good, the wise! Didst thou possess a heart more bold, Than fierce Achilles had of old, The strength of Samson or the skill That David had, his foes to kill, Still I would rate thee far below Him who forgives and loves his foe, Naught so exalts the human mind As meekness, faith and love combined— Dost believe there is a God Who rules the universe, whose nod Can strike oppressors dead? and canst thou not in him confide

Though evils lurk on every side, To shield from harm thy head? Weak is his faith, who can suppose, That God who all our danger knows, Will not his promises fulfit, And hide the faithful soul until The indignation's o'er-Until his foeman's rage subsides. Till anger's fierce and vengeful tides Roll, dash and foam no more! Should I be left to fall beneath The sword some villian may unsheath, I shall deserve the blow; Or twill be sent to set me free From sin, pain, death and misery, From every ill below. Though av'rice gives oppression birth, Ambition delages the earth,

With tears and human gore,-I want no armed force, or sword, My life or property to guard, I trust a higher power. Vengeance is mine, and mine alone, The great Jehovah says; and none Shall ever trust in vain His mercy, justice, or his power, Whose wrath oppression And break the pris'ner's chain. Once trust in God, all fears and doubts shall cease, equaint thyself with him and be at peace!
What Demon reigns whence these alarms? Hack, hark, the cry to arms! to arms! Are barnishing the murd'rous steel—

Their trust is placed in gans and swords; The clang of arms delights their ears And must'ring legions calm their fears!

O what a harrid sight to see ofessors of Christianity, ke anto Heathen warriors laced, Ready to stab the hearts of those Whom law alone has made their foes, Although a common faith and creed takes or should make them friends indeed! Far counteracts the Christian plan, beroes are foes to God and man.

esist not evil Jesus cries; Const thou his holy law despise And while you basely disobey. Canat thou to God for succour pray?

She longed for ever to screen them with a mother's love, from all the vicissitudes of life. a mother's love, from all the vicissitudes of life. Heaven preserve my daughters from the cup of sorrow of which I have so deeply drank! she involuntarily exclaimed, as she retired from her daughters, and sought her chamber to give vent to her overcharged heart.

Her daughters knew that a cloud of adversity had overshadowed their mother's path. They knew that her married life had been one of desolation. Never had the name of their father heen called by their mother. The eldest had an indistinct remembrance of a painful interview between her parents, which terminated soon in their sen-The younger ones knew not a father's His eye had beamed on them only in their infantile years; and when they witnessed the endearments of the domestic fire side, where the prayers of the sire called down blessings on his offspring, they often wept that they were never to realize a father's tenderness. Delicacy forbade their asking Mrs Wilmot any questions. Relatives mentioned him not; and they grew up to womanhood with this knowledge alone, that their father had forsaken his family, and thrown them on the world destitute.

A painful silence reigned through the little parlor from which Mrs Wilmot had retired. Each seemed occupied with her own thoughts. Mary was weeping, and her tears had fillen unnoticed on her slate, obscuring a composition on which she had bestowed much labor.

'I do wish, sister Sophia, that Mr. Merrill had not popped into your head this morning; for my whole composition is spoiled; my ideas are so scattered that I cannot re-arrange them; and worse than all, mamma has been envoloped in gloom, by a few idle remarks.'

'Mamma is too anxious about us, I think,' replied Sophia.

At this moment a brother of Mrs Wilmot en tered the apartment. He noticed the gloom which had deprived his nieces of their usual hilar-

principle. Mrs. Wilmot noticed that the absence of her husband at his business was becoming more and more protracted. Innocence suspects no evil, and her mind was always ready to form a favorable excuse for Edward's delay. Occupied with family cares, the lateness of the hour

would often surprise her.

One evening she was waiting, as usual, the return of her husband; the candle had twice burned to its socket; she had read and sewed by turns, to while away the time, and again took up turns, to write away the time, and again took of the daily paper. Her husband's name arrested hereye. Can you imagine her surprise, when she found her best furniture was to be sold an auction the following day? She could hardly helieve her eyes. Again she read, and found it was an exact catalogue of her parlor furniture. Absorbed in painful reflection, she heeded not the en-trance of her busband until he stood at her side. The paper lay on the stand before her, her finger, still pointing to the advertisement, as though to ascertain if she were indeed correct.

'Mr Wilmot, with an assumed air of cheerfulness, exclaimed, 'What are you prosing over

He did not treat her with barshoess; but, O I such cruel neglect. He sacrificed at the card-table his property, his health, and his honor. The full moon, just sink-ling to her rest, often witnessed him stealing to the sleepless bed-side of his wife; till at length self-respect seemed entirely lost, and he would absent himself for several days, none knew where. Friends urged a separation. They had tried to reclaim him—they had remonstrated—they were allength disgusted. Their object was now to prevail upon Mrs Wilmot to return to the home of her childhood. O, how the lone heart will ching in its bitterness to that which it has loved! She still hoped he would change; and when she shought of the work of ruin which had been accomplished in a few short years, how could she leave her husband to degradation—a lost—n ruined man? She roused herself from the leihargy which bung over her, and determined to exert herself to obtain an adequate support for herself and her little ones.

Again and again were the silver and other valuable articles taken from the house, and deposited with the pawn-broker. Articles of dress were staked at the table. Large sums of money were often taken from the house, but never return Your mother found it impossible to contend with such accumulated difficulties. She arranged her affairs, and with five children—the eldest perhaps eleven-returned to the home which she a happy bride, had left twelve years before. She was but thirty years of age-still lovely-but sorrow had withered the rose on her cheek; and had it not been that her mind was nerved with more than ordinary strength, she would have sunk into an untimely grave. The party, equipped for the ride, were soon in the carriage, and Sophia was left to a solitary tete-a-tete with her fascinating beau. The tale she had just heard was sufficient to prevent her bestowing her hand on the elegant James Merrill. Altered Bank Bills.

It is time that some measures were taken either by law or by mutual agreement among the banks to prevent the counterfeiting and alteration of bank bills. A counterseit bill is much more difficult to make, and when made is easier of detection than an alteration. By an easy chemical process, the denomination of a small bill is extracted and the counterfeiter has only to fill the blanks with a '50' or '100' and his work is complete. The plate is the same, the signatures and filling up are genuine, and the general appearance of the bill gives rise to no suspicion. The slight discoloring of the paper in extracting the ink only gives the bill an appearance of being worn by circulation and thus aids the deception. There may be a small actual difference in the vignettes but it is not to be expected that the officers of banks and much less the business men of the community, shall be familiar with the fancy engravings of all the plates of two or three hundred banks, and be able to pronounce at once on their genuineness. We think no candid person who will inspect the bills recently palmed off upon two of our banking institutions, will say that he would not readily have taken them unless his suspicions had been excited from some other cause than the general appearance of the bill.

The remedy for this evil we think, lies mainly with the banks themselves although the law may afford its aid in some particulars which we shall suggest. If the banks should all adopt a form of can throw, or the height of the stream, a serious plate for their small bills with the figure of the denomination of so large size as to almost cover its face, its extraction would be impossible without desiroying much of the other engraving and before they are prepared to operate, owing somewould thus be an effectual guard against alteration of this kind.

Another kind of alteration, which has been very common although perhaps not so dangerous as cal good would be the result of trials and efforts of the last named, is the changing the name of a bil! of a broken hank for that of an institution in good credit. In this case the name of the bank and the place where it was situated is extracted and supplied with the name of a good bank. This alteration is likely to be detected by the written signatures, which are those of the officers of the broken bank, or if they are extracted, by the counterfeit imitations. This fraud may also be committed by making the same use of the bills of a bank whose charter has expired and its concerns wound up. It seems to us that in this case the law should step in and require all the plates, die and bills, signed and blanks, to be destroyed or denosited with the Treasurer of the Commonwealth. It is believed that not only blank impressions of bills of banks whose charters have been forfeited, but the plates and dies have fallen into the hands of counterfeiters and been used to defraud the community.

The Earthquake.

The papers come to us from all quarters with accounts of the trembling of the earth with noise somewhat similar, yet unlike distant thunder. So many accounts from such distant points and all agreeing so perfectly as to the time when the the grading. The whole line of road will probathing took place render it quite certain that it was really an earthquake. It was noticed by if the work is vigorously prosecuted we may exmany in this place and generally supposed to be pect the cars to be running over the whole route thunder, although it seemed different and unlike the usual effect of that phenomenon.

Earthquakes of late years have been quite unfrequent in this latitude, and people had almost forgotten that they were liable to witness in any degree the agitation of the crust of the carth The late specimen was so gentle as not to excite alarm and has been pronounced 'no great shakes,' Lord Byron speaks of the birth of a 'young earthquake and this was probably one of those infant prodigies. He speaks well of the Mexican Congress which he says is a highly respectable looking body and rvey dignified and orderly. He says that mempers who should conduct as do some of another Congress on this continent would be in danger of the executioner.

Of Gen. Paredes the present President of Mexico he says 'he is a man of talents and acquirements in his profession and all speak of him as a gentleman and a patriot.' Mr. Thompson has also a high opinion of Santa Anna and apol ogises for the cruelties inflicted by him in the war with

He thinks there is little danger of any alliance of the Mexicans with England as they are particularly jealous of that people, and until the revolt of Texas they were particularly favorable to this country. He says they possess many of the ele ments of a great people and it is our peculiar and high duty to assist in their development.

The book abounds in interesting matter relating to the history, names and customs and present andition of Mexico.

We notice the spirit of rivalry is again revived among our engine companies and on the first Monday evening in each month, large companies assemble on the common, to witness the working of the several engines while the companies attached to them evince much anxiety that their particular engine shall prove victorious by forcing her stream of water higher than any other. Now there may not be any thing improper in it but still we cannot conceive of any very desirable object attained by all this anxiety, and excitement, for it would require only a well-constructed engine and a sufficient brute or steam power to accomplish and perform all that is aimed at. But should our volunteer enginemen aim with an eagle-eye to the practicability of these exercises and endeavor to foster a general spirit of usefulness and discipline, by striving to ascertain how little lelay is necessary to place the engines in a working condition, as well as the torrent of water she evil may be obviated, for every one must have no ticed that there is generally a lapse of several minutes after the engines have arrived at a fire times to the lack of knowledge or quick thought on the part of the firemen in placing properly the engine or hose. Something new, in this Neighborhood.

The inside walls of the Universalist Church at the New Mills, in this town, have recently been papered,-presenting the semblance of fresco-18th; services commencing at half past 10 o'clock, painting. This is the first instance we believe of anything of the kind in Essex Country. It is much cheaper than painting,-the whole cost, in the present case, being less than \$40; and it is said to be quit durable, if the work be well done. There is one church adorned in this manner, in the city of Lowell. That and the one at the New-Mills are the only instances we have heard of .-It is certainly an improvement, worthy of attention on the score of economy. While we refrain from the lavish expenditure and gorgeous display that have characterized the Romish Church, let us nevtheless have such chaste and simple decorations as will minister to the sense of true refinement .-'Strength and beauty are in His sanctuaries.' From the N Y. Sun. Oregon Question.

We learn by Telegraphic despatch from Washington, that the President sent in a message to the Senate yesterday afternoon concerning a draft of a Treaty between the Republic of the United States of Ameri ica and the United Kingdom of Great Britain and Ireland, dissolving the treaty of joint occupation and defining the boundaries of their respective territories in the country between the Rocky Mountains and the Facific Ocean.

The terms of the treaty have not transpired, and cannot be fully known until the official obligations of Gen. Taylor in command of the army and to r government officers are removed by definite action, or tain Gen. Scott at the head of the Bureau. the publication of the documents. A long debate arose in the Senate on the treaty, which was still continued up to the time of forwarding our latest Despatch from the Capitol yesterday evening.

The views of the two Governments are favorable to the forty ninth parallel of north latitude as the boundary, and as far as we can learn this line is the basis of the treaty now before the Senate, England to have ree access to the Pacific ocean through the straits of

The territorial limits are marked in the configuration of this continent by an Almighty hand. The Platte, the Arkansas, the Red, and the Mississippi Rivers. * * * These are naturally our waters, with their estnarics in the bay of Mexico. The stupendous the Newscas and the Prayo Rivers and deserts between the Neuces and the Bravo Rivers are the natural boundaries between the Anglo-Saxon and Manritanian Races. There ends the valley of the West. There Mexico begins. * * We ought to stop there because interminable conflicts MUST ENSUE, On either our going South or their coming North of that gigantic boundary. While peace is cherished, that boundary will be kept sacred. Nor till the spirit of conquest rages will the people on either side molest or mix with each other.'

Ingersoll.— There is not an inch of ground to base any of those charges upon—and our honorable and distinguished Senator stands out before the world, pure and unsullied by the accusations brought against him by a malevolent coalition of unscrupulous demagogues. His accusers felt the great and commanding weight which his talents, his patriotism, and his long acquaintance with political affairs, would give him, upon the leading po-litical questions which are likely to engage the attention of Congress, and the people; and they have been mousing about among the secret archives of the State Department, to see if they could not rake up something to detract from his high character and standing. POLE'S REGARD FOR LAW. The President has n only violated courtesy and justice in his appointment of officers to the new Rifle Regiments, but he had shown an utter disregard of Governmental regulation A writer in the New York Courier calls attention the manner in which he has violated the Goverrme West Point regulations in his recent army appoinments. The West Point regulation approved by the President is this :--

EDWARDS' LINIMENT. For Sprains, Cuts, Bruises, Stiffened or

Swelled Joints, Chilblains, Chapped Hands Numbness and Rheumatism. HIS invaluable artidle is now for the first time offered to the public, after having been in use

or twenty years, with unusual and astonishing success within the circle of the proprietor's immediate nfluence. It has received the unqualified approbaion of some eminent Physicians, and also Mariners

It is also recommended, and more than a thousand cases might be cited, when it has been used for Horses in cases of lameness or when galled, &c. &c.

The public are assured that in offering the above we do recommend that which has not the least semblance of quackery, but on the contrary it has done great and lasting good in its efficacious power and healing

As this medicine has been so long known in Salem and its vicinity, and as there are many that would avail themselves of it if they knew where it could be obtained, therefore the subsciber would now offer it to the public. to the public the DANDELION AND TOMATO

Chronic Diseases, Rheimatism, General definity, of any complaint that HAS ITS ORIGIN IN IMPURITIES OF THE BLOOD.

This PANECEA is composed as all must be aware who know anything of the DANDELION, TOMATO, and SARSAPARILLA, its principal ingredients, from the most innocent as well as the most effectual remedies to be found in the Vegetable kingdom; and who does not know that for all those Diseases, in which a complete and radical change in the composition of the Blood, in the secretions of the Liver, and in the formation of the solid parts of the body, are regarded there are no remedies, that will or a moment compare with them.

That it is parely a Vegetable composition, the public may rest assured; but should any prove skeptical, I can show them the VOUCHERS of EMINENT PHYSICIANS to that effect, who have examined the formula, have tested its virtues.

ABDOMINAL SUPPORTERS. NEW ENGLAND TRUSS MANUFACTORY, BOSTON, Mass.

CERTIFICATES.

From Dr. Coffin, Lynn
I have recommended the Trusses made by James Frederick Foster, of Boston, in a great many instances for these few years past, and it is due to him to declare that, in every instance that has come to my knowledge, his work has given complete satisfaction.

EDWARD L. COFFIN, M. D.

From Dr. Robbins, Rexbury.

Since the death of Mr. John Beath, I have used, in preference to all other Trusses those made by Mr. J. F Foster, of Boston.

P. G. ROBBINS, M. D,

From Dr. Collamore, Pembroke. Mr. James F. Foster having for many years given his attention to the manufacture of Trusses, and fitting them to the particular classes of individuals who call on him, and having furnished for more than three hundred persons, and naving turnished for more than three numered persons, in Plymouth county, is hereby recommonded to all who need Trusses, Supporters, &c., as ingenious in contrivance, and skilful in adapting them to all variety of cases that occur; and is believed to have given general satisfaction to all who have employed him

ANTHONY COLLAMORE, M. D.

From Dr. Gordon, Plymouth.

Mr. James F. Foster, manufacturer of Trusses. Boston.

Mass., from what I have seen of his Trusses, and from the circumstance of his having supplied several thousand persons in Massachusetts, and other parts of the country, with an article that I think is well calculated to the design of the inventor, I have no hesitation in recommending his Truss to the public; and I believe him to possess, the ability of adapting Trusses to any case that may be presented to him.

There De George Protect From Dr. Gordon, Plymouth.

From Dr. Greene, Boston.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James F. Foster, and he has uniformly given full satisfaction in their application.

The benefit of such instruments is often lost, in conse-

The benefit of such instruments is often fost. In consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of scuding patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted.

That Chemical Laboratory on which the life of every human being depends, is partly walled in by a mere membrane or curtain of very delicate texture. The smallest rent in this curtain, on account of the great pressure upon it, leads to the most troublesome and serious consequent.

The smallest contains the cost of importation, and being satisfied with small profits, will sell at a slight advance upon auction prices.

And I would respectfully invite the attention of the citizens of Boston and vicinity to my unusual RICH DISPLAY

But art has contrived appliances by which either nature is enabled to sew up her torn curtain, which she generally does in a short time, or all the serious consequences of her failing to do so are prevented

of her failing to do so are prevented.

For an excellent workman in this department of art, see the advertisement of James Frederick Foster in another column. We have been through Mr. Foster, sestablishment, seen his voluminous correspondence with all parts of the country, and know him to be gifted with true Yan kee ingenuity which always places itself and keeps at the head of any art to which it is devoted.

will not easily forget the tremendous excitement proneed in the in shionable ready made clothing and fur pense, nishing line, in the debut of the subscriber. It first developed itself in gentle ripples upon the singgish seal of this branch of trade; anon the ripples took the form of swelling waves, rolling each upon another, until its deep bosom was lashed into a tempest fearful to behold, sweeping the high price and long credit system nto the deep gulf below. But to descend from this

high state of metaphor.
Until April 1842, when GEORGE W. SIMMONS ook the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established customs of trade.

Until this time, men had gone on their old plotding vay giving long credits, demanding as a recompens for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling announce ment was heard, emanating from "OAK HALL." LARGE SALES AND SMALL PROFITS

FRIENDSHIP, LOVE, & TRUTH.

BY MRS. M. H. SALTMARSH.

Friendship, Love, and Truth,
Glorious words are these,
Spread them where the earth extends,
Bear them o'er the seas,
When they are heard on every shore,
Sin's dominion shall be o'er.

"In our God we trust." "In our God we trust.
Ye have chosen well,
Each frail spirit stayed on him
Shall in safety dwell—
Peace your hearths and homes shall bless,
God your refuge in distress.

FRIENDSHIF—angel guest,
Who but owns thy worth,
Healing with a gentle hand
Many a wound of earth;
Through all lands thy praises ring,
Angel of the healing with Angel of the healing wing.

Love-what gifts are thine, Of immortal birth,
Dweller in the princely hall,
Guarding cottage hearth—
Bearing rest to crowned head,
Watcher by the lowliest bed.

Joyful with the young,
Stay when youth hus fled,
Welcoming to life the babe,
Mourner for the dead,
Royal guests where kings abide
Inmate where the sinful hide.

TRUTH-triumphant power, Author divine,
Attribute divine,
Space of deity, whose light
Must still higher shine;
Till sin's dark devices fail,
"Truth is great and shall prevail."

Words of wondrous power, Be their import known;
Brighter day shall dawn for earth,
When their sway we own.
FRIENDSHIP, LOVE, and TRUTH shall be
Pilots through eternity

A REAL GEM .- The following lines were written by Mr. Adams, in the album of a young lady.

To Miss E ___ McL ___ One day between the Lip and Heart A wordless strife arose, Which was the expertest in the art

His purpose to disclose.

The Lip called forth his vassal Tongue, And made him vouch a lie!
The slave his servile anthem sung,
And braved the listening sky.

The Heart to speak, in vain essay'd, Nor could his purpose reach— His will nor voice nor tougue obeyed, His silence was his speech.

Mark thou their difference, Child of Earth!
While each performs his part:
Not all the lip can speak is worth
The silence of the heart.

A BROTHER'S LOVE ..

A ROMANCE OF REAL LIFE.

The scene of our present sitting is a log cabin on the banks of the Calicoon; the time, night; the dramatis personæ are hunters of various appearance, and the employment of the party is cleaning and preparing rifles for to-morrow's hunt.
One end of the cabin is entirely filled with a broad himney of rough stone, on the ample hearth of which the large logs roar and crackle and blaze so brightly, that we need no candle to see each other's visages. We all know each other well.— Every fall, for many years, we have met here, and driven the deer of Wayne and Sullivan. We discussed the morality of our employment long ago, and with clear consciences and happy hearts we are now gathered, after a weary day's hunt, around the fireside which for the present we call home. Supper over, (it consisted of steaks from this morning's first shot, and broiled patridge) we fell into the regular conversation of this evening, namely, about the absent and the loved.

This is the happiest part of the day, after all. The weary body is permitted to rest, and the unwearied mind roves everywhere joyously. Then we talk of all that may most amuse or interest; and it is often an odd thing to see a man in a plain roundabout, without buttons, but fastened with yellow tape, bloody pantaloons and unshaven face, drop his gun which he is cleaning, and rise, and talk eloquently of some subject you would never dream of hearing outside of a library, or in any company than that of the literati of the or in any company than that of the literati of the city. But always on rising from supper, the friends at home are first named, and many kind thoughts and prayers are on our lips for them. So this night. And now, having perhaps given some idea of the appearance of our party, we will let the

conversation run on.

'J—had no letter to day, and feels somewhat blue,' said S— 'J—has not hunted with us to-day, but has been across the Delaware with us to-day, but has been across the Delaware and down to the bridge, (a matter of ten miles or more) to the Cocheton Post Office, to bring the more) to the Cocheton Post Office, to bring the letters for all of us. 'You, S-?'
'Why not? I had a sister once, and loved her too. I've learned a lesson in my life you have yet to learn, and that is, never to think lightly of

In the village of P—, on the west bank of the Deleware, once lived a brother and sister, orphans, all in all to each other. He was manly trayed one in a land where sorrow is not. Veriand noble. Men looked on him, and loved themselves the more that they were fellow creatures of such a nobleman. And she—'ah, she was queenly!' On her forehead nature had written so rich as hers, no laugh rang so merrily, no song gushed out with half that melody. It was a good and True Patriot should immediately engage in beautiful.' There was no voice in all the village thing to look upon her, so calm, so holy, was her innocence. The boys in the street stopped their plays when she passed to gaze at her; and the ENLIST! beggar valued her alms not as much as the smile that accompanied them. Many an eye was turn-

her voice.

"But a change came. I need not tell you of the wiles of the destroyer. You are city men, and you have read the daily records of the weakness of the human heart. That fair girl, who, in her purity had never dreamed of danger, for that very reason fell. How changed that home was, you may imagine. No more glad hours, nor joyous songs, nor golden hopes. Will, was not that enough to change a brother's love, if your creed be true? And did it change? No, no! His morning kiss was convulsively pressed your creed be true: And did it change: 100, no! His morning kiss was convulsively pressed to her cheek and his evening embrace was more passionate than ever before; and that was all the

evidence of change. "Shall I go on?" said S—. There was no answer, but a big tear stood on the cheek of a forester who was sitting with his elbows on his knees and his chin between his hands.

'Let me pass over a space of time to a very different scene. In the criminal court of H——, a young and lovely female was arraigned for the murder of her own infant. Her brother stood beside her in the prisoner's box. It was a fearful scene; the immense crowd were hushed in deathlike stillness as the question was put. 'Guilty, or not guilty?' and one loud sob burst from the vast assembly as a low, broken voice answered 'guilty!' She was taken to the prison, and the sentence of death recorded. I have often pictured that prison scene. Her brother was not with her there, nor had she seen him since the day of her trial. Don't think he deserted her, Will. You shall hear where he was. But is that lonely cell what were the thoughts of that lone girl? There is, to the condemned prisoner, a certain undefined looking for something fearful and terrible.

His history is an interesting one. He is young and twealthy, a graduate of Yale, and a man of decided taient. But few know why he has seculded himself up here in woods, for he is not, like the most of us, a mere temporary resident:

'Did you expect a letter from home, Jake the property of penitence and faith.'

'I'm surprised, S—. You never hinted to me before that you ever had a sister. I should like to know about her.'

'Not now, J—. Some other time I'll tell you other, said S—, and dropped his head again, which he had raised on his elbow. A silence ensued through the cabin, interrupted only by the clicking of the rifle locks, as their owners tried them in the places.

Will broke the silence. I should like to know some good ground to change my opinion of brothers' love for siters. Who ever knew an instance of a sacrifice made on either side of such afterior?

'I'll tell you a story,' said S—, again raising its head upon his clhow, and easting his fine eyes about the cabin. And straightway all prepared to hear one of his tales, which were never unwel-come. After a momentary pause he began.

Annexation of the West Indies -- Designs of the South.

No intelligent man who has watched the course of events in this cauntry for the last few years, can fail to perceive that the institution of Southern Slavery has been for a long time advancing, sometimes stealthing, but always steadily, to the control of our Government. Since the Washingtons, and Jeffersons, and Henry have passed of the stage, the one solitary ment. Since the Washingtons, and Jeffersons, and Henrys, have passed off the stage, the one solitary idea which has guided the politicians of the South-Carolina school has been the extension and perpetuation of Slavery. To this one idea has all the tact, and all the talent of the South been zealously directed. To strengthen the 'peculiar institution,' and make it perpetual, the other interests of the country have been overlooked or sacrificed as would best

ed. To strengthen the peculiar institution, and make it perpetual, the other interests of the country have been overlooked or sacrificed; as would best suit the MoDuffies and Hammonds of the South.

To the shame and everlasting disgrace of the North be it spoken, the sons of the Pilgrims have not only not resisted the encroachments of Slavery, but they have never unitedly made a solitary protest against the attempts to nationalize an institution which disgraces the name of Democracy as much as it violates the rights of man. Nay, worse; the South have attail times found their most usscrupulous tools at the North. From the settlement of the Missouri question to this time, Northern politicians have been, as John Randolph said, 'dog cheap.' The bounty of treason has never been offered without finding a traitor to take it. The die is at length cast. Northern traitors and dough-faces are searcely necessary to the further and dough-faces are searcely necessary to the further prosecution of the Southern policy. The annexation of Texas has given the sceptre into the hands of the slave power. With a majority of two States at this moment, and an indefinite number in embryo, the advocates of the eternity of Slavery may well feel that their power is safe. They no longer need to anological states and their power is safe. their power is safe. They no longer need to apologize for Slavery, or seek to cloak their designs under pretences as filmsy as they are false and hypocriti-

Men may no longer talk of Slavery as an evil of which the country may sometime hope to be rid. (It is the very corner-stone of every well-constructed Republican edifice.) True Courage.

The Poetical epistle on Peace which appeared ond the first page of our last paper, was written at The time of the greatest excitement in the last war with Great Britein, and when the war spirit was at its highest point. It required some moral c urage to advocate pacific principles at that day, when the whole civilized world was in arms. We are now we trust approaching a time when peace will not only be the policy but the governing principle of all civilized nations.

He spake freely of the impolicy and the injustice of the mother country towards the Colonies. He commenced his patriotic course before the war with his cold steel, as a mouthing, murdering sor began, but he did not cease with the breaking out of hostilities. He plead for America; he exposed the Administration; he denounced their measures as infamous, while the war was in progress .-When opposing the administration, he employed language like this: 'Sir, I rejuce that America bas resisted, three millions of people so dead to all feelings of liberty, as voluntarily to submit to be slaves, would be fit instruments to make slaves of all the rest.' 'The Americans have slaves of all the rest. The Americans have been wronged; they have been driven to madness by injustice. If I were an American, as I am an Englishman, while a foreign truop was landed in my country, I never would lay down my arms -NEVER, NEVER, NEVER! I solemnly call upon your lordships, and upon every order of men in he state, to stamp upon this infamous procedure he indelible stigma of public abhorrence.' Such was the language of the friends of liberty on the floor of Parliament; and that body, even under that tyrannic administration, had not the hardihood to attempt to suppress it. The last act of his life was an effort in behalf of the Colonies.— The opposition in Parliament have always spoken with freedom in peace and in war. English liberty. Pitt, and Barre, and Burke, and all the dealers of the opposition, even at that day, were too enlightened, had too ardent a love of liberty, to subscribe to the degrading and cowurdly sentiment which we hear proclaimed upon this floor, in the half of an American Congress.

The Pen.

Dickens, in his Daily News, ruus a parallel between Capt. Pen and Capt. Sword. He has no fondness for the bellowing, brutulizing reasoning of forty-two pounders, and condemns Capt. Sword, of a fellow.

Capt Pen, of the goose-quill batallion, is a chap of a different stamp. His recruits are of the closet, the counting house and the counter; they have no taking look, and no fife and drum music to announce their coming and going. Neither do they glitter brightly in the sun; but quietly and drudgingly manævering upon paper, with no belching of cannon, no showers of murderous shot, no human blood flowing from a thousand human creatures, no blaspheming in the death agony-pour out words, words, words, that they may sink them into the souls of men. This array of soldiery may seem to the gun-powder mind a poor and shabby squad; but Dickens holds them to be the best every way, cheaper, better, safer.

He thinks Capt. Pen to be altogether a noble

fellow than Capi. Sword, and that Capt. Pen's regiment is sure, in the end, to whip Capt Who does not wish and pray Sword's regiment. that all our difficulties might be settled by ink instead of steel !- True American.

Danvers and Georgetown Railroad Mr. Editor-In March last the old board of D.

project. The professed object of the measure was no preserve the charter so that they might construct the road from Danvers to Georgetown, and the high reputation of the new board for skill and the high reputation of the new board for skill and the high reputation of the reason to enterprise in Railroad matters, gave good reason to enterprise in Railroad matters, gave good reason to expect that before this time we should have seen them actively employed in grading the Road, but we have not been able to discover a sign of any progress in this business, though the time expires and if they ever intend to make progress in this business, ever intend to make the Road it is high time to begin. As the wide, Road it is high time to begin the walden Road is aid aside for the present, the Director are thereby relieved from a heavy job which her must be and they must be a side of the control of expected to have to do, and they must be much more at leisure than they expected to be, construction of the Georgetown Road would afford hem a fine chance to employ their lessure and hem a line chance to chapter and their favorite business display, their skill in this their layorite business, and I hope they will do themselves the honor to proceed at once to make this very useful honor and they will then have it to piece out the Malden Road from South Danvers to Salem, if they should again want it for that purpose next year and it will very much reconcile me (and 1 doubt and others of the old hoard) to the misfortune of heing turned out of office. Will the Directors please to inform us what they intend to do about his business. I believe the Directors have no knowledge o

[Reported for the Boston Daily Advertiser,]

Before Charles L. Woodbury, U. S. Com. issioner, on Monday, the examination in the case of Charles J and John F. Lovett, master and mate of the brig Malaga, accused of aiding and abetting in the slave trade, was resumed and finished. T ressel sailed from a port of Massachusetts for Ri Janeiro, and was there chartered for a voyage, Cabenda and St. Thomas, on the coast of Africa There was some evidence that the charterer Rio Janeiro had been engaged in the slave trade and also that one of the freighters had been engaged in the same traffic as an agent of the char erer. It also appeared that the cargo was of such a description as might have been used in the slave-trade, as well as in lawtul traffic on the coast; but, after a minute and searching examination, no evidence was elicited, that the muster or mate or any of the crew had any knowledge that the vessel or merchandise was intended for the slave trade, or that they knew of the charterer's having been engaged in that traffic. The respondents were accordingly discharged.

NEW HAVEN AND BOSTON RAILROAD BIRG VETORD. By the annexed letter from a correspondent, written it New Haven, it will be seen that Gov. Toucey has returned the bill with his veto.-Jour. of Cont. NEW HAVEN, June 16, 1846.

The Boston and New Haven Railroad Bill, which passed the House by 36 majority, and the Sense 12 o 9, has been vetoed by the Governor, who alleges constitutional objections to the Bridge at Middletown. Hariford influence has been brought to bear in oppoition to this Bill, at every step of its progress through both Houses, and the Voto, if not expected, has been eared-and as it now appears, not without reason. The constitutional question was ably argned in both Houses, and as the subject was entirely without the subject was without the pale of party politics, it was lecided on its merits alone. This act of the Gayernon excites much feeling and severe animadversion, alike among his own party and his political opponents; but if the Senate stands firm, the Bill is safe. If two Senators change their votes, it is lost. The Vett Message is ordered to be printed and made the order of the day in the House to-morrow (Wednesday) a half-past nine A. M. The bill is safe in the House The House has been engaged nearly all day in an inimated discussion of the case of Potter, sentenced to be hung for murder, and has refused to commune he punishment, 116 to 68. He will be executed on he 20th of July ensuing.

LATER .- We learn by passengers from New Haven that the House of Representatives vectorday f

could be persuaded to remain, the friends of the bi were confident of success.

COURTESY .- The papers say that Gen. Vega our prisoner of war, has been treated with great kindness by Gen. Taylor, and furnished with a unlimited letter of credit. He visited the St Charles hotel the other day, was introduced to the distinguished men, such as Gen. Gaines, &c., an said that he felt as if he was among friends. The recovered prisoners of Col. Thornton's commandalso state that they were treated with kindness to the Mexicans. It seems that the people on busides are capable of behaving with great kindne and courtesy. What a tremendous pity the could not have shown the same courtesy and kin ness at the time they were shooting each other mouths off, and pinning each other to the ground through the necks with bayoners! It is probab that Polk and Paredes are both gentlemen, ear of whom would put the other in his best bed, if should call to spend the night. They two har no cause for quarrel whatever. Take any other pair, one American and one Mexican, and the have no more Take two rowdies, one on each side, who love to fight for the fun of it, and they should come to blows, it would be consider by both Mexicans and Americans as no more th decently humane to part them. Why should the nations part themselves?—Chronotype.

BRUTAL ASSAULT.—An Irishman, employed on the eighth section of the Gloucester Branch Railroad, near Manchester, committed a most brutal assault with an axe, upon his wife, on Friday evening last. He struck her several times, censing severe dangerous and wounds upon her head and arm. She was taken to the Manchester Poor House, and was still alive yesterday, though soffering very severely. The man was partially intoxicated at the time; he made his escape soon afterwards and has not been seen since. We did not learn his name. This assault gave rise to the rumor, which we noticed, in our last, that a murder had been committed.—Gloucester Tel.

RUM AND MURDER.—The Worcester Transcript gives a shocking account of a murder lately per gives a shocking account of a murger lately per petrated in the neighborhood of Charlton, Mass. Isaas Moody, a negro, about 41 years old, lately from Webster or vicinity, came recently to Charlton, bringing with him a colored woman, said to be his wife. These two persons fell in company with an Englishman, named Buttersworth, an with an Englishman, named but and or unmerried man, 40 to 50 years of age, and for some twelve years a resident in Charlton and its neighborhood. They procured rum, drank freely, and, as the negro says, sometime during the night, being in the open field, some distance from any house. Buttersworth insulted his wife, upon which he made an attack upon him with a sharp stone, bruising and cutting his head, and leaving him unable to rise. When found next morning Buttersworth was dead. The back side of his head was knocked in, and the skull horribly fractured and gashed by the slone. The negro fled, but was found secreted in a swamp; examined before Justice 1. tice Brown, of Oxford, and committed to jail.

Until April 1842, when GEORGE W. SIMMONS ook the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established customs of trade Until this time, men had gone on their old plodding way giving long credits, demanding as a recompense for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling annoucement was heard, emanating from "OAK HALL,"

LARGE SALES AND SMALL PROFITS This annoucement awoke the dreaming thousands Old men arose from their recumbent position, rubbed heir heavy eye lids, stretched their cramped and benumbed limbs; young men congregated on the corners of the streets and looked unutterable things—guesses and surprises were rife,—when straight all began to cry "Mad Dog." Still on I went, unawed by threats ronage.

MUTUAL LIFE INSURANCE.

The subscriber has been appointed agent for Danvers and vicinity, of the New England Mutual Life Insurance Company. This Company is formed upon the surest foundation. Its rates are based upon the latest an best observations of the decrements of life, according to an experience of the oldest of the English Company.

It is the most carefully managed of any of the kind in the country and has been thus far remarkably successful.

Since commencing, February 1st, 1844, to April 1st, 1846, has issued 636 policies.

The amounts from 200 to \$10,000 each.

Net fund accumulated (owing to the favorable turn of the risks thus far) \$89,500 hesides gnarantee capital.

Surplus to be refunded to members at the end of every five years from December, 1843.

Directors—Willard Phillips. Rohert Hooper, William Parsons, Gharles P. Curtis, Francis C. Lowell, James Read, George W. Kulun, William W. Stone, R. B. Forbes, Peter Wainwright, Thomas A. Dexter, Otis Tufts.

President—Willard Phillips. Secty—Jonathan Amory. A person in his thirtieth year, in order to secure one hundred dollars to his family at his decease, pays annually, during his life, \$2.28; or he pays \$22.80 to insure \$1000.

Any one in the 24th year of his age, who needs a credit of \$500 for three years, to begin business, where the only obstacle to his obtaining the credit is the uncertainty of life, may obtain the same by paying annually, for that period, \$5.15. Or if he needs \$5,000, he gets the credit by paying annually, 51.50.

A creditor may frequently give himse, fadditional security for his debt by insuring his debtor's life.

One, while he is solvent, may secure a provision for his family on his decease, though he may die insolvent.

Life insurance is better appreciated by the community, with every day, and it cannot be long before its henefits will be as generally acknowledged as those of fire insurance are nuw.

Blank forms of application, tables of rates, and any additional faceurity of the paying annually acknowledged as those of fire

DANDELION AND TOMATO PANACEA,

PANACEA,

THE Proprietor would not claim for it, that it is a specific for ALL the diseases to which the human rame is subject: but does claim that in all complaints where a purifier of the Blood is required that this Panacea is inshible, and its powers are admitted by all who have used it, and it has the sanction of our first Physicians.

He would ask for it only, that meed to which the public may deem it entitled—and would prefer that its beneficial results he its suberecommendation, and the relief and health which must accrue to the diseased and suffering from its use should proclaim its virtues.

For any of the following complaints, the Daudelion and Tomato Panacea, is the best remedy that has yet been oftered, and no article has given such universal satisfaction.

CERTIFICATES.

From Dr. Coffia, Lynn.

I have recommended the Trusses made by James Frederick Foster, of Boston, in a great many instances for these few years past, and it is due to him to declare that, in every instance that has come to my knowledge, his work has given complete satisfaction.

EDWARD L. COFFIN, M. D.

Foster, of Boston.

From Dr. Collamore, Pembroke.

Mr. James F. Foster having for many years given his attention to the inanafacture of Trusses, and fitting them to the particular classes of individuals who call on him, and having firmished for more than three hundred persons, in Plymouth county, is hereby recommended to all who need Trusses, Supporters, &c., as ingenious in contrivance, and skilful in adapting them to all variety of cases that occur; and is believed to have given general satisfaction to all who have employed him

ANTHONY COLLAMORE, M. D.

From Dr. Gordon, Plymouth.

Mr. James F. Foster, manufacturer of Trusses, Boston.

Mass., from what I have seen of his Trusses, and from the circumstance of his having supplied several thousand persons in Massachusetts, and other parts of the country, with an article that I think is well calculated to the design of the inventor. I have no hesitation in recommending his of the inventor, I have no hesitation in recommending his Truss to the public; and I believe him to possess, the a bility of adapting Trusses to any case that may be presented to him.

T. GORDON, M. D. From Dr. Greene, Boston.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James F. Føster, and he has uniformly given full satisfaction in tneir application.

The benefit of such instruments is often lost, in consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted.

THE FRIEND OF OUR DARKER DAYS.

Two said, when the world was fresh and young.
That the frieads of earth were few;
And shrines have idazed and harps have rang.
For the hearts whose love was true.
And so, when the herawing tracks of Time.
Lie deep on the old earth's hrow,
The faith so prized in her early prime,
Shall we hope to find it now?

It may be found—like the aloe's bloom—
In the depth of Western wonds,
To which a bandred springs may come
Yet wake not its starry holds:
But if, hrough the mists of wintry skies,
It shines on life's weary ways,
What star in the summer heavens will riso
Like that friend of our darker days? It may be found -like the aloe's bloum-

We know there are hands and smiles to greet We know there are hands and smiles to greet
Our steps in the sammer fair—
But lone are the rlimber's weary feet
Where the steep lies bleek and bare;
For some have gained far heights and streams
To their sight with morning crowned—
But the sunrise shed on their heart's first dreams
And its light they never found!

Yet, oh for the bright isles seen afor,
When our suls were first naforded—
And the glance that once was the guiding star
Of our green unwithering world!
And oh, for the voice that spake in love

Ere we heard the cald earth's praise;
One goard in our promised mont, to prove
Like the friend of our dacker days!

Alas I we have missed pure gents that by Where the reak seemed stern and cold; And our search latt found but the hidden clay Where we dreamt of pure bright gold. And dark is the night of changing years That fells an the trust of youth, Till the thorus grow up and the tangled tares for the stronghold of 41s truth.

The shrines of our household gods, perchance, The shrings of our miserious waite;
We have seen their brightness waite;
And the love which the heart can give but once
It may be given in valu;
But still from the graves of wishes young,
From the depths of Memory's maze.
One blessing springs to the heart and tongue
For the friend of our darker days.

But she dared not trust herself to speak nor let her are most not trust herself to speak, nor let her eye meet his. She did not wish to utter a harsh or repulsive word, nor was she willing to speak kindly to him, for she did not feel kindly—and kind words and affected cheerfulness, she had already found, but encouraged him in his evil ways. And so she continued to ply her needle, without appearing to regard his presence. Her husband did not make another effort to induce her to suspend her labors ; for under existing circumstances, he was particularly desirous of not provoking her to use towards him the language of rebuke and censure. After sitting silent for perhaps half an hour, he rose from his chair, and walked three or four times buckwards and forwards across the room, preparatory to going out to see a cuffee toose, and there spend the rest of his evening, as has wife supposed. But much to her surprise ha refired to their chamber, in the adjaining room. While still under the expectation of seeing him return, his hand breathing caught her quick ear. He was asleen!

The Value of Grasses. The product of our grass land is not only far beyond that of any other crop in the United States, but is probably greater than all other crops combined, as they are taken from the field. This is not true with certain parts of the Union, as in portions of the South, where conton, rice, sugar or other leading acticles are cultivated; nor with such as are in the neighborood of large markets, where fruits and vegetables are in steady demand at high prices But throughout the States generally, we do not doubt that the aggregate of the production of grass is far beyond that of all other raw products combined; for it-must be remembered that grain and rice, after harvesting, must be threshed and cleaned at an expense of several cours per bushel; conton must be carefully picked and cleaned, and then baled; sugar and tobacto must be manufactured before they are ready for market; all of which expenses should first be definited before placing them on a par with grass Poor Mrs. Jarvis prused; dreading to utter her which is always marketable in the field, either by menals which consume it, or as hay. If we consider farther that nearly every one of the other products is raised by long continued, expensive laborious efforts, both of near and beast, we largely enhance the comparative value of the grasses, as they are thus secured in all their value and inoportance at a much cheaper rate than other

podactions. Another and highly important advantage they to day. passess over other crops is, they slightly impover-ish sail in any instance, while in many, they tend at the poor woman! if you don't stop this pestering me for money every whip-stich, I won't give

Our Alms House.

We were much gratified at a recent visit to this establishment to find every thing about it in such perfect order, the rooms so neat and comfortable, the cooking so excellent and the inmates so apparently contented and happy. . We were especially pleased with the more domestic arrangememts of the house, which are conducted in clockwork regularity with every convenience for economy of material and labor. Besides the common convenience of pure, soft water, there is an ice house connected with the establishment which, has proved to be a great saving to the town by the preservation of provisions as well as a great convenience in the dairy room. We found in the last named room some of the finest looking butter, and in the store room some of the best of bread, such as is not always seen in private famiher. In the cooking department the object seems to have been gained of making of a plain material the most palatable and nutritive food.

We also visited the hospital for the insane, which is a separate building and at present has four inmates who are treated with every kindness and only subjected to just so much restraint as is necessary for their own safety and comfort. In the sitting room in the basement usually called the Senate room of the establishment we found several venerable individuals engaged in picking oakum. We noticed a considerable number of well thumbed books in this room, which appeared to have occupied the leisure moments of the aged inmates. One of these 'conscript fathers' had a series of Almanacs saved for many years, commencing in 1804 and stitched together, making a very thick volume. In this he had pasted various extracts from newspapers making a scrap book in which he preserved such pieces as possessed any interest when he met them in the course of his reading. We also saw in the wing of the building appropriated to the females, a venerable lady who had six weeks since completed her century, being 100 years old on the 16th of May last. She is nearly blind, but in other respects retains her faculties in a remarkable degree. She converses with animation, is prompt in her replies and in matter pertaining to her pecuniary interests manifests much shrewdness. She has been an inmate of the establishment but a few weeks and expresses herself highly pleased with her new situation and those who have the care of the house.

She remembers the "Concord Fight" and saw President Washington on his tour through New England, both at Salem and Boston. She has had two husbands although she has never had certain accounts of the death of either of them. The first, whose name was Crispin was a privateersman in the Revolutionary war and was supposed to have perished at Santa Cruz. On account of his services she now enjoys a pension from government of six dollars per month. Her second husband's name was Hardwick and although he has been missing for seventy years she says she don't know but he is alive yet. Mrs Hardwick's maiden name was Maulton and she says she was born in "Devils Dishful" where she formerly kept a grog shop. As we before intimated, although she expresses herself to be tired of the world and most willing to leave it, she clings to meney with a miser's grasp. Nothing is more commoning our daily experience than to see instances of persons growing sordid and miserly as they advance in age and wrap themselves up in a cold selfishness as if their posession of property involved no obligation to bear the burdens of those who have less of the good things of this life. We Fitchburg, in this State, at Providence, R. I., at School Report for the town of Danvers, for 1845professed believers in Christianity with the plain precepts of its great Author.

We cannot close this hasty notice of our visit to this establishment without congratulating the town on the fortunate selection of its superintendent. It is to the constant care and attention of Mr. and Mrs HATHAWAY that the establishment is made so comfortable to its inmates and so crediiable to the town. We wish our people would visit the place and judge for themselves. Here they may learn some useful lessons of humility and charity. They may learn contentment and be grateful for their ewn blessings by comparing their condition with these unfortunates, and they may witness cases of profound gratitude in a humble lot which put to shame the repinings of the prosperous but unthankful citizen.

The house now contains about 65 inmates whose infirm and feeble condition present strong claims on their townsmen. They are well provided for and ought to feel no false pride at living in such a poor house. Their lodging and fare is befter than that of many out of it and they pay no taxes. We again express the wish that our people may visit the place and would suggest that if our religious societies or any other bodies should have their pic-nic parties this season that here they may be well accomodated and at the same time contribute from their fragments some little luxuries for the gratification of the poor.

Tax Payers in Danvers.

We present below, as we proposed in our last paper, a list of those of our citizens whose town and county taxes are over fifty and less than a hundred dollars. It will be understood that the is Nathaniel Hawthorne, so favorably known in amount of taxes annexed to each name in this list and also to that published last week, does not periodicals of the day. The work consists maininclude the highway tax (which is payable in labor) ly of articles which have thus appeared before the or the School tax in District No. 1 or No. 11. public and which are now gathered and presented Many of them are also taxed for property in other towns.

To those who may notice an inequality in the amount assessed on different individuals, it may he well to remark that real estate holders are more likely to be taxed high than owners of personal estate, as the latter is regarded as of more uncertain value and is capable of concealment from the knowledge of the assessors. The holders of real estate too are liable to be taxed for it if it is mortgaged, just as if it was unencumbered.

We can see no real objection to publishing these lists as it is the right of every citizen to know the comparative share he has in supporting the public burdens. It may also be beneficial, as a knowl edge of the assessment of taxes will tend to pro duce a greater approach to equality in future years We can hardly conceive who would be likely to make objections to this publicity except those who are conscious that they do not bear their just proportion of the public expenses and consequently fear an open comparison of their assessments with those of their neighbors.

Mosses from an Old Manse.

The above is the title of a work just published by Messrs Wiley & Putnam, as one of the series of their Library of American books. Its author the literary world as a contributor to the higher the pleasing volumes of "Twice told Tales," by the same author, and been charmed with those beautiful sketches and imaginative tales, will hail with delight the advent of these "Mosses from an old Manse." They will find here the same bright fancy, the same pure old English diction, the deep and tender emotion, the beautiful simplicity and gentle breathings of a genuine spirit of philanthropy, that so strongly mark all Mr. Hawthorne's writings. Some matter-of-fact people have sometimes

complained that our author does not go far enough, does not inform the reader of the precise fate of his heroes, or the exact finale of the plot. To us, this exciting of the curiosity and leaving something to the imagination of the reader, something is high time that the views of our citizens were for him to think about, is the chief charm of the story. Washington Irving has done this in his pleasing sketch of the Stout Gentleman, although not with the skill and success of Mr. Hawthorne. In the Vision of the Fountain, in Twice told Tales, how pleasingly provoked we were at the disappointment caused by the extinguishment of the tan embers which had given us such an evanescent glimpse of the lovely apparition. And that thrilling story of David Swan, which tells of things that almost happen to us. How much of deep thought are we compelled to exercise as we reflect on the influence of slight causes and small events on our future destiny. How we long to 73 50 pass the threshold of Wakefield's house, if it were only from curiosity, to witness the strange meeting of this odd being with his widowed spouse We might instance other similar agreeable surprises to the reader, in some of the articles in the present work but we prefer to leave them to his enjoyment on their perusal. He will find much that is truly original and much that is usefully suggestive. He will find bold and manly thoughts clothed in the simplest language, such as Addison and Steele would love to read. He will find per-61 98 haps in some of the pieces, old acquaintances, such as he will be glad to meet again, or if he has never met them, he will have the privilege of a first interview.

While we look through these volumes and find treasures both new and old, we have to regret the absence of many "gems of purest ray serene" which ought to have had a place in the same 191 50 casket. Not the least attractive story thus omitted, if we take into account the pleasant impression left on the mind of the reader, is that simple 50 40 narative of the widowed sisters whose partners 59 10 had been mourned as lost, but who were so mysteriously and opportunely restored to their arms almost at the same moment. We have forgotter the title of this and many others, which have left a most pleasing impression on our memory and produced a hankering desire to make more indellible by a new perusal. We hope the author will gather more of his productions and give the public another volume or two.

> We regret however, to see the declaration in the conclusion of the Old Manse, that it is his purpose to make no farther collection of his fugitive pieces, and only wish that he may in his sober second thought be induced to alter his purpose.

We have room but for one more extract from this valuable report, which is upon the apprepriations for, and condition of, our schools.

Are our schools advancing in proportion to the increased appropriations for their support? Withpublic and which are now gathered and presented in a few years these appropriations have indeed the free. Not a jot of principle do we give in a more attractive form. Although this appropriation is not so large per scholar as in many other towns the Republic, while glutting its infernal lust. whose ability does not exceed that of the town of Danvers, still it seems to be ample, so long as our present district arrangement shall continue. For a long time, the want of better schools than we have ever had, has been experienced in the villages of our town. This has probably arisen from ur system of employment of teachers, that gives them no confidence in a spermanency of employment, and but an inadequate compensation for a permanent support. Surely a man worthy to take care of one of our principal schools through the year, should have a compensation of \$500 at least, and an assurance of continuance so long as they are discharged in a satisfactory manner. It properly awake to the importance of having schools in which our sons and daughters can be taught all those branches necessary to be learned to qualify them for the ordinary duties of society In a word, to quality them to be competent teachers in our public schools. There can be no question that it is the duty of the towns to furnish some schools of such a character, as will enable our children to pursue all those studies necessary for the completion of their education, so that they may not be under the necessity of leaving town for this purpose. To us it has ever seemed strange, that those who have the power to regulate these matters should be so heedless in regard to them. We would not advocate extravagant expenditures in any branch; but for educational purposes, we believe liberal appropriations carefully expended will ever be found wise economy.

> Accidents. We understand that a man by the name or Stevens was knocked down by the mornng train on Wednesday, on the Railroad bridge, between Salem and Beverly. He was crossing the draw bridge, where the passage is narrowest, moving in the same direction with the train, and was knocked down, but not seriously injured-escaping with some slight bruises. People who will walk on Railroad tracks should be cautious how they suffer themselves to be caught in such a perilous position as a narrow draw bridge, when trains are approaching.

The Salem Artillery.

We learn from the Salem Register, that this valiant and patriotic corps was at New Orleans mong his people-not only so, it claimed to step on its way to the seat of war, on the 13th inst. We have accounts from Michigan, one day later, by which it appears that the company was in that State, probably en route for 54, 40. It will be understood that it is the company that is thus rapidly moving about the country, and not the memers who are all at home quietly watching the movements of their favorite corps. Major Ringgold's Flying Artillery is not to be compared with this corps for resolve and celerity of movement. It is an even match in a race, with Peter Rugg or the Flying Dutchman.

We have denounced unsparingly the annexation of Cexas, as a boldly flagitious scheme, and a war with Mexico as kindred with that disgraceful and degrading act-degrading alike to the Government that consummated, and the people that submitted to it.

The one is perfected; Texas, unfortunately, is a art of our Union .- The other is just begun. That the war with Mexico might easily have been avoided —that the commonest regard for justice, and a mod-erate share of prudence, on the part of the Governnent, could have prevented it-is palpable as the

But though this be so, we cannot change the fact. War exists. It has been declared by a Government chosen by the people themselves. We submit, therefore, as good citizens, to the law of the land, and give ready to answer any charges any individual c that government our support. Resistance to it now would be rebellion; if general, anarchy, in its worst form, would be result.

Congress, as well as the country, is of this opinion. The Whigs, predicting the result long ago have steadily opposed the policy that led to this war; yet, when it is forced upon them, and hostilities avowed. they rallied as one man in support of the government The preamble to the resolutions in Congress, declaring that war exists by the act of Mexico, is a lie—a nefarious trap set by demagogues to catch their opponent. As such, we do denounce it; but, making this protest, we should have done as the Whigs did -have voted whatever supplies of men and money were asked for, holding the President responsible before the country and the world.

Our opinion is, that the war, so unjustly and wickedly began, should be pressed with vigor, Clouds and darkness, in consequence, rest upon our path in the future; but it has to be trod. We act upon this

But in taking this step, we shall neither shut, eyes to a vile and wicked policy, nor close our li-against the mercenary spirit which has involved the country in the horrors of war. With our harness of we feel, indeed, a more unconquerable determination we feel, indeed, a more unconquerant determination to resist the giant cause of all this mischief; a strong er will than ever to overturn a corrupt dynasty, elect as rulers, freemen who will not stand by an and which, unless shaken off for ever, will desire

THE BULWARK OF SLAVERY.

JOHN P. HALE made a speech in the New Hamp shire House of Representatives last week, which the Statesman gives the following sketch The subject under discussion was the preamble and resolution in relation to Slavery, offered b Mr. Low of Dover.

It seems strange, indeed, to hear such sentiment boldly expressed by a Senator elect, representing a majority of the people of New Hampshire—here tofore the very Bulwark of Slavery: The question had been asked, what has the North

to do with slavery? He would ask what had the North to do with liberty? The time had come, he warned the House and the country, when the voice of the people of the North on the great question human liberty, can be no longer suppressed. change had come over the spirit of our dream, at how had it been effected. He sound an answer-n from the Whig party, not from the Abolution part nor yet did the definition come from the traitor Hale He found it in the State journal-(Corroll's Patriot The reason here given is that the result may be a ributed to the clergy-to their public ministration and fireside teachings. and fireside teachings. He stood for himself, and he desi ed to say that if we take into consideration the office of the war now raging, and the causes which had I o it, he hesitated not to say, that it was without pa allel in the annals of infamy. He wished no man misunderstand him. He was willing to take the ettire responsibility of asserting that it was unparallel in the annals of infamy. He was aware that he was subject to the charge of changing his views; he ac nitted it, he was open to conviction. If any one ha ight to shed upon this dark subject, his bosom shou be open to its influence.

He hoped he should change yet more. We ha work upon these elements of evil and bring good from out the chaos. SPRING MEDICINE. DR TOWNSEND'S COMPOUND

Extract Sarsaparilla. THIS Extract is put up in quart bottles—it is six times cheaper, pleasanter, and warranted superior to any sold. It cures disease without vomiting, purging, sickening or debilirating the patient, and is particularly adapted for a SPRING MEDICINE.

The great variety and superiority of this sarsapa-rilla over all other remedies is, while it eradicates disease, it invigorates the body.

It is used successfully in the removal and permanent

cure of all diseases arising from an impure state of the bland, or habit of the system. S. PROCTOR, Agent for Danvers. H. J. PRATT, Druggist, sole Agent for Salem. may 10

But to descend from this high state of metaphor.

Until April 1842, when GEORGE W. SIMMONS ook the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established customs of trade.

Until this time, men had gone on their old plodding way giving long credits, demanding as a recompense

Way giving long credits, demanding as a recompense For the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling announcement was heard, emanating from "OAK HALL,"

LARGE SALES AND SMALL PROFITS This annoucement awoke the dreaming thousands Old men arose from their recumbent position, rubbed heir heavy eye-lids, stretched their cramped and benambed limbs; young men congregated on the corners if the streets and looked unutterable things-guesses and surprises were rife,—when straight all began to rry "Mad Dog." Still on I went, unawed by threats, aur cajoled by flattery, until finally I have laid fast and strong, a pinnacle stone as lasting and durable as the hills. To prove the advantage of the CASH SYSTEM

over all others, needs no lengthy tale. It must be aprent to the most casual observer, that while it shields the vener from the ruinous losses often attendant upon the crediesystem, it protects the purchaser from the rually rutnous profits demanded by merchants to cover bad deby created by a system of long credits. To those, therefore, who can command the READY CASH,

this Establishment offers the strongest inducements. The Stock being purchased fresh this Spring, at auction, and direct from the manufacturers, at some 25 per cent less than the cost of importation, and being stisfied with small profits, will sell at a slight advance upon auction prices.

And I would respectfully invite the attention of the citizens of Boston and vicinity to my unusual RICH DISPLAY AND NEW DESIGNS OF

ANTHONY COLLAMORE, M. D.

From Dr. Gordon, Plymouth.

Mr. James F. Foster, manufacturer of Trusses, Boston. Mass., from what I have seen of his Trusses, and from the circumstance of his having supplied several thousand persons in Massachusetts, and other parts of the country, with an article that I think is well calculated to the design of the inventor, I have no hesitation in recommending his Truss to the public; and I believe him to possess, the ability of adapting Trusses to any case that may be presented to him.

T. GORDON, M. D. sented to him. From Dr. Greene, Boston.

From Dr. Greene, Busion.

I have sent many patients to be fitted with Trusses and Addominal Supporters, by James F. Foster, and he has uniformly given full satisfaction in their application.

The benefit of such instruments is often lost, in consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted.

H. B. C. GREENE, M. D.

That Chemical Laboratory on which the life of every human being depends, is partly walled in by a more membrane or curtain of very delicate texture. The smallest rent in this curtain, on account of the great pressure upon it, leads to the most troublesome and serious consequences.

It, leads to the most troubles and the services.

But art has contrived appliances by which either nature is enabled to sew up her torn curtain, which she generally does in a short time, or all the serious consequences of her failing to do so are prevented.

For an excellent workman in this department of art, see the advertisement of James Frederick Foster in another column. We have been through Mr. Foster,s establishment, seen his voluminous correspondence with all parts of the country, and know him to be gifted with true Yan kee ingenuity which always places itself and keeps at the head of any art to which it is devoted.

FOR THE COURIER.

MACHINE POETRY.

Long ago, in the old Revolution, When American hearts were all one, They resolved to erase the pollution That Old England had stamped on her son.

Though our stars were enshrouded in sadness, And eclipsed was the disk of our sun, Through Yankee-blood revelled in mudness, Their battles were well spiced with fun.

One day, afar off on the Ocean, Was seen nearing, a ship called "The Brag," Which put all on the shore in commotion, For they saw the red cross on her flag.

The card of her gallant Commander Came ashore, while a truce he did borrow, With, "My kindest regards, Gen. Lander, Sir, I'll breakfast with you on the morrow."

The Yankee acknowledged the kindness But observed, "He's already too nigh, He thinks to make game of my blindness." So he sent this sarcastic reply,

"Dear Sir, your kind ruse is a bubble, And I guess if you come within shot I will try Sir, to save you some trouble, By sending it out to you, HOT."

LOVE.

BY H. M. KLAPP. We know it hath a bitter nurse,
And oft a wayward wing,
We know it breedeth oft to curse,
And fleeth aye to sting;
We know, alas! that love on earth
Is frailer than the hreath
We know it hath a lightning birth. We know it hath a lightning birth, And oft a ling'ring death.

We know that oft it closer cliags We know that oft it closer clings
The darker fate may lower,
We know that when it silent springs
It oft hath deepest power;
We know it seeks an humble lot,
We know it chaineth kings,
It sigheth oft and speaketh not
It laggeth while it wings.

We know it is the voice of God-We know it is the voice of God-Within the constant breast,—
It seems to linger round the sod Where all of earth may rest:
It only seems—it lives above—
It waits beyond the sky,
For death is but the pass to love,
To love that ne'er can die.

Oh! if the earth is beautiful With all its taint of woe, And if the soul can find a joy, And it the soul can find a joy,
A fleeting joy below,
What bliss they know in worlds above
To whom 'tis freely giv'n,
The all of earth that's beautiful
Conjoined with all of heav'n!

HYMN.

BY CALEE CUSHING. We praise thee, God, when morning's ray In orient skies begins to shine, And once again returning day Wakes on this glorious world of thine.

We praise thee, God, whose mighty hand, we praise thee, God, whose mighty hat Supreme in love, supreme in power, Rolls on the sun from land to land, To light and glad each fleeting hour.

We praise thee. God, at evening tide,
With all the starry hosts on high,
Which beam, as if thy throne beside,
To hymn thy greatness through the sky.

At morn, at nosn, at eve, we praise,
Thy might and grace on bended knee,
And hearts of grateful joy still raise,
Creator, Saviour, God, to thee.

Then we went into the little garden and sat awhile on the beautiful piazza then explored the chambers, and looked at this then explored the chambers, and tools of the prospect and that, the baby everywhere accompanying us in his father's arms. Every thing was nying us in his father's arms. Then we in keeping which I saw, at least. Then we walked out to take a bird's eye view of the village walked out to take a bird's eye view of the village from a hill hard by. Every thing pleased me.—
'So then Mary does finely, after all,' I reflected, after retiring to rest; 'I knew she would; how beautiful it is to see two young people begin life together. How fresh is every thing. Yes, and how new and clean, and how easy to keep clean; my mind unceremoniously wandering from the romance of a young wedded couple to the difficulty of keeping an old house clean.

I had not been there many days before I began to suspect, then to feat, that Mary was not so happy as she had at first seemed, or as happy as she ought to be, with so much about her to make hap-

One day Mary promised us an apple dumpling in her way, with potatoes in the flour. It was an especial favorite of ours, her husband and myself. 'Your pudding, Mary,' I suggested, taking advantage of our friendship, as we sat together in the forenoon. 'Yes, I know it, I am just going.'—Then she began to tell a story, then placed a plate of cake before me—then—she was doing nothing; there lay the baby frolicking on the floor. 'The cardinar Mary's I said to proceed it will not be pudding, Mary, I said to myself, it will not be done; then what will Mr. B—— say? Ah! I well knew what husbands sometimes thought and said at a half cooked dinner. 'The pudding'-was nearly ejaculating a third time, when Mary concut it; large a slice lay on the plate; but alas! the crust inside was still dough! We took it in silence. 'You did not ?' Not I! I have not seen an apple since the evening I purchased them.

A slight cloud passed over the countenance of

my wife. She was troubled. The loss of the apple was in itself nothing; but we had carefully instructed our children not to appropriate to their use any article whatever of family consumption, without permission; and as permission, when the demand was at all reasonable, had never been

Daniel Webster.

There's a town a little South of me, about 35 miles off, in plain sight, where they 've held Courts for the County. It's the County of Grafion. They've held Courts there these 70 years. This Webster us'd to come to Court there when he was a young lawyer. They say he went to his first Court here. The lawyer on the other side was optobed to it, and Daniel got up and made a speech to the Court that made that little old house ring again. They all said—lawyers and judges and again. They all said—lawyers and judges and people—that they never heard such a speech, or any thing like it. They said he talked like a different creature from any of the rest of them, great or small, and there were men there that were not of opinion should have existed on the propriety of

Parker Noves was a great advocate himself.
You probably never heard of him in your States of Now York. He was a man that didn't wish ever to be heard of, or talked about, any where, A man of no vanity whatever. He wasn't an orator, but his talk was very powerful both to the jury and the judges. He got such credit, for can-Jury and the judges. He got such credit, for candor and honesty among the people, that the jury put as much confidence in what he said as if he had been a witness or a judge. He spoke to them more like a judge than an advocate, and he never was excited or disturbed. Zekiel webster, who was a different man, seeing Noves get up once in his calm way to address the jury in an important case, whispered to a lawyer sitting by important case, whispered to a lawyer sitting by him, 'See how undisturbed Neges is cantharides that the negro was a thief. DANVERS COURIER.

SATURDAY MORNING, JULY 4, 1846.

The Glorious Fourth of July, To-day is the seventieth Anniversary of the Declaration of the Independence of the thirteen original states, and hours before our humble sheet shall have reached our patrons many of thent will have been waked from

"Tir'd Nature's sweet restorer-balmy sleep," by the thunders of juvenile patriots, who seem ment and wages and dividends to its population. The to have caught the spirit which fired the breast of Factory is yet unfinished, but it is a splendid pile in the elder Adams and have found vent to their egg- its present state. It is 204 feet in length by 70 in fall souls by the rapturous discharge of fire-crack- width, and is sixty feet in height. It is to be enlarged ers, squibs, mimic cannons, pop-guns, etc., and by the addition of two wings of 15) feet each, makreally it may not be amiss, perhaps indeed it is ing the whole length when finished, 504 feet, Besides very fortunate that we are thus reminded of the recurrence of our National Anniversary, for while which project 100 feet, and a one story building bethe fathers seem to have "fallen asleep," the tween them which will contain the boilers, eight in children are awake and firing, and though their number. From this building the great chimney 22 fanxious mothers may not know they re out" we though not they will give good account of themselves before night, by their burnt fingers, besmeared countenances, and candy-bedaubed cheeks.

It is a source of gratification to many lovers of of our citizens are inclined to adopt a more rational method of manifesting their gratitude and mindfulness of our nation's birth, by assembling together in groups in some suitable grove and spending a few hours of recreation in the interchange of friendly, social greetings and feelings; by floral processions, of children; addresses before benevolent and other associations, etc., instead of the reedless waste of gun-powder, human gas, Tockets, and various other childish sports.

... Others there are who still think, as thousands shave before them, that in no way can we so ap- kinds of business introduced, that when one declines, propriately evince our love of country and the inestimable privileges bequeathed to us by our ancestors, as by the roar of antillery with the long catalogue of loss of life and mangled limbs, frequently attendant on the occasion of its discharge. By soul-stirring, yet tedious and bombastic orastions, or eloquent eulogiums of the principles of the Constitution, which scarcely any two individuals will expound alike. By sumptuous dinners, at the price of a week's comfortable board, and sall such can be gratified by a visit to the City of Notions.

And after all it is a matter of serious regret and unwelcome misgiving and remorse to the hearts England. of thousands that we thus attempt to express our joy and gladness as a free nation, while millions Greator and should have been born free and equal and endowed with certain inalienable rights and privileges, are debarred the same blessings, aye must find new cause oft as returns this Anniversary, to weep afresh at our national inconsistency while they are doomed to drag out a miserable existence of unjust servitude, while each crack of the taskmaster's whip and each scream of the tortured slave echoes and re-echoes-"free and equal"-"inalienable rights and privileges."

Railroad Surveys.

During this and the last week, Mr. HALL and his assistants have been busily engaged in mak- that in the most busy season of the year no steaming the necessary surveys for the location of the er would be able to run much further up than Essex Rail Road through our village. The levels have not yet been taken but it is supposed that in crossing Grove St. the road must be as high as the present railing on that street and that by the time it reaches Wallis and Central streets, the grade will be higher than the present level; to avoid deep cutting in high land between those points and the valley north of Andover street.

Father Miller is again holding forth in Boston He says the present war is the commencement of Portsmouth.

The commercial capital of the redeemed Granite It has many stately mansions, some of them retaining all of their former splender, some in faded magnificence and others in decay. The general aspect of the place is that of a stand-still or declining town and it presents the sombre and dull [appearance of a place deserted by the active and enterprising of its citizens,

As we before observed, it shows some symptoms of resuscitation, and this is seen in the erection of a noble Steam Cotton Factory, which is to give employthis there are two engine buildings two stories high, feet in diameter at its base and octagonal in form, springs and rises to 150 feet which is about the same height as the vane of the South Church in this town. From this beginning the place will probably date a new career of prosperity. One of the upper rooms is already filled with machinery which is in Addecency and order" to observe that of late, some done at home in self defence we shall lose more of this valuable class who will be entired away by our more enterprising neighbors. We are no croakers, but we cannot help feeling that we ought not to les our place go down without some effort to prevent it. It is a sad and unusual sight to see the ominous words "To LET" in the windows of our houses and chalked on our doors, and it behoves all our real estat owners and all who feel for the prosperity of the town to ask, why is it so? It is time that the employments of our people should be more varied and new dependence may be placed on another branch.

> The new steamboat Lawrence, made an experimental trip to Haverhill, yesterday. She left Central wharf at 91-2, A, M, and arrived at Haverhill at 11 1-2. She returned in the afternoon her running time in returning being one hour and thirty-three minutes, the wheels making only 18 revolutions a minute instead of 26 at which they are capable. The passage of the hoat was wit nessed with much gratification by the people a long the banks of the river, who greeted her with cheers and salutes from both shores. She is un-

By some oversight the name of one of our largest and most willing tax-payers was omitted in the list which was recently furnished us, and published on the 20th inst., we refer to BENJ. PORTER, Esq., who is assessed \$241, 26. We call on him on his visits among the people, as the loss of his tax would be seriously felt, and would hundred and seventy-three are now in service; the great contest between Gog and Mazog, which only be restored by an addition to our population and four hundred and twenty-three have resigning that could be done, water was reported in the fore-teat was reported was reported was reported was reported was reported was repor of one hundred, and sixty polls.

The Alms House,

In the article in our last paper, we omitted to State begins to show some symptoms of a revival take notice of the convenience of a pleasant room from the prostrate condition in which it has so long in this establishment used for a CHAPEL which is remained. It is, locally considered, a very pleasant, furnished with settees, where the subjects assemtown, and bears many marks of a former prosperity, ble on Sabhath afternoons to attend divine service whenever a minister can be found to supply. We were however sorry to hear that great disappointment was caused by the frequent omission of the exercises proper to the religious observance of the day. The Overseers have invited the clergymen of the town to officiate alternately and most of them have complied with their request, while others have not been punctual. It is probable that in most of the cases of omission, some particular engagements have prevented but we hope that in future there will need to be no complaint on this score and that here it may be said, as in old time, the poor have the Gospel preached unto them.

The Floral Procession.

Great exertions are making by the friends of grog. the Sunday Schools in Salem, to give an attractive and pleasing appearance to the procession which is to be formed to-day, the south side of the Salem Common, at 7 o'clock. The procession will proceed through the West gate of the Common, up Brown-st. to St. Peter's, thence to Essex as far as Washington, up Washington to Marlboro', and Federal, through Dean and Flint, down Chesnut, to Summer and Essex, to the Mechanic Hall, where addresses will be delivered by several genilemen.

Spanish Names.

The following is the English meaning of some of the Spanish names of places made famous by the recent events at the southwest.

Spanish.	English.
Corpus Christi	Body of Christ.
Santa Cruz	Holy Cross.
Rio Neuces	Nut River.
Rio Grande	Great River.
Rio Bravo	Furious River.
Rio Del Norte	North River.

The last three names are applied indiscriminate ly to one river, just as the Hudson is sometimes called the North River, and sometimes called by the name given by its European discoverer.

We have received the first number of the Essex County Constellation, printed at Newbury port, and published in Newburyport and Salem. It is edited by Mr. John S. The first will run in shallower water than any boat in New number is beautifully printed, and makes a very neat appearance.

MACADEMIZING .- We were pleased to observ on a recent visit to Salem, that the Street Commissioner had caused that portion of Boston street, usual about the same distance below Lowell. We doubt not that after a few days' travel over it, the road will become so consolidated as to prevent the water from settling in the street and forming an almost impassable slough, by cansing it to flow through its proper channels to the

Strong Water Brook. Mr. Editor-Some curiosity has been manifested to know the origin of this name which has so long been applied to the stream of water which crosses Maine St. near Gen. Sutton's store. It The schooner Dusky Sally being near, senth is well known that the Indians who formerly inhabited New England gave the name of "Strong Water" to the ardent spirits which was sold to them by the whites and it has been thought that for some reason not now understood, this stream received the name from the Aborigines. It has been conjectured by some shrewd antiquarians that on the banks of these waters the inebriate savages once held their orgies and indulged themselves in deep potations from the fiery beverage and that in consequence of this practice the name of the liquid was given to the stream. This seems more reasonable than the supposition that the springs at its source ever were impregnated with alcohol, by which the brook was made to run

Whatever may have been the origin of the

name, there seems to be no doubt now about the freedom of the water from any alcoholic mixture, and from some recent events it seems as if there was a strange connection existing either of an attractive or repulsive kind between this stream and the "strong water" of the savages. There have been several cases of a magic change of alcoholic liquors to pure water within a short distance of this brook which have greatly astonished the owners. We have heard of a number of such miraculous transformations, so well anthenticated that there seems to be no reasonable doubt that the change was really effected. Individuals have been known to obtain the liquor of the most respectable dealers in Salem, and of the right proof and witnessed the drawing from the cask, the measuring and pouring into the keg or jug-but no sooner had they passed "Strong water brook" than upon application to the mouth of the jug or the bunghole of the keg, the spirituous part was found to have evaporated and nothing but water remained. A case of this kind happened about a year ago and very recently another, which has given rise to much speculation in that neighborhood on this mysterious subject. It has been remarked that if the liquor is carried rapidly over the enchanted ground, it loses little or none of its proper strength, and it is only when the owner ventures to stop and remain awhile in the vicinity of the stream, that the alcoholic portion has been extructed. There is a great deal of sympa thy felt in that neighborhood for the unfortunate sufferers, and it is proposed to have the waters analyzed, to ascertain if possible the cause of the strange phenomenon. Until this is done and some remedy applied, we would respectfully caution any persons conveying alcoholic spirits across 'Strong water brook" not to linger long in its vicinity unless they would have the liquid reduced to pure water.

FIRE IN CHARLESTOWN. -On Friday night, between 12 and 1 o'clock, the Lard Oil Factory of Messrs. Quimby & Sargent, in Warren street, Charlestown, together with several dwelling houses, store houses and out-buildings, (some 15. or 20 in all) were destroyed by fire. Loss estimated at \$75,000. The night was cold, rainy, and very

NEGRO JUSTICE. In the republic of Hayti, a man was tried for stealing some articles of food while being cooked in a pot over the fire. It was urged in his defence, that the larceny was committed under the influence of hunger; and the court decided that it was not unlawful for a man to steal when he was hungry. To this it was replied that he had stolen the pot also. But in this dilemma the court decided that as the victuals could not be taken away without the pot, it was allowable that the pot should accompany its con-

A PAINFUL ACCIDENT occurred at Boxford one day last week, as Bentley's Cotton Mill. A young girl, named Kimball who was attending one of the looms, suffered her garments to be caught in some manner by the band, and was instantly caught up and carried round the cylinger instantly caught up and carried round the cylinder, which was revolving with great rapidity.

She was dreadfully mangled and jammed between the wheel and plastering, (which was broken with the pressure.) One of her arms was nearly torn off, and one leg badly fractured.

FLEETING SHOWER BATH

HICH is far better than any other and

HICH is far better than any other and very much superior to the objectionable Cast Iron Bath. The proprietors of this justly celebrated Bath have extensively introduced it into different parts of the United States, and are now manufacturing them in large quantities, of different style and finish, to meet the wants of the public. The increasing demand for this desirable and useful piece of forniture only substantiates what the subscriber has before asserted, that it has been and continues to be the most preferable Portable Shower Bath in the market, and for the fulowing reasons:

1st. It is not encumbered with heavy weights and pulleys, or a clumsy east from top and bottom, which would make it expensive, liable to rust, break, and get out of repair, not easily moved about, inconvenient is its operations, and unpleasant for the bather. But on the other hand, it is very cheap and durable, light and portable, operates effectually, and can be agreeably and pleasantly used.

2d. It does not require a ten horse-power to lower the fountain; neither is it necessary to fasten it down when lowered, to prevent its running away like an unruly horse-but can be lowered in an instant by the slightest exertion, and readily raised, without compelling the bather to exhaust all his strength. In short, this Bath is what hundreds of individuals of the best respectability have pronounced it—all that mechanical skill could put within the same compass and expense. I would therefore respectivily say to those who wish to purchase or examine this desirable article, call on the subscriber, at No. 121 Boston street. Salem, who will take great pleasure in more minutely desirable to them the respective merits of the Fleeting Shower Bath, by personal demonstration.

So. OOO PEOPLE!

HEYOUNG LION, taking a short nap, skakes
the dew drops from his many and conthe dew drops from his mane, and gives a real "ROAR."

Those who remember the events of 1842, in Boston he raising of the sign of

"OAK HALL,"

will not easly forget the tremendous excitement pro-uced in the ta shionable ready made clothing and fur nishing ne, in the debut of the subscriber. It first developed itself in gentle ripples upon the sluggish sea of this branch of trade; anon the ripples took the form of swelling waves, rolling each upon another, until its deep bosom was lashed into a tempest fearful to tehold, sweeping the high price and long credit system nto the deep gulf below. But to descend from this high state of metaphor.

Until April 1842, when GEORGE W. SIMMONS ook the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established customs of trade.

Until this time, men had gone on their old plodding way giving long credits, demanding as a recompense for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling annoncement was heard, emanating from "OAK HALL,"

LARGE SALES AND SMALL PROFITS This annoucement awoke the dreaming thousands Old men arose from their recumbent position, rubbed heir heavy eye-lids, stretched their cramped and benumbed limbs; young men congregated on the corners of the streets and looked unutterable things—guesses and surprises were rife,—when straight all began to cry "Mad Dog." Still on I went, unawed by threats. nor cajoled by flattery, until finally I have laid fast and strong, a pinnacle stone as lasting and durable as the hills. To prove the advantage of the CASH SYSTEM

over all others, needs no lengthy tale. It must be ap parent to the most casual observer, that while it shields he yener from the ruinous losses often attendant upon the crediesystem, it protects the purchaser from the equally runous profits demanded by merchants to cover bad debt created by a system of long credits. To those, therefore, who can command the READY CASH,

this Establishment offers the strongest inducements. The Stock being purchased fresh this Spring, at auction, and direct from the manufacturers, at some 25 per cent less than the cost of importation, and being satisfied with small profits, will sell at a slight advance upon auction prices.

And I would respectfully invite the attention of the citizens of Boston and vicinity to my unusual RICH DISPLAY

LORRAINE'S PILLS.

All persons require Facts. Remember in all cases that you are not deceived by thing

that appear to be facts.

EMEMBER also, that, Lorraine's Vegetable
Pills have in their composition two of the most
valuable medicines in the world, viz: Sarsaparilla and Tomatoes. These two articles need no praise, neither do the celebrated Lorraine' Pills, when they have once been taken.

once been taken.

Physicians, and people of every class are willing to come forward and aunounce, in the most public manner, that they have been cured of long standing pittints—after all other medicines had failed. In act there can be no doubt but that Lorraine's veganic be pilled to the table Pills is the best medicine ever offered to the

A hacking cough coustantly annoyed me! Boston, Mass., June 1st; 1844

Sir,-In February last, I took a sudden cold, after which a hacking cough constantly annoyed me, and which a nacking cough constantly annoyed me, and this, combined with my other maladies, rendered ma truly miserable, as everybody told me that I was in e consumption. Since, I have taken LORRAINE'S PILLS and now every body tells me that I am well;—I fee as well as ever I did.

J. E. S. McKEY.

Portland, Me., Nov. 7th, 1843 Sir: Please send us one gross of Lorraine's Pills. we have sold all we had last. They have given very good satisfaction, better than any other pills which we have in our market. I think in a short time they will take the place of others We have had no fault found with them whatever; but, on the contra ry, they have been praised loudly. I think we could have quite a number of highly respectable cer thicates from our citizens. Respectfully yours,

ANTHONY COLLAMORE, M. D.

From Dr. Gordon, Plymouth.

Mr. James F. Foster, manufacturer of Trusses, Boston.

Mass., from what I have seen of his Trusses, and from the circumstance of his having supplied several thousand persons in Massachusetts, and other parts of the country, with an article that I think is well calculated to the design of the inventor, I have no hesitation in recommending his Truss to the public; and I believe him to possess, the ability of adapting Trusses to any case that may be presented to him. From Dr. Greene, Boston.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James F. Foster, and he has uniformly given full satisfaction in tneir application.

The benefit of such instruments is often lost, in consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted.

ENDURANCE.

BY ROBERT JOSSELYN. The bitter to endure the wrong Which evil hands and tongues commit, The bold encroachments of the strong, The shafts of calumny and wit; The scornful hearing of the proud, The sneers and laughter of the crowd.

And harder still it is to bear
The censure of the good and wise,
Who, ignorant of what you are,
Or blinded by the slanderer's lies,
Look coldly on, or pass you by
In silence, with averted eye.

But when the friends, in whom your trust Was steadfast as a mountain rock, Fly, and are scattered like the dust, Before Misfortune's whirlwind shock; Nor Love remains to cheer your fall, This is more terrible than all.

But, even this and these—aye, more, Can be endured, and hope survive, The noble spirit still may soar, Although the body fails to thrive; Disease and want may wear the frame— Thank God! the soul is still the same.

Hold up your head, then, man of grief, Hold up your head, then, man of given, Nor longer to the tempest bend;
For soon or late must come relief;
The coldest, darkest night will end;
Hope in the true heart never dies!
Trust on—the day-star yet shall rise.

Conscious of purity and worth,
You may with calm assurance wait
The tardy recompense of earth;
And, e'en should justice come too late
To soothe the spirit's homeward flight,
Still Heaven, at last, the wrong shall right.

The Life Clock.

TRANSLATED FROM THE GERMAN. There is a little mystic clock,
No human eye hath seen;
That beateth on—and beateth on,
From morning until e'cn.

And when the soul is wrapped in sleep, And heareth not a sound,
It ticks and ticks the livelong night,
And never runneth down.

O wondrous is that work of art
Which knells the passing hour,
But art ne'er formed, nor mind conceived,
The life-clock's magic power.

Nor set in gold, nor decked with gems.
By wealth and pride possessed;
But rich or poor, or high or low,
Each bears it in his breast.

When life's deep stream, 'mid beds of flowers,
All still and softly glides,
Like the wavelet's step, with a gentle beat,
It warns of passing tides. When threat'ning darkness gathers o'er,
And Hope's bright visions flee,
Like the sulken stroke of the muffled oar,
It beateth heavily.

When passion nerves the warrior's arm
For deeds of hate and wrong,
Though heeded not the fearful sound,

The knell is deep and strong. When eyes to eyes are gazing soft, And tender words are spoken, Then fast and wild it rattles on, As if with love 'twere broken.

Such is the clock that measures life,

MISCELLANY.

THE SHAKER BRIDAL,

BY N. HAWTHORNE. One day in the sick chamber of Father Ephraim, who had been forty years the presiding elder over the Shaker settlement at Goshen, there was an assemblage of several of the chief men of the sect. Individuals had come from the rich establishment at Lebanon, from Canterbury, Harvard, and Alfred, and from all the other localities, where this strange people have fertilized the rug-ged hills of New-England by their systematic inaustry. An elder was likewise there, who had made a pilgrimage of a thousand miles from a ker government, as established by Mother Ann. They were to be the Father and Mother of the village of the faithful in Kentucky, to visit his village of the faithful in Kentucky, to visit his village of the faithful in Kentucky, to visit his spiritual kindred, the children of the sainted Moth-spiritual kindred, the children of the sainted Moth-lage. The simple ceremony, which would constier Ann. He had partaken of the homely abundance of their tables, had quaffed the far-famed Shaker cider, and had joined in the sacred dance, Shaker cider, and had joined in the sacred dance, every step of which he believed to alienate the enthusiast from earth, and hear him onward to heavenly purity and bliss. His brethren of the north had now courteously invited him to be present on an occasion, when the concurrence of every eminent member of their community was not disaumointed man. wearv of the world, worn out a disaumointed man. wearv of the world.

Accordingly, each elder looked at the two candidates with a most scrutinizing gaze The man, whose name was Adam Colhurn, had a face sun-burnt with labor in the fields, yet intelligent, thoughtful, and traced with cares enough for a whole lifetime, though he had barely reached whole lifetime, though he had barely reached middle age. There was something severe in his aspect, and a rigidity throughout his person, characteristics that caused him to be taken for a school-acteristics that caused him to be taken for a school-acteristics which receives in fact, he had formerly acteristics that caused him to be taken for a school-master; which vocation, in fact, he had formerly But had she attempted it, perhaps the old recollections, was somewhat above thirty, thin and Pierson, was somewhat above thirty, thin and pale, as a Shuker sister almost invariably is, and not entitiev free from that corpse-like appearance. not entirely free from that corpse-like appearance, which the garb of the sisterhood is so well calcu-

'Nay, brother,' said the elder from Canterbury, between them., the hoar frost and the black frost, hath done its work on Brother Adam and Sister Martha, even as we sometimes discern its traces in our cornfields, while they are yet green. And why should we question the wisdom of our venerable Father's purpose, although this pair, in their early youth, have loved one another as the world's people love? Are there not many brethren and sisters among us who have lived long together in wedlock, yet adopting our faith, find their hearts purified from

all but spiritual affection ?' Whether or no the early loves of Adam and Martha had rendered it inexpedient that they should now preside together over a Shaker village, it was certainly most singular that such should be the final result of many warm and tender hopes. Children of neighboring families, their affection was adder than their school-days; it seemaffection was older than their school-days; it seemed an innate principle, interfused among all their sentiments and feelings, and not so much a distinct remembrance, as connected with their whole volume of remembrances. But, just as they reached a proper age for their union, misfortunes had fallen heavily on both, and made it necessary that they should resort to personal labor for a bare subsistence. Even under these circumstances, Martha Pierson would probably have consented to unite her fate with Adam Colburn's and secure of the bliss of mutual love, would patiently have awaited the less important gifts of fortune. But, Adam, being of a calm and cautious character was loth to relinquish the advantages which a single man possesses for raising himself in the world. Year after year therefore, their marriage had been deterred. Adam Colburn had followed many vocations, had travelled far, and seen much of the world and of life. Martha had earned her bread sometimes as a seampstress, sometimes as help to a farmer's wife, sometimes as schoolmistress of the village children, sometimes as a nurse or watcher of the sick, thus acquiring a varied experience, the ultimate use of which she little antici-But nothing had gone prosperously with either of the lovers; at no subsequent moment would matrimony have been so prudent a measure, as when they had first parted, in the opening bloom of life, to seek a better fortune. Still they had held fast their mutual faith. Martha might have been the wife of a man, who sat among the senators of his native state, and Adam could have won the hand, as he had unintentionally won the heart, of a rich and comely widow. But neither of them desired good fortune, save to share it with the other.

At length that calm despair which occurs only in a strong and somewhat stubborn character, and yields to no second spring of hope, settled down on the spirit of Adam Colburn. He sought an interview with Martha and proposed that they should join the Society of Shakers. The converts of this sect are oftener driven within its hospitable gates by worldly misfortune, than drawn thither by fanaticism, and are received without inquisition as to their motives. Martha, faithful still, had placed her hand in that of her lover and accompanied him to the Shaker village. Here the natural capacity of each, cultivated and strengthened by the difficulties of their previous lives, had soon gained them an important rank in the Society, whose members are generally below the ordinary standard of intelligence. Their faith and feelings had, in some degree, become assimilated to these of their fallow startings. to those of their fellow-worshippers. Adam Colburn gradually acquired reputation, not only in the management of the temporal affairs of the Society, but as a clear and efficient preacher of their doctrines. Martha was not less distinguished in he thought of Adam and Martha, and proposed to renew, in their persons, the primitive form of Sha-

But while speaking these few words, Martha grew so pale that she looked fitter to be laid in her coffin, than to stand in the presence of Father Ephraim, and the elders; she shuddered also, as if there was something awful or terrible in her situation and destiny. It required, indeed, a more than feminine strength of nerve, to sustain the fixed observation of men so exalted and famous throughout the sect, as these were. They had overcome their natural sympathy with human frailties and affections. One, when he joined the Society, had brought with him his wife and children, but never from that hour, had spoken a fond word to the former, or taken his best-loved child upon his knee. Another whose family refused to follow him, and had been enabled, -such was his gift of holy fortitude, to leave them to the mercy of the world. The youngest of the elders, a man of about fifty, had been bred from infancy n a shaker village, and was said never to have clasped a woman's hand in his own, and to have no conception of a closer tie than the cold fraterual one of sect. Old Father Ephraim was the most awful character of all. In his youth he had been a dissolute libertine, but was converted by Mother Ann herself, and had partaken of the wild fanaticism of the early Shakers. Tradition whispered, at the firesides of the village, that Mother Ann had been compelled to sear his heart of flesh with a red hot iron, before is could be purified from earthly passions.

However that might be, poor Martha had a woman's heart, and a tender one, and it quaited within her as she looked round at those strange old

The aged Father sank back exhausted, and the sur. ounding elders deemed, with good reason, that the hour was come, when the new heads of the village must enter on their patriarchal duties. In their attention to Father Ephraim, their eyes were turned from Martha Pierson, who grew paand paler, unnoticed even by Adum Colburn. He indeed had withdrawn his hand from hers, and als firmly borne, her heart could endure the weight of its desolate agony no longer.

As soon as the next watering place afforded an opportunity for the purpose, two or three of the party referred to, jumped out, bought cigars, and having lighted them, resumed their seats, filling the stage with cigar smoke, and myself with ill humor, for I had no doubt. besides the annoyance of the thing itself, that it would cost me a sick headache, as it is apt to do with me in such cases. The weather was excessively cold, and the curtains had been carefully buttoned down to exclude the fresh air. Two or three of these buttons I contrived to dislodge of their trust, and by keeping the opening as wide as possible, and my head out of the window, succeeded in getting on the next stage, where I arranged the curtain so that I could lean out with strained limbs to which an unchanged position for ten miles doomed me. As soon as I reached Lebanon, I improved the brief stay I made, by running over to an apothecary's shop, where I selected as precious appears to be pretty smart, and I should think you could afford a better hat than the one selected as precious apothecary's shop, where I

As soon as I was well seated and under way, and the stage filled with smoke, the lump was rubbed treely in the palms of tny hands, and soon the perfume began to assume its claim to recognition, if not respect. A snorting and saufing gradually began to pervade the passengers, and various sattrical remarks and conjectures were freely made. At last, one or two, who could stand it no longer, after some time, made an effort, and unbuttoning the curtains, let in the keen frosty air, which soon banished the odors, alike of the tobacco and the drug, and for some time the whole party enjoyed the luxury of a pure atmosphere. After riding half an liqur in the cold air, the curtains were put down again and again the perfume filled the stage,

American Leather in England.

We see almost every day new reasons for beleieving that the great market of the English nation is to be open for the enterprise of the manufactures of leather on this side of the water. It seems to be an admitted fact that our tanners can convert hides to leather much cheaper than those in the same business in Great Britain, and they have only to imitate the English style of manufacture, to place them in successful competition with English workmen in their own market. We have repeatedly advanced the same opinion, and now it would appear from the recent advices from England, that American Leather is fast getting into favor in that country and will doubtless soon become an important article of export.

It is impossible to foresee all the advantages and changes which may result from such a revolution in the traffic in leather, but it cannot but be highly favorable to the country at large, and particularly to those places where the manufacture is carried on. Whatever good effects may follow England, the credit of the undertaking belongs to Zinc, Spelter, do. Joshua Silvester, Esq., our sagacious townsman, who has been for some time perseveringly engaged in overcoming the obstacles incident to such an enterprise. He has found that the shortto the peculiarities of his customer, and not wait for the customer to change all his old habits and adapt himself to the article. The same readiness and tact which has given him such a reputation for "getting up" a particular style of shoe for our domestic market, has been made available in suiting the taste and fashion of his English customers By a judicious imitation of the mode of preparing leather as now practised by English tanners, we may make the article as much in request as American provisions, such as beef, pork, cheese, &c. now are. We are glad to learn that Mr. Sylvester has established a Commission house in Manchester, Eng. for the sale of leather, and that he also contemplates forming a connection in London, for the same object. We hope our tanners will be early in this wide field of enterprise, and learn the very best mode of making their leather to suit the new market. Those first in the field will be the most likely to be successful in the competion. Mr. Sylvester may soon be expected home on a short visit, and can personally afford much valuable information to our manufacturers.

The Tariff.

Our readers have all heard that the new Democratic Tariff bill, that proposed by Mr. McKay, has passed the House of Representatives and strong, fears are felt that it will become a law. It is consoling to know that all the Whigs of the House South as well as North, with a single exception, opposed: this miserable project of southern demagogues in alliance with their obsequious tools of the North; to bring distress and ruin on the laboring population of the country. It is difficult to conceive of a more wretched scheme to carry out even the professed objects of the Administration, than this bill: A Tariff for Revenue !- They first destroy a Tariff which has yielded and is yielding more revenue than was ever before known in the history of the country, while at the same time it has given full employment and good wages to labor, developed hidden resourses of the country. and paid off a great part of the public debt, and the country! We are to be clothed by the labor of men living in England, France and Germany while our own laborers remain without employment.-We consider this question one of vast importance and we would rather not consider it in its political aspects but it is thus forced upon us by the character of the vote in the House. It is an Administration measure and all the evils which it may produce, will be fairly chargable to the party in power. There is however this consolation, that those who support the government cannot be shielded by dear experience how they have been cheated by their political teachers.

Railroad Movements.

We learn that the Surveyors on the Essex Railroad have made so much progress as to be able to show a profile of the road as far as the Plains, and that the deepest cuttings will but little exceed 20 feet and these are but short distances.

We observe the following Notices published in connection with calls of meetings of the Eastern and Essex Rail Road Corporations.

Danvers and Malden Railroad. We learn that the Committee appointed by the cit-

zens of the various towns interested in the project for a new Railroad from Salem to Boston, last winter, held a meeting a few evenings since. It was, we understand, very fully attended and the Committee were unanimously of the opinion that it is expedient to again petition for the road, to the next Legislature. We presume that in due time a meeting of citizens favorable to the project will be called and energetic measures be resumed to obtain a charter for this road which, if built, cannot fail to be of the greatest importance to the prosperity and interests of Danvers, as well as the other towns on its runte.

The system adopted is admirable, and calculated to make the pupils understand what they study. Its object is to ot killing the whole concern. Had this propositeach the relations of numbers in such a manner teach the relations of numbers in such a manner lion succeeded, the fishing bounties would have as to do away with all dependence upon abitrary gone overboard, and the Maine delegation, with a rules. We find many scholars in our schools who can perform most any example by rule and yell understand nothing about the principle.

To remedy this great defect in our education Mr Adams's system is invaluable. We speak with more confidence of its excellence as we have seen the result of its operations in his school, particularly in the great proficiency of his scholars in computing numbers mentally.

We commend this work to all interested in the course of education for a careful examination.

Secretary Walker, editor Ritchie, &c., were on the floor, throughout the struggle, acting as overseers for Polk, and handled the Executive squadrons with practised dexterity. The bill was saved by one vote (105 to 104) on the question of allowing salt to go in the free list—the whigs voting with the free salt locos, in the hope good part of ours must have voted against the bill and defeated it. But salt being retained as a non-enumerated article at a duty of 20 per cent., the amendment utterly repealing the fishing boun-ties was non-concurred in by the House, (109 to 100) and the bill pushed through by an unexpectedly heavy vote.

States in a way calculated at once to promote the prosperity of both countries, and to bind them over to keep the peace towards each other, under the sive dealing, and reciprocal advantage.

The corn bill has been carried triumphantly in the house of peers, notwithstanding the stenuous opposition to defeat it. The London papers conur generally in the opinion that the Peel ministry give place to the whigs.

All fears for the safety of the corn bill are over. The most critical stage—that of the committeehas been passed triumphantly, and with a numerical strength greater than was anticipated,

The United States, our greatest commercial rival, cannot long remain inett. Her Legislature will march with the times, for it would be a libel upon the intelligence of that great and potent country to suppose that she can be long insensible to the enlightened reciprocal views in commercial matters, which English philosophers have chalked out, and which English statesmen have carried practically into effect, at the sacrifice of their dearest personal and political connections, prejudices and sympathies.

THE MINISTRY.—The probabilities of the resignation of Sir Robert Peel, after the passage of his great measure-the repeal of the corn laws, seems to be doubtful.

RAILWAY INTELLIGENCE.—The Directors of the Great Western Railway Company made an experimental trip, recently, with the new monster engine, constructed for the purpose of testing the uperiority of the broad over the narrow guage with respect to speed. The trip from London to Bristol (1181-4 miles) was accomplished in two hours and 24 minutes, and some part of it at the rate of 75 miles an hour.

The following extract from Sir Charles Napier's speech would seem to show that the British Steam Navy is not altogether so efficient, as is thought by many on this side of the water: NAVAL CIVIL DEPARTMENT BILL .- On the order

of the day, for the second reading of the bill, it being read, Sir Charles Napier, (high Naval authority) addressed that House at length. He entered into a statement as to the sailing qualities of the various vessels in the squadron. He said after they were sent out it was found they were not fit for sea. He believed there was not one of the steam ships belonging to the government that was fit to be called a ship of war. They carried their paddle boxes 5 or 6 ft. above the level of the deck, and if they were to go into war the first shots would, he was persuaded, carry them away If a war was to take place to-morrow, a steam fleet with 10,000 or 15,000 men might be sent out. If that were the case, then, from these high paddle boxes and engines, the first shot could des troy all the men in any one of these steamersthe only salety with such vessels was to place the boilers below the water. Many large vessels had been cut down and spoiled. A large number (forty-five) of the large frigates built at the end of small size. the last war in order to compete with the large frigates of the Americans, were now in process of heing cut down to corvettes. We commend the following sensible remarks from the Woburn Gazette, to the candid consideration of our readers :--

Large and Small Newspapers.

It is one of the sorry errors of the world that the merit and value of a paper is supposed to go up with its size. Nothing can be more distant from the truth and the world is a confounded booby head for entertaining it. Your mammoth sized papers are terrible bores-great dilutors of sense-ghosts of ideas. Thei editors may be very clever sort of men, expert at driving the quill, straddle the seizzors with marvellous skill, end all that sort of thing, but they must necessarily spread an idea over a murderous extension and fritter away its substance into foggy nothing. But he of your small sheet, with columns compressed into sensible cozinese, must write nothing but ideas-and only the heart of them. Brief, concise, terse, he must roll a sentiment in every syllable—a sermon in every word. Never take, then, a half-year's stock of a team paper-mill for ideas, information and those desirables. It is enough that they exhaust the language and give you a thrice printed dictionary; more, you have not a right to look for. But if you want the mirror of the time-the spice of the age-live and recognizable ideas-look in papers of moderate and

They attempted to pull it up, but as there appeared to be something at the bottom of it, their curiosity was excited, and they dug down till a chest, keg, or box, was discovered which, on opening, was found to contain about \$11,000 in gold and silver. It is supposed to be a part of the money stolen from the Cumberland Bank in Portland, some eighteen or twenty years ago-or money which had been buried their by pirates o villians.

The editor of the St. Louis Gazette thus concludes an article on the present condition of our country. It is first rate :-

SMITH'S PATENT

FLEETING SHOWER BATH

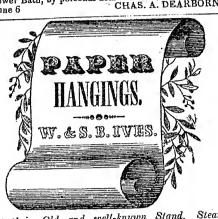

FIETING SHOWER BATH.

WHICH is far better than any other and very much superior to the objectionable Cast from Bath. The proprietors of this justly celebrated Bath have extensively introduced it into different parts of the United States, and are now manufacturing them in large quantities, of different style and finish, to meet the wants of the public. The increasing demand for this desirable and useful piece of forniture only substantiates what the subscriber has before asserted, that it has been and continues to be the most preferable Portable Shower Bath in the market, and for the folowing reasons:

1st. It is not encumbered with heavy weights and pulleys, or a clumsy cast from top and bottom, which would make it expensive, liable to rust, break, and get out of repair, not easily moved about, inconvenient in its operations, and unpleasant for the bather. But on the other hand, it is very cheap and durable, light and portable, operates effectually, and can be agreeably and pleasantly used.

2d. It does not require a ten horse-power to lower the fountain; neither is it necessary to fasten it down when lowered, to prevent its running away like an unruly horse—but can be lowered in an instant by the slightest exertion, and readily raised, without compelling the bather to exhaust all his strength. In short, this Bath is what hundreds of individuals of the best respectability have pronounced it—all that mechanical skill could put within the same compass and expense I would therefore respectfully say to those who wish to purchase or examine this desirable article, call on the subscriber, at No. 121 Boston street, Salem, who will take great pleasure in more minutely detailing to them the respective merits of the Fleeting Shower Bath, by personal demonstration.

will not easily forget the tremendous excitement pro need in the fa shionable ready made clothing and fur nishing line, in the debut of the subscriber. It first developed itself in gentle ripples upon the sluggish sea of this branch of trade; anon the ripples took the form of swelling waves, rolling each upon another, un-til its deep bosom was lashed into a tempest fearful to tehold, sweeping the high price and long credit system nto the deep gulf below. But to descend from this high state of metaphor.

Until April 1842, when GEORGE W. SIMMONS ook the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established customs of trade.

Until this time, men had gone on their old plodding may giving long credits, demanding as a recompense for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling announcement was heard; emanating from "OAK HALL." LARGE SALES AND SMALL PROFITS

This annoucement awoke the dreaming thousands Old men arose from their recombent position, rubbed neir neavy eye.ids, stretched their cramped and be-numbed limbs; young men congregated on the corners of the streets and looked uniterable things—guesses and surprises were rife,—when straight all began to cry "Mad Dog." Still on I went, unawed by threats, nor cajoled by flattery, until finally I have laid fast and strong, a pinnacle stone as lasting and durable as the hills. To prove the advantage of the heir heavy eye lids, stretched their cramped and be-CASH SYSTEM

over all others, needs no lengthy tale. It must be apparent to the most casual observer, that while it shields the venur from the ruinous losses often attendant upon the crediesystem, it protects the purchaser from the equally rutnous profits demanded by merchants to cover bad debi, created by a system of long credits. To those, therefore, who can command the READY CASH,

this Establishment offers the strongest inducements. The Stock being purchased fresh this Spring, at auction, and direct from the manufacturers, at some 25 per cent less than the cost of importation, and being satisfied with small profits, will sell at a slight advance upon auction prices.

MUTUAL LIFE INSURANCE.

The subscriber has been appointed agent or Danvers and vicinity, of the New England Mutual Life Insurance Company. This Company is formed upon the surest foundation. Its rates are based upon the latest and be: observations of the decrements of life, according to the experience of the oldest of the English Compan is. It is the most carefully managed of any of the kind in the country, and has been thus far remarkably successful.

Since commencing, February 1st, 1844, to April 1st, 1846, has issued 986 policies.

The amounts from 200 to \$10,000 each.

Net fund accumulated (owing to the favorable turn of the risks thus far) \$39,500 besides gnarantee capital.

Su plus to be refunded to members at the end of every five years from December, 1843.

Directors—Willard Phillips. Robert Hooper, William Parsons, Charles P. Curtis, Francis C. Lowell, James Read, George W. Kuhn, William W. Stone, R. B Forbes Peter Wainwright, Thomas A. Dexter, Otis Tufts.

President—Willard Phillips. Sec'y—Jonathan Amory. A person in his thirticit year, in order to secure one hundred dollars to his family at his decease, pays annually, during his life, \$228; or he pays \$22 80 to insure \$1000.

Any one in the 21th year of his age, who needs a credit of \$500 for three years, to begin business, where the only obstacle to his obtaining the credit is the uncertainty of life, may obtain the same by paying annually, for that period, \$5.15. Or if he needs \$5,000, he gets the credit hy paying annually, \$1.50.

A creditor may frequently give himse, additional security for his debt by insuring his debtor's life.

One, while he is solvent, may secure a provision for his family on his decease, though he may die insolvent.

Life insurance is better appreciated by the community with every day, and it cannot be long before its benefits will be as generally acknowledged as those of fire insurance are now.

Bank forms of application, tables of rates, and any additional information will be given on application to

SALEM,

TOULD respectfully give notice that he has removed from his old stand, oposite the City Hall, to No 20 Washington street, recently occupied by E. Phillips, where he is ready to perform all operation in Dentistry, in a most thorough and work-manlike manner. His experience and success in inserting whole sets either by atmospheric pressure or springs, enables him to furtish them at rates which cannot fail to suit those in want of an article of superior quality. His method of inserting Teeth, both singly and on plate with or without Guius, has been found to be satisfactory and successful as combining beauty of finish and adaptation with all the requisits of mastication and articulation. Particular attention paid to filling Teeth so as to rende them serviceable for many years, and also to the regulation of Cinideren's Teeth.

POET RY.

OLD TIME.

BY G. LINNEUS BANKS. There's a mighty old spirit abroad in the air, And his footsteps are visible every where.

He hath been on the mountain all hoary with years And lest it bedewed in an ocean of tears; He hath clambered o'er turret, and battlement gray And wrapt them in maniles of silent decay; He hath swept through the forest, and laid, at a blow The stalwart oak, chief of the leafy tribe, low; In Art, as in Nature, the vast and sublime, All speak of the visits of graybeard Time.

He's a skeleton thing with a countenance grim, All toothless his gums, and his eyeballs dim; A two-edged scythe in his lank, bony hand, His 'scutcheon's hatchment of glass ebbing Sand; A tiara of jewels, worm-eaten and black, And arrows omnipotent hung at his back. He mounts on the lightning, he leaps with the w Destroying and scattering, before and behind. The sundial's shadow, and old abbey's chime. Denote with a warning the mission of Time.

He roameth unwearied by night and by day, A daring old footpad, still tracking our way; He feareth no dungeon, no judicial fate, But plundereth alike from the beggared and great. He nestleth with youth in its valley of flowers, And sporteth with love through the eagle-wind hour But the bald-pated laird, and the tremulous knee, The most he delighteth with ever to be; While the wounded in heart, and the deepest in crime Beg a call from the mighty physician, Old Time.

He mindeth the traffic, both early and late, That lineth the road to Eternity's gate, That lipeth the road to Eternity's gale,
And passeth none by, shod with earth's clayey mire,
But he taketh the body as toll for his hire.
The grandee may sit in his ric hly carved chair,
And the life's blund of insects indignantly wear;
The monarch may rule as a god, on his throne,
O'er the leasehold of ashes he calleth his own;
But the spoiler at last round their strongholds shall But the spoiler at last round their strongholds shall

And 'six feet of earth,' be the conquest of Time.

The Scent of Flowers. The scent of flowers! However fair Their lovely hues may be, The fragrance breathing in the air
Is dearer still to me; Catch but the violet's dear perfume, And straightway it will bring The image bright of every bloom That fills the path of Spring.

Or put the mossy veil apart That doth the bud enclose, And drink into your very heart The perfume of the rose. and the gleams nore sposhine. Of waving fields beneath-In its rich hue it brings these dreams, And summer in its breath.

The talip's dyes are rich and proud, The daliah's blossom bright: But round them floats no viewless cloud-They are but for the sight. They want the charm of potent sway That beautifies the whole, Their colored leaves are giants gay, The scent a very soul.

> From the Lowell Journal. "To Arms."

BY JANE E. LOCKE. The following was suggested by reading, a few weeks since, a poem from the pen of Park Benjamin, Esq. under the above caption:

"Arm" not in battle garb, my son, Gird not that sword at all; In holier strife thy fathers won, At this unhallowed call.

Bind not unto thy shoulder near, The knapsack and cartouch; Thy mother's heart will shame to hear Thou dost with war-dogs crouch.

But when, with God upon her side, Thy country to thee calls, "Arm, arm" thou then, and high and wide Fling up her bastion walls.

But trampling on thy brother's rights, Go not to butchery; While round thee gleam the gospel lights, Disgracing all the free.

Go not to wrest from out his hands, Or pluck from off his brow, His rightful heritage of lands, His manhood's seal below.

"Go, vindicate thy country's fame,"
By turning to the five,
Thy glittering sword hilt, nor with shame,
Deal there foul morder's blow.

"The kindred of the noble dead," "As noble" hearts should bear; Nor be by the oppressor led, A hero's fame to share.

No glory hath that warrior plume, Nodding above thy crest;

Nor doth thy steel her path illumine, Or mail upon thy breast.

Nor will the sabre at thy thigh, The shield upon thy arm, The trumpet blast, the battle cry, Unrighteousness disarm.

"To arms"?—unhallowed is the cause, Unholy the crusade; The bidden; "arm" thou not, but pause, Ere thou gird on thy blade, Wamesit Cottage, June, 1846.

MISCELLANY.

[From the Flag of our Union.] ANNIE ELLERTON. BY MISS MARY W. JANVRIN.

Ever light-hearted and joyous was Annie El lerton, the per of our village. Never lighter step bounded in the dance at the village festival than hers; and the clear, silvery tones of her laugh rang out as merrily as the music of the eddying rivulets, whose sparkling waters played around

the home. They called her beautiful, yet hers were not the 'jetty locks and bright black eyes' whose charms have elicited full many a praise from the poet's pen. There was a world of mischief in her laughing blue eyes, which peeped out roguishly from beneath the sunny curls clustering on her fair and intellectual brow! Every feature bespoke the kindness of her heart. No one was ever more rejoiced than was she, when, after long administering to the wants and comforts of those around her, she found that happiness had again taken up its dwelling by their hearthstone; but no one possessed more sensitive feelings, or was more

quickly grieved. Reader, didst thou ever mark the dark shadows of the clouds, as they lightly fall and chase each other across the green-sward on a bright summer's day? If you ever observed them, then can you form some idea of the shadows of sorrow and sadness that would flit across her countenance | Harry May ! whenever she was grieved; but she cherished not anger, for like the shadows, it vanished quickly

Mr. Ellerion, the father of Annie, had formerly been a wealthy merchant; and for a long time ne prospered in all his mercantile pursuits, the tide of prosperity rolling in upon him in one steady, unbroken stream. Having never met with losses or misfortunes, he began to imagine that fortune would ever smile upon him, and an unlucky moment vested a large amount of his wealth in a speculating enterprise, which he supposed would prove very profitable to him. But he was deceived; his wealth was soon scattered, money, and he at once resolved 10 proceed into the country, far away from his former home, and there escape the cold, scrutinizing gaze of the broken. Deep within its hidden recesses, there wordly ones, who formerly had appeared his trustill existed a strong affection for Harry May, est friends, but now when their assistance was which she could not subdue most needed, had entirely deserted him. To the country he soon went with his wife and child, and purchased a small cottage and farm in the little village of R---.

Annie was very young at the time of their removal from the city, and in a few weeks was quite as well contented, aye, and even happier in the humble cottage with its white-washed walls and nearly-sanded floors, as with the noble mansion they previously occupied, furnished with all heard from the lips of Lizzie that though Annie sion they previously occupied, furnished with all heard from the fips of Lizzie that though Andle the gorgeousness that wealth could procure. She should wed another, her heart was his, and he who had been the petted child of wealth, and whose slightest wishes had been gratified, soon whose slightest wishes had been gratified, soon whose slightest wishes had been gratified, soon the crowd as a strange of t with her village playmates out in the flowery meadows, and over the grassy hills that skirted the valley where reposed her father's humble cot. There was not a tiny grass spot far away on the mountain-side that her light feet had not pressed, nor even a shady nook in the old wood that she had not explored.

Anuie grew toward womanhood amid the bright and blooming things around her, beautiful as a fresh spring flower nestled closely down a-mong its leaves; and, think you, that she was thus lovely without exciting the admiration and love of all those around her? Oh no; for if village gossip could ever be believed, many were the suitors that had sued for her hand. But they pleaded in vain, for though many of them possess. ed riches that would at once have elevated her to a high rank, she firmly, but gently rejected all. But think not that Annie was wholly heartfree; else, where was the brother of Lizzie May her most intimate friend? Harry May grew from childhood a playmate for Annie. When but a boy, he was distinguished for his tapid progress in whatever studies he commenced, and as he grew in years, his thirst for knowledge also increased. Although his father was not wealthy, he furnished Harry with the means of attending a distinguished academy, at some distance from the village, where he soon rankell among the first scholars. He soon was fitted to enter college, but a great obstacle was now to be overcome—where was he to obtain funds to meet his school bills?— But he resolved not to despair, and at once endeavored to engage in some lucrative employment to obtain the means.

Hardly had he commenced in it, before an unexpected help came to him. He received a leater from his uncle, a brother of his mother, who had never visited her on account of her marrying one so much beneath her in rank as he supposed Farmer May to be, stating that he had learned from the preceptor of the academy of Harry's superior abilities, and offering to defray his school expenses. Harry thankfully accepted this timely assistance and at once made preparations to leave. He had ere now learned to regard Annie Ellerion in the light of one dearer than a friend, and when he left his native village it was with the happy consciousness of an affection returned.

But hark! there is a busy stirring there to night, and the merry tones of the church bells peal out in the calm, fragrant air. The village maidens are all robed in pure white, with freshly gathered wild-flowers twined into wreathes for their bair. Lizze May is sitting by the open window of her humble chamber, but there is a phadow of sadness on there brow, and a troubled expression in her deep blue eyes. Reader, shall I tell you the cause of this sadness? It is Annie Ellertun's bridled expression in wood, whom she highly esteemed. On arriving bridled night. No, the marble paleness of her face speaks that she is not. 'Tis true these are the gifts of the bridegroom—but took! surely that silver-haired man, whose head is howed low with the weight of years, cannot be the once noble Harry May! Have you not heard it whispered among the villages, that an old, but wealthy man, a Sontherner, had seen and admired Adnie Ellerton, and had sought of her father that Annie should become his bride; that she was told to regard him as her tuture husband notwithstanding the entreaties of herself, and her mother, who would rather sacrifice her own happiness than see her daughter suffer, and when Harry May came back to claim his bride, he was spurned in from her tather's cottage without even seeing or

Annie followed him to the grave with sorrow, for she was alone —all alone in the midst of wealth, and she knew that those who professed to be her friends were attracted more by her riches than from any regard

that they felt for her.

Then did a bright and fairy vision rise before her of her cottage home, and she longed once more to see it,—10 greet all her old friends, and more to see it.—10 greet an ner out mends, and with Lizzie May walk over her old places of rewind Lizzie May walk over her old places of rewind Lizzie May walk over her old places of recont and placed in the hand of a clerk to serve upout and placed in the hand of a clerk to serve upout and placed in the hand of a clerk to serve upout the matter. The surprise of her friends at so soon seeing her was great, for she had arrived several weeks previous to their expecting her; and when they saw the now dignified Rev. Henry May, they could hardly realize that it was he whom they had treated with so much concempt when Annie was about to wed another. Pale, and sad, he looked when he first returned, but the bloom was on the cheek again, and the traces of sorrow vanished from his brow; and his parents supposed this change to be effected by the fresh, invigorating country air! but Lizzie thought differently,

although she wisely kept her own counset.

We need not tell the reader that there was soon another bridal at the village church, and among the villagers another fest val; and although Annie now wore no dazzling jewels in her hair, but instead, a solitary rose-bud of purest white, and although attired in a robe of flowing muslin, yet she was far more happy than ever before, when she gave her hand away to Harry May-her rah! heart's first choice.

Serving a Subpæna; or, Law.

It is singular what shifts love will make to accomplish its objects. Bolts, gates and bars are of little avail against Copid's picklock contrivances—his cunning will devise ways and means to open them all. A young gentleman had courted to the later of this aim, and it was controved the a fair lady of this city, and it was supposed the two, in due time, would become "one flesh."—Some little quarrel, of a trivial nature, as lovers quarrels generally are, occurred. A Visit to Kernwood.

We availed ourselves recently of a leisure hour to make a call at this beautiful and picturesque domain, situated in North Salem and of which FRANCIS PEABODY Esq. is the proprietor. Many lovers of nature have frequented this romantic spot to while away a pleasant hour and thousands, prompted by curiosity, have been there to witness the fanatic harangues which led many to receive a delusion now happily passed away, but which during its progress produced a religious frenzy fatal to the peace of its victims. We think most of those who have thus visited these grounds will ments and it is the province of art to set off her beauties to the greatest advantage. The extent of this domain is alert; but, nevertheless, no opportunity will be more than fifty acres and its winding avenues extend to the distance of a mile and a half. It is difficult to conceive of a more fitting place to exercise the best skill and judgement of the picturesque landscape gardner, yet it seems strange that a place of such rare beauty should not sooner have been thus appropriated. There seems to be a growing taste in the community for rural scenes and retreats, and the man with his acres, appears to have the greatest enjoyment and at the same time affords much pleasure to others. The transformation going on at Kernwood will tend to increase this love of natural scenery and afford an example, which if followed by those who have the ability, would make this region the garden of New England.

While at Kernwood we notice a large boulder of a conical shape upon the extensive lawn in front of the mansion, which bore the name of "Billy's Rock" and was a noted landmark of the place. It appears that it was a favorite haunt of one of the former proprietors of the ground and from that circumstance it bore, in abreviation, his dollars a day, per head, and only half a million a given name. The granite cone is a pleasing object of itself but it seems to have been also rever- the benefits accruing from the savorable terminaed by some on account of associations connected tion of all these wise projects. The Potato Rot.

We are sorry to learn that the potato crop is again in danger from the effects of the rot by which so many were lost last year. There are shown liself in the vines as well as the root and calculable loss of this valuable root.

Free Trade and Labor.

The Tariff question is in effect one of lubor and concerns the laboring part of the community more than any other. The proposal of the government through Mr. McKay's Bill is, to give encouragement to the laborers in Europe in preference to those of our country. It stretches its arms across the Atlantic and says, there are our workships, and the American artizan and manufacturer must quit his calling and derive his subsistence from the cultivation of the soil. He must leave his tools and go to the far west and raise wheat which must be transported to the mills, be made into flour, again be transported to the sea coast, to be seld at 4 dollars per barrel and sent across the ocean to feed the foreigners who have driven him frum his chosen occupation. Even here he meets with the competition of other farmers in Germany, the shores of the Baltic and Mediteranean, who undersell him in be astonished at the change which has taken place price as they are nearer the market and work for lowin a few weeks. This change has been effected er wages. His only hope now is, to work cheaper thus far not by costly artificial means, but by himself and bring his labor on a level with that of the merely removing the unsightly stone walls and pauper labor of Europe. It is to this result that the docthrowing the whole open to view in a native trine of free trade, if carried out, will inevitably lead. oveliness. Nature has been lavish in her adorn- It is this which the Government is about to force upon the country.

Let us compare this doctrine for a moment with make our own clothing as well as raise our own food; mechanical occupation as well as agricultural, by which they will be the profitable customers rather than the competitors of the farmer. Their policy is, to make agriculture by producing all we can and buying from abroad as little as possible. In this way only can the country be prosperous and the laborer get his are at work between the Plains and Andover.

The whigs will do all they dare, to embarrass the can, they will repress and chill any enthusiasti ebullition on the part of the people. There are a thousand insidious ways of doing this, not easily suffered to escape; and if a desponding word can discourage or thwart a favorite enterprise, you may be sure that word will be spoken, and sounded through every ramification of the whig ranks, with a view, no doubt, of arresting our progress in a series of operations, destined, I hope, to bring Mexico to her senses.

Mr. Editor-I have been much excited by the perusal of the above lamentations of a correspondent of the Ohio Statesman. It is really provoking, contemptible, and ungenerous, in these meddlesome, better-mind-their-own-business Whigs, to attempt to arouse the "sober second thought" of the people by exposing the injustice of the present war and the schemes of its wily concoctors and proprietors! It is uncivil, inhuman, unpardonable, to spike the cannon or wet the powder which has been so carefully prepared to infuse a fair amount of sense into the heads of these devildaring Mexicans, by blowing their brains out .-It is their duty as peaceable, christian citizens to let these self-sacrificing, benevolent public servants go on in their dirty work, so long as they keep their own hands clean, at an expense of eight day for spending money. Essex Rail Road.

We gave in our paper, a short time since, the rouse surveyed for this road, as far as Andoves street. The following is a continuation of the same route as far as the Plains:-

One line of the survey crossing Audover St. is directly through Wilson's hill; another line takes a more northerly direction around the hill, which trade, according to the opinion of Mr. Hall, can be made at a somewhat less expense than making a deep cut through through the hill. After crossing the factory pond, it goes through the lower corner of the Endicott Farm, (now owned by Benj. Porter, Esq.) in full view of the noted Endicost pear tree, which is over two hundred years old,-thence across the farm of Nathan Page, cuting his land very badly; thence between the houses owned and occupied by Edmund Needham and Son, over Wm. Needham's land to the Mili pond, across that in a northerly direction to land of W. & M. Black, jr.,-which is intended to be occupied for a depot, to do which the estate owned by Johnson Proctor, will be necessary for a road from the main road to the depot, to accomodate the village of New Mills. Thence across land of Thos. Cheever, Jacob F. Perry, Daniel Usher, Wm. Endicott, Henry Johnson, John Page, and Moses Black; across Purchase St. near a private burying ground, across land of John Page, near his brick yard; thence across land of John Groun, Samuel Preston, and Elias Putnam, to the Plains. One line near Dr. Osgood's house, and one between there and Elias Putnam's Shoe Manufactory,-where probably, will be the depot to accomodate the Plains village. It is the expressed opinian of many that here it will stop, but appearances indicate differently-already the surveyors

Railroad Crossing.

We understand that a town meeting is to be held any, ought to be adopted by the town in relation to the alteration of the grade of Central St. to conform to that of the Essex Rail Road, and to look after the rights of the town, it being understood that the Rail Road will cross the street at a grade about six feet higher than the present travelled road. It would undoubtedly be a public convenience to have that part of the street raised, if it can be done without detriment or loss to private individuals, and it would be quite as important an improvement as that which cost several hundred dollars to the town some years ago on Main St., and which was done to the great injury of private property, not one cent of which has ever been reimbursed to the sufferers. We hope the town will not again be guilty of such an act of gross injustice to a private, individual in making improvements for the public benefit. In the case under consideration we suppose the Rail Road Corporation would be obliged to allow fair compensation for damage caused 10 private property.

Lynching .- An unfortunate individual named Leonard Smith, recently received from the hands of Mr Calvin Martin, a most severe castigation, the provocation for which was from information received by Mr Martin that the said Smith had been instrumental in abducting his daughter, from her home, and delivering her into the hands of an experienced villain in New York. The parties belonged to Newburyport. The Courier says :-The general sentiment, we find, is in favor of the inflictor. It was a case where law would afford very poor redress, and it being supposed he had well informed himself as to the criminal, the deabout 12 acres. It is estimated that the whole cision of the public seems almost unanimous to sustain him in taking the law into his own bands.

Immediately after the assault, Mr Martin de livered himself into custody, and gave the requir-

City Newspapers.

We commend the following article from the Vermont Christian Watchman to the candid consideration of our citizens. Scarcely a week rolls round, that does not introduce among us some travelling Agent, for a city paper, who contrives by untiring and annoying solicitation, accompanied by a large quantity of miserable puffing, to force on some of our citizens a subscription to one of the numerous city papers. It is true that there are papers devoted to particular benevolent or christian objects published in the cities, that deserve encouragement abroad. And it is also true that there are many others, possessing all the advantages of a large quantity of advertising filled only with the usual every day occurrences, issued in midst of a large population, which should seek support only in the place of its publication, and if they cannot obtain a livelihood there, should die willingly. We have in our mind now, several persons who tell us they cannot afford to subscribe to our humble sheet, who invariably obtain the privilege of perusing it almost as soon as circulated, by (boring) borrowing it of their neighbors, while at the same time they are cash subscribers to one, two and some even four city papers. 'Brethren, such things ought not so to be.' 'It is unfair and unequal competition, and ough to be discountenanced. It would be a serious loss

to community, if the country papers were all de-

stroyed, and this is the result the city papers are

eeking to accomplish. They would tain monop

plize the whole business into a few mammoth es

ablishments. Then, raise their prices- do al the advertising-depreciate all mercantile and manufacturing husiness in the country, except what is owned by city residents, and thus work a great evil to community at large, in more ways than We are no enemy to good city papers-but one. in our judgment, it is the duty of the country pa pers to look out for their own interests, and to en leavor to extend their own circulation and improve and enlarge their journals, instead of puffing and bringing into special notice the trashy, sickly, and next Saturday, to consider what measures, if often times demoralizing publications, which are scattered broad-cast like autumn leaves through out the land. And, if the people of the country wish to improve and increase the business i their several vicinities -- if they desire mediums for advertising-giving notices, &c. &c., and spreading intelligence-especially home intelligence—among all classes, it is their duty to pat-ronize and encourage the country papers. This will be greatly to their advantage in many ways, in the long run. There is a strong tendency to great monopolies in trade and manufactures, cenering in our cities, even to the injury of the counry, at large-a strong tendency to great accumulations of wealth and aristocracy in these places, langerous to the welfare and liberties of the country; therefore, this powerful tendency should be counteracted in every honorable and proper manier, so as to preserve a proper balance between the business of the country and the city. It is langerous to the farming, mechanical or manufacturing interests of the country-dangerous to the intellectual, religious, social and political welfare of our country. The Press in our land, is powerful engine for weal or wo; and the city presses are very liable to become corrupted—they nay not have the best interests of the people at neart—and hence the great necessity for sustaining he country papers among the people, to counterici the rninous influences of city publications—to increase home business and diffuse intelligence as generally and willely as possible.'

GREAT FIRE AT NANTUCKET.

The Nantucket Warder gives an account of appalling fire, by which a large portion of that own has been consumed. The fire broke out at about 11 o'clock on Monday night. One third of the town has been destroyed, between three and four hundred buildings having been burni. The loss is estimated at about \$1,000,000. The fire was first discovered in the hat store of William H. Geary, from whence it diverged with a rapidity that appalled the stoutest hearts. Building were blown up, the fiery elements seemed to have gained the ascendency, and for hours it appeared as though all human efforts to stop their destructive progress would prove futile.

The Warder contains a long list of the build ings destroyed, together with the owners and oc cupants, among which were the oil factories of R Mitchell & Sons, S. &. T. Hussey, E. W. Gard ner, Baker & Athearm, George Easton and S. B Tuck, the Episcopal church, the Athenæum, libra ry and curiosties, the Mansion House, &c.

The Selectmen engaged for the night 100 me to watch the burnt district, and about 100 mor were employed by individuals. A sufficient num ber of engines were in attendance. The Count records were saved. The steamboat Company despatched the Tole

graph at S A. M. to meet and receive the passen gers of the Massachusetts; the M. to return t New Bedford, and leave again for Nantucket, ar riving same evening. The commendable object of the company in this movement, was to give as early information as possible to the citizens a broad, whose premises have been destroyed. It is very remarkable that no lives were lost

In Senate, on Wednesday, Mr. Webster present memorial from copper manufacturers respective the duty proposed on raw copper, in the new bill reduce the tariff. The memorialists state that thi teen millions pounds copper are now annually co sumed in the United States, one half of which is i or 12 millions yards of cotton goods. Under the pro ent law raw and sheathing copper are both free. new bill proposes five per cent. on raw copper. Wh sheathing copper remains free under the present la without protection, we manufacture a part of t sheathing copper consumed in the United State hough England sends to the United States more th half what we consume. With the advantage of ti per cent. proposed,, she will send all. He moved lay the memorial on the table and have it printed.

After further debate the motion was agreed to.

THE TARIFF .- Some of the most guarded of t etter writers from Washington are holding of hopes that the tariff will yet be saved. The c respondent of the Philadelphia North Americ says, the position of Mr. Benton is doubtful a that it is reported that he has declared his opported tion to McKay's bill. The expression attribute to him is that he would "not touch it, with a foot pole." Great efforts are being made Pennsylvania to save the Tariff. Both parties Reading were to have a meeting on Sature evening, appealing to the Senate and George

A Day of Jubilee a Day of Sorrow. Sam Ford and wife came into Bosion, on Saturday celebrate the Fourth. In the evening, while w ing at the Depot to take the cars home, they separated in the crowd. He was intoxicated the time of their separation, and the next ti she saw him he was a lifeless corpse! He staggered into the dock and got drowned. S was the tate of a man sixty four years of age husband, and the father of four children. Co he have foreseen it how carefully he would he shunned the intoxicating cup. What calamit his poor family! And yet there are thousa rushing on to some such desperate end, forget that intemperance lessens pleasure, and turns of of jubilee into days of sorrow. Temperance be other hand, increases all the enjoyments ife; it gives vigor and energy to the body nind, and prepares its volaries to withstand neaviest storms of adversity.

Hampshire was a great our to noerty, stood more in the way of freedom, than South Carolina.—
And why? I will tell you why. When the subsect of slavery is introduced on the floor of confect of slavery is introduced on the floor of con andresses the house. He goes, of course, in favor of slavery; he speaks for it, and votes for it; upholds it in all its relations; and supports, in order to sustain it, the gag rule, the Mexican war, and everything else which tends in its favor. But of what avail is all this? He exercises no influence, not a particle—except so far as his own individual vote goes—because he is pleading his own case. Slavery is his peculiar institution. He was born under it, re-red under it, and has lived under it. He must support it; he cannot do otherwise. But next rises a member from New Hampshire. Every eye is fixed upon him; every ear is opened wide to hear what he may utter.—
Here—this is the feeling—here comes one from the "Gibralter of democracy," the mountain home of liberty, whose winds breather of liberty as they sweet through the valleys, whose earlier comes. sweep through the valleys, whose eagles scream of liberty as they soar above her towering hills.— What has he to say? The panting breasts of the oppressed throb high with hope, that now, at least, some truth will be told that shall strike conviction to the mind even of the oppressor; some viction to the mind even of the oppressor; some considerations urged that shall lighten the mind galling yoke of bondage. He speaks, and what is it? Why, of liberty in the abstract, until the assertion of liberal doctrine touches the democratic again, when led be turns round and votes side by party, when lo! he turns round, and votes side by side with the member from South Carolina, just exactly, and just as far, as the slaveholder wishes him to vote. Do you not see that this man exerts far more influence in favor of slavery than the other? Is it not plain that his voice is ten thousand times more potent than any voice from the south, to perpetuate the accursed institution, and nivet still more tightly the fetters on the thrallbowed slave? Let any gentleman deny it, if he can. Would to God it could be denied!"

SHAVINGS.

Extraordinary Double Elopement and its Finale.

A remarkably rare instance of faithlessness on the part of married persons, occurred on Long Island, Two young married women, named Mrs. Flowers and Mrs. Jones, eloped from their homes, near Hampstead, L. I., on Friday morning, with two near Hampstead, L. I., on Friday morning, with two men of that neighborhood, almost strangers to them. The man whom Mrs. Jones went off with, was a carpenter, named Eustis, and had a wife of his own whom he deserted. The other was named Hudson, and was a schoolmaster and professor of psalmody, and had no wife. The guilty parties left in company, and stopping in New York city a short time, want up and stopping in New York city a short time, want up the North River and on to Rochester, where the po-lice officers, who had been in pursuit, caught up with them and had them arrested. They were all taken back to their homes.

Lynn, July 18 North River marginal road, was destroyed by fire on Saturday morning, between one and two e'clock. The whole inside of the building was in flames when the fire was discovered, but the active exertions of the firemen, notwithstanding the oppressive heat of the weather, aided by a boun-tiful supply of water from the river, prevented the flames from communicating to the adjoining wooden buildings, and even saved the store itself from such enfine destruction as seemed probable. Some flower gardens and valuable fruit trees in the vicinity, we regret to learn, were seriously injured by the cinders and scorching heat.— Building ensured for \$200 - stock for \$1000 - Reg.

SMITH'S PATENT

FIEETING SHOWER BATH

WITHCH is far better than any other and very much superior to the objectionable Cast Iron Bath. The proprietors of this justly celebrated Bath have extensively introduced it into different parts of the United States and are now manufacturing them in large quantities, of different style and finish, to meet the wants of the public. The increasing demand for this desirable and useful piece of furniture only substantiates what the subscriber has before asserted, that it has been and continues to be the most preferable Portable Shower Bath in the market, and for the foloxing reasons:

1st. It is not encumbered with heavy weights and pulleys, or a clumsy cast from top and bottom, which would make it expensive, liable to rust, break, and get out of repair, not easily moved about, inconvenient in its operations, and unpleasant for the bather. But on the other hand, it is very cheap and durable, light and portable, operates effectually, and can be agreeably and pleasantly used.

2d. It does not require a ten horse-power to lower the fountain; neither is it necessary to fusten it down when lowered, to prevent its running away like an unruly horse—but can be lowered in an instant by the slightest exertion, but can be lowered in an instant by the slightest exertion, and readily raised, without compelling the bather to exahust all his strength. In short, this Bath is what hundreds of individuals of the best respectability have pronounced it—all that mechanical skill could put within the same compass and expense. I would therefore respectfully say to those who wish to purchase or examine this desirable article, call on the subscribers at No. 121 Boston street Salem, with will take great pleasure in more minutely detailing to them the respective merits of the Fleeting Shower Bath, by personal demonstration.

Those who remember the events of 1842, in Boston he raising of the sign of

"OAK HALL,"

will not easily forget the tremendous excitement pro-uced in the fa shionable ready made clothing and fur nishing line, in the debut of the subscriber. It first developed itself in gentle ripples upon the sluggish sea of this branch of trade; anon the ripples took the form of swelling waves, rolling each upon another, until its deep bosom was lashed into a tempest fearful to behold, sweeping the high price and long credit system no the deep gulf below. But to descend from this high state of metaphor.
Until April 1842, when GEORGE W. SIMMONS

oak the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established custom's of trade.

Until this time, men had gone on their old plodding time. way giving long credits, demanding as a recompense for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling annucement was heard, emanating from "OAK HALL."

LARGE SALES AND SMALL PROFITS. This annoucement awoke the dreaming thousands, Old men arose from their recumbent position, rubbed heir heavy eye lids, stretched their cramped and be neir neavy eye-nos, stretched their cramped and be-numbed limbs; young men congregated on the corners of the streets and looked unutterable things—gnesses and surprises were rife,—when straight all began to cry "Mad Dog." Still on I went, unawed by threats, nor cajoled by flattery, until finally I have laid fast and strong, a pinnacle stone as lasting and durable as the hills. To prove the advantage of the

CASH SYSTEM over all others, needs no lengthy tale. It must be apparent to the most casual observer, that while it shields the vener from the ruinous losses often attendant upon the crediesystem, it protects the purchaser from the equally ruinous profits demanded by merchants to cover bad debt, created by a system of long credits. To those, therefore, who can command the READY CASH,

this Establishment offers the strongest inducements. The Stock being purchased fresh this Spring, at auc tion, and direct from the manufacturers, at some 25 per cent less than the cost of importation, and being satisfied with small profits, will sell at a slight advance upon auction prices.

And I would respectfully invite the attention of the citizens of Boston and vicinity to my unusual RICH DISPLAY

AND NEW DESIGNS OF FRESH SPRING GOODS! Received by the late arrivals per steamers and packet ships from England and France. I have also purchased from our own home manufacture, at low prices, an ELEGANT ASSORTMENT,

adadpted to this Spring and coming Summer, that will in point of beauty and splendor eclipse all other presious exhibitions at this popular place of resort. The system and course I have adopted, viz:

THE Proprietor would not claim for it, that it is a specific for ALL the diseases to which the human rame is subject: but does claim that in all complaints where a purifier of the Blood is required that this Panacea is infallible, and its powers are admitted by all who have used it, and it has the sanction of our first Physicians.

He would ask for it only, that meed to which the public may deem it entitled—and would prefer that its beueficial results be its sole recommendation, and the relief and health which must accrue to the diseased and suffering from its use should proclaim its virtues.

For any of the following complaints, the Dandelion and Tomato Panacea, is the best remedy that has yet been oftered, and no article has given such universal satisfaction for Headache, Dizziness, Sleepiness, Loss of Appetite, Indigestion, Dyspepsia, Erysipelas, Salt-Rheum, Jaundice Scrofula, Scurvy, and all cutaneous eruptions of the Skin Chronic Diseases, Rheunatism, General dehility, or any complaint that HAS ITS ORIGIN IN IMPURITIES OF THE BLOOD.

This PANECEA is composed as all must be aware who know anything of the DANDELION, TOMATO, and SARSAPARILLA, its principal ingredients, from the most imprecut as well as the must effectual remedies to be ound in the Vegetable kingdom; and who does not know hat for all those Diseases, in which a couplete and radial change in the composition of the Blood, inthe secretions of the Liver, and in the formation of the solid parts of the body, are regarded there are no remedies, that wil for a moment compare with them.

That it is purely a Vegetable composition, the public

POETRY.

The Last Place of Sleep. Lay me not in green wood lone, Where the sad wind maketh moan, Where the sun hath never shone, Save as if in sadness; Nor, I pray thee, let me be Buried 'neath the chill, cold sea, Where the waves, tumultuous, free, Chafe themselves to madness,

But in yon enclosure small,
Near the church-yard's mossy wall,
Where the dew and sunlight fall,
I would have my dwelling:
Sure there are some friends, I wot,
Who would make that very plot, Lovely as a garden spot, With rich perfumes swelling.

Let no costly stone be brought, Where a stranger's hand hath wrought Vain inteription, speaking naught To the true affections; But, above the quiet bed,

Where I rest my weary head, Plant those buds, whose periumes shed Tenderest recollections.

Then, as every year, the tide Of strong death bears to my side, Those, who were by love allied, As the flowers of summer; Sweet to think that from the mould Of my body long since cold, Plants of beauty shall enfold Every dear new comer.

To Kate.

I'm thinking of the time, Kate, When sitting by thy side, And picking beans I gazed on thee,
And felt a peacock?s pride—
In silence leaned we o'er the pan, And neither spoke a word : But the rat ling of the beans, Kate, Was all the sound we heard.

Thy auburn curls hung down, Kate, And kissed thy lily cheek; Thy azure eyes, half filled with tears, Bespoke a spirit meek-To be so charmed as I was then Had ne'er before occurred, When the rattling of the beans, Kate, Was all the sound we heard.

I thought it was no wrong, Kate, So leaning o'er the dish, As you snatched up a lot of beans, I snatched a nectar'd kiss— A sudden shower made blind my eyes, I neither saw nor stirred, But the rattling of the beans, Kate, Was all the sound 1 heard.

Charles could neither eat nor sleep; and after a long patient uncomplaining struggle with the cares and miseries that beset him—a struggle of which his poor wife knew nothing till long afterwards—his constitution gave way all at once wards-his constitution gave way all at once, and he fell from his chair at the desk of a wealthy merchant, who, knowing his worth and deceived y the resignation and cheerfulness of the poor ellow believed he was preparing him with cer-

tainty for a sphere of great usefulness—while he was dying by inches in his very presence.

The poor wife met the bearer of her husband at the door, without a cry or a tear. The children gathered about him—but even their wailings did not disturb him, and for many a long and weary day there was no hope—none whatever; but one evening, late in the summer, as he lay there with his lighted eyes fixed upon the window —gasping for breath and evidently struggling with some great change at work within him--he turned suddenly toward his wife, and knew her, and pressed her hand between both of his, and then---while her heart was brimming with terror and joy, fearing that every breath would be his last, and full of thankfulness that reason had been vouchsafed to him to know his dear children and their mother once more—he lifted his thin hand towards the Western sky, and whispered on, that we might all go together!

And there was nothing to be heard in reply,

And there was nothing to be heard in reply, but the humble breathings of a broken hearted wife, repeating the same prayer; and the sobbings of little children waiting to take leave of their dying father.

'If I could only be certain, my dear wife,' he added after a short pause, 'could I only be satisfied that you and the children were 'provided for that you were hevond the reach of

The poor wife, who had been sitting by the shut violently in the next room, the sharp rustling of papers, hurried footsteps and cries, and be-fore they knew which way to turn, she came back trembling and weeping to the bedside of the poor sufferer, and pressing her damp lips to his forehead she whispered to him to be of good cheer, to be comforted, and when he started up and gazed into her eyes with speechless terror, she told him that God had heard his prayer, and that his little ones and their mother were all provided for.

Provided for ! how ! when ! where ! what has happened!' cried the husband, trying to lift him.

The poor wile answered not a word, but she while from her uplifted hand fluttered a paper which her husband was just able to make out the meaning of. It was a life policy for five thousand dollars, taken out twelve years before in the name of the wife, and was now worth, after delucting the sums lent to her by the office to pay the yearly premiums with, and keep her sick husband after his failure, over eight thousand dollars. These were the savings of a prudent and thrifty housekeeper in the season of prosperity, when two dollars a week put aside for the purpose became the seed of a richer harvest than her husband had ever hoped for in the days of commercial change and overthrow. For a while she had forwhispering just above her breath 'and so will our gotten the policy, believing it could be of no use whispering just above her breath 'and so will our gotten the policy, believing it could be of no use to her or to the children till after the death of her or t husband; but when she discovered that, owing to beneficial provision of the charter which entitled her to borrow back two-thirds of the whole amount she had paid in, together with two-thirds of all the profits she was entitled to, she bestirred herself and prevented the forfeiture and now, when here was no other help, no other hope under heaven, and the partner of her youth

Five years after this, Charles Hardy went into business with his father-in-law, and within eight years both failed. Uncle Joe married the mispress of a boarding-house, with a large family, and died leaving his whole property to her; and years both failed. Uncle Joe married the mistress of a boarding-house, with a large family, and died, leaving his whole property to her; and not enough to his nephew to pay for the china he broke on the evening he spent there, laboring with him to get his life insured.

Budding or Inoculating. Those who have not had time to graft what they wished this spring, or who have failed in

making scions take well, can employ the time to good advantage in budding or inoculating, as it s somotimes called. This consists in inserting a bud of the kind of fruit you wish to propagate, whatever it may be, into the bark and next to the albumen of the

stock, so as to receive nourishment from the sap thereof, which causes it to unite with and form perfect branch. This operation may be performed as soon as the hark of the stock will slip easily, and the bud

of the fruit to be propagated is perfectly formed. If you examine a branch of the tree you wish to propagate, or any other, you will find at the bottom of most of the leaf stalks a small bud peeping out. This is the rudiment of a new branch which will probably push out another year. It is this bud which you take. You should select the thriftiest shoots that you can find that

have strong healthy buds upon them. Select those buds that appear to be well developed and strong. From this stock cut off a smooth thin slice of the bark that contains a bud, beginning say from a quarter to half an inch above the bud, and following down, say an inch below-In doing this, you will cut a thin slice of the wood with the bark where the bud starts out from the stock or twig. Cut the upper part of this thin bark, on which your bud is, off square across, the other end may remain pointed as it came off. You also cut the leaf off as it is not needed, leaving an inch or two of the stem to handle it by. You now with a sharp knife handle it by. You now with a sharp knife make a perpendicular incision in the bark of the stock, just where you want to insert the bud, happened! cried the husband, trying to lift him. happened! cried the husband, trying to lift him. happened! cried the husband, trying to lift him. happened! cried the husband, trying to lift with a bewildered look, self up, and gazing at her with a bewildered look, and gasping tor breath. Oh speak to me! let and gasping tor breath. Oh speak to me! let and at the top of this make a cross cut, so and at the cut form the figure of T with a long that the cut form the figure of T with a long that the cut form the figure of T with a long that the cut form the figure of T with a long that the cut form the figure of T with a long on each side of the perpendicular cut. 1

In about a fortnight you will ascertain whether a union has taken place or not. If there is a union has taken place of not. If there is a union, there will be a 'freshness and plumpness' of the bud; if it does not unite it will shrink. It is best to do this as early in the season as it will do, in order that you may repeat the process the same season if it does not

As soon as the union has taken place, the band may be relaxed, lest it should become too tight by the successive growth of the stock, Next spring, as soon as the bud begins to start, the stock may be cut off just above where it is budded and it will soon push out a strong and healthy branch. If it should have been killed during the winter it may be again budded, and thus presents one advantage over grafting; where you have to cut off the branch and thus

PARTY PRINCIPLES.

Much has been said by the so-called democratic party, about the similarity of sentiment of the aristocracy of England and the Whig party in this country and during the political campaign of 1840, they were jeeringly taunted by the loco party with the sneering epithet of British Whigs, and of obtaining pecuniary assistance from England to prosecute their efforts in attempting to place into office the men who were elected. The absurdity and falseness of all such attempts to conceal their own character as British Tories appears evident, from the fact thatamong the first acts of the administration and in the face of the strongest opposition from the loco focos, was that of passing the existing Tariff Bill, than which nothing could have been more obnoxious to British capitalists or more opposed to their walk and interests. Such has always been the feelings of that Government, and so strong was the fear of competition from the colonies, that the British Parliament while the States were under colonial government enacted the following law;

"Be it enacted by the King's most excellent majes ty by and with the advice and consent of the Lords spiritual and temporal, and Commons in this present Parliament assembled, and by authority of the same That from and after the 4th day of June, 1650, no mill or other engine for splitting or rolling of iron, or any plating forge to work with a tilt-hammer, or any furnace for making steel, shall be erected or after such erection, cantinued in any of his Majesty's colonies in Aand if any person or persons shall erect or cause to be erected, or after such erection continue or cause to be continued, in any of said colonies, any such mill, engine, forge or furnace, every person or persons so offending, shall, for every such mill, engine, forge or furnace, forfeit the sum of £200'of lawful money of Great Britain.

And recently since the prospect of a repeal of the Tariff of 1842, has been manifested, much satisfaction has been expressed on the other side of the water while within our own borders nothing but disappoint ment and sorrow and indignation at the miserable and slavish succumbency of our Representatives in Congress to the dictates of a few Southern champions of slavery under the command fof South Carolinian chivalry and a banner emblazoned with the republican motto of Slavery and its interest.

The question is frequently suggested to our minds, is this state of things always to exist? Must we forever be subjected to this unsettled state of public policy, and our capitalists, manufacturers and industrious mechanics forever be obliged to distrust the honesty of their legislators, and by their impolitic acts be prevented from engaging in any undertakings which shall secure prosperity and employment to our citizens? We think not. The time will, must come when the people, the sovereign people will become convinced that in order to secure to themselves good laws and of wholesome application they must elect to their offices of trust men whose principles and actions will accord with their professions, and should the present Tariff be repealed and Mr. McKay's substituted, then will an opportunity be afforded to judge who are traitors to their country's interest and the meaning of all such vote-traps as the following which Mr. Cameron admitted in the Senate, in answer to a question put to him by Mr. Webster, 'were used in Pennsylvania in 1814 on the flags of the lo-

THE TRUE AMERICAN.

This paper, which has been conducted with much ability by that fearless champion of liberty. Cassius M. Clay, completed its first volutue on the 15th inst. During its publication it has been assailed in the most fiendish spirit by a powerful host of the dupes of Slavery, who have resorted to the foulest schemes which has ever disgraced a miserable faction in their attempts to suppress its publication. Knowing as they did that the influence of the great friend of Reform in whatever channel directed was mighty and overpowering, they sought to smother it by a resort to violent measures, and by tasking their wicked ingenuity to the utmost, succeeded in arousing a malignant spirit of persecution in the vicinity of Lexington, Ky., at which place it was originally started Finding that an exposition of the disgraceful and degrading system of slavery, accompanied by the irresistable arguments of its unnecessary existence, was awakening a strong feeling of sympathy and justice in behalf of the slave in the very heart of Kentucky, as a last resort, even while the editor was dangerously sick, they mustered together a score of brutish, cowardly ruffians and proceeded to the office of the True American and satiated their thirst for revenge by bruising and destroying much of the material, and tumbling it together, placed it on board of a vessel and despatched it for Cincinnati, at which place it arrived in a delapidated condition. All this, however, did not intimidate the morally intrepid Clay from pursuing the great work to which he had sacrificed personal and political popularity in his own State, and to which he had pledged his time, talent, ay and his very life also; and we find him soon after recovering from his severe indisposition and replenishing his injured office-material, resuming the publication of his independent Journal, in Cincinnati, and causing it to be distributed broadcast through the country and particularly whereever it could gain admission, into the interior of the slave population, and continued to do so un-

matters; and if one new branch of good fruit is [til his departure with his company of soldiers to engage in the Mexican War.

This last act we can but think has given to his friends a just cause for indignation and sorrow while at the same time we are bound to believe that he was influenced and deceived by mistaken notions of honor and policy; imbibed, honesily perhaps, from the principles of the semi-barbarous community in which be has lived, and the powthose who breathe the moral and more congenial atmosphere of the free states. While we must ever lament the imprudence of this foolish act, still is there are much in the character of this great man as shown by his magnanimous spirit and fearless and independent course in behalf of the down-trodden slave worthy of admiration.

The American is now edited by a native of South Carolina, who has proved the sincerity of his emancipation views by his acts, and who manifests much wisdom and ability in its management. We append the closing paragraph of his last leading article, hoping all true friends of railroads existing throughout the state. Charters ability ;-

We have thus stated some of the seasons which induce us to believe the maintenance of the True American essential to the progress of liberty. It is but just, however, that we should say plainly and directly to the friends of freedom in the free States, hat this cannot be done, unless they stand by it .-We furnish the True American to non-slaveholding white subsribers at a dollar for the year, and if the subscription elsewhere was so large as to pay more than the expenses, we would scatter the paper in every log cabin in Kentucky where is would be received and read. We have no pecuniary interest or aim in this matter. We have a nother employment which takes up our time curing the day, and we devote hours which should be given often to rest, and oftener still to our fami ly, to the True American. Without leisure to think out carefully fell that we say, or time to condense and correct, we give honest vent to our feelings and expression to our arguments, in de- G. Grav. lence of liberty. It was not always so with We remember the time when we bought and sold human beings as unconcernedly, as if they had been brutes of the field, and now, that wi see our error, and know the deep, deep sin it has entailed upon us, we would labor night and day t wake our countrymen to the efformity of the evi which is crushing them and their children, and stamping the very impress of God with degradation. Believing the True American to be an in irument in working out this great result, we ear nestly devote ourselves to it, and as earnestly asl he friends of freedom to sustain it !

The following was received from a fair corres pondent, which of course, relieves that sex from all suspicion in the manufacture of such "artikels."

It is said that a serious accident, which proved nearly fatal, happened to one of the club recently. In attempting to force through a barrel of the instrument the shadow of a truth, the cylinder burst, and by the explosion a whole heap of rotten compost which had been carefully digested and prepared for distribution among the starving populace, become ignifed. Fortunately a good supply of soft soap (a very valuable article with the fraternity) was procured, and poured on pretty thick, and by this means the threatening flames were smothered.

We are requested to give notice, that the Club ontinues to meet as usual, semi-occasionally, ar the most convenient place that can be found, where all those who desire to contribute to the common stock, (a good reservoir having been provided for its sate-keeping) or become honor-ary members, can do so, and obtain certificates which will entitle them to all the benefits of the club, and secure to them the usual large dividend which is declared invariably at every meeting.

It is understood, of course, that this invitation is extended to those only, who are destitute of self-respect, and have no regard for their own reputation or that of others; who delight in slander.

Danvers and Malden Railroad.

We think there is no project so essential to the interests and prosperity of this part of the town toin. The debate still continues in the Senate, as the proposed railroad from Danvers to Malden. by the Whig members, while the Democrats The fact, that it has been so strenuously and sys. rematically opposed for two winters by the Eas- lowing from the correspondence of the N. Y. Herern Railrund, shows very conclusively, we think ald :that that Corporation has confidence that it will be built, if chartered. Independent of that, the er of which is unknown and unimaginable to lacts which have appeared in the evidence before the Committee of the Legislatute, amply show whigher or lacofocoism, and nothing less. that the business which would naturally come upon such a road, would be sufficient to support it. We have not, and never have had, any doubt but if it does, it will be by a proviso extending the act of that if we could ger a charter, the Maine Extension Road would assist in its construction, and Boston terminus. We hope, therefore, that our of the House-several Senators-a member of the inizens will make another, and a stronger effort even than they have heretofore made, to obtain this subject of the Tariff—and an influential Senator a charter for this road. There is evidently a has tald him that the present hill of reductions is inmore liberal feeling upon the chartering of new freedom will give heed thereto according to their for numerous and important roads will beasked for from the next Legislature, and we mistake much if the narrow and suicidal policy pursued by the Legislature for the last two winters will not be entirely changed, and railroads put as they ought to be upon the same footing with other corporations, and the principle acknowledged that competition is the only preventative against the extension of monopolies.

ESSEX RAIL ROAD.

At the Annual Meeting of the Essex Railroad Company, held at the Mansion House on Monday, the Directors chosen at the meeting for organizaion were unanimously re-elected, viz: Joseph S. Cabot, Stephen A. Chase, Elias Putnam, Eben Sutton, Benj. T. Reed, Gayton P. Osgood, Henry

The President submitted a report stating the progress of the surveys &c. and a disposition seemed to prevail to push the work forward with all practicable rapidity. Operations will probaily be commenced within a very short time, so hat the road to North Danvers is expected to be pened before the winter commences. The surey, under the direction of Mr. Hall, the Engineer, is entirely completed from Salem to North Danvers, a distance of five miles, and the estimated expense of constructing this part of it will be ibout \$119,000. From Salem to North Andover such progress has been made as to authorize the expectation of a more favorable route than was inticipated from the preliminary survey. From North Andover to Methuen the route will be the same as that of the alteration of the Maine Exension Road, and it is proposed that an arrangement be made with that company for the use of heir track, so as to obviate the necessity for two roads, side by side, and two bridges across the Merrimac. The Methuen Company will afford all reasonable facilities for depot sites, &c.

The Directors were unanimously authorized to nake an arrangement with the Eastern Railroad Co. to furnish the cars and motive power for the whole or part of the Essex Railroad, when completed; and also to obtain a loan from their surplus funds, of a sum sufficient for the construction of such part of the road as the Directors should see fit, offering for security a morigage of such part of the road as may be built by the loan so made, and also to make such arrangements with the Maine Extension Co., for the use of their road from North Andover to Methuen, as may be necessary

A farewell meeting was held in the ancient church in Gloucester, West Parish, on Sunday afternoon, 12th inst., when a discourse, appropriate to the occasion, was delivered by Rev. Mr. Smith, August. of Gloucester, from the following exceedingly apposite text: "Is it time for you, O ye, to dwell in your ceiled houses, and this house lie waste?.... Who is left among you that saw this house in her first glory? and how do ye see it now? is is not in your eyes in comparison of it as nothing?"-Haggai, i. 4; ii. 3. After the discourse a poem written by Rev. Mr. Prince, of this town, and expressive of various thoughts and associations twakened by a visit to the old house, was read by Rev. Mr. Lee, of Salem. The church was densely thronged by an audience composed of people of lifferent religious persuasions, from Gloucester and vicinity.

This was the oldest church-edifice in Essex County, and among the most ancient now stand-(instead of 1713, as we erroneously stated a fortright since) and being therefore 136 years old .-The oldest church now standing in the United States is in Hiugham, Mass.

THE TARIFF.

The fate of the present Tariff remains uncermaintain a deathly silence. We copy the fol- July

We are in a most glorious condition at this crisis -for it is a crisis—a crisis to the administration— and pursued this, his favorite avocation for whic a crisis to the party—a crisis to the country—and a crisis of life or death to Pennsylvania, At the hazard of our reputation, as a prophet, we now tell you that the tariff bill from the House will determined with the advice of his friends, to s not pass the Senate without material modification, or 1842 in its operation to the expication of the next session of Congress. The administration is in great perturbation. The President to-day is really excited, afford every facility and accommodation at the irritated, dispirited and alarmed. Several members Cabinet-and a number of private citizens from the States, have called to see the President to-day upon expedient, unsafe, and dangerous. It does not yield the revenue required-it diminishes the revenue, when we are compelled to borrow money-if adopted, it will drive you to direct texation or a speedy repeal, and either would be very hazardous. either case Pennsylvania is lost—gane by the board; and as goes the Keystone so goes the Union, It is said Mr. Dallas, the Vice President has ap-

pealed to Mr. Walker to save him from the disaster of the casting vote, in recommending a mitigation of the destructive schedules of the bill, especially the thirty per cent schedule. And the news to-night was that there were ascertained to be nearly half a dozen of Democratic Senators, who are all anxious for a compromise,' or an entire abandonment of the bill, as preferable to its pussage in its present form. Day hy day the cloud has been thickening, and to-night we hear the muttering of ominous thunder.

Mr Clay effected a compromise in 1835 in favor of the South; what could you think, if Mr. Calhoun were to be equally instrumental in a compromise to the salvation of Pennsylvania on the bill of '46-by a graduation of its reductions.

The Washington correspondent of the New York Express says : - There is an earnest effort making to compromise the Tariff question here, Mr. Webster and the manufacturers taking part in it. The plan s to reduce all the duties above thirty per cent in the Tariff of 1842 to 30 per cent, retaining the specifics wherever they exist in the law of 1842. This is the main feature in the proposed compromise.

The Locofoco organ, [Salem 'Advertiser] of Wednesday attempted one of those dirty cheats for which Locofocoism is famous, but which no honorable man would be engaged in. This was no less than an endeavor to impose upon the people of this District the belief that their Represen; native is in favor of abolising the Fishing Bounties! The organ knows better, but seems to think that the fishermen are fools enough to be swindled out of their votes as the Pennsylvanians were-under false pretences. This book was printed some three hundred and fifty years ago, and though its appearance would indicate it to have been coeval with the aniesleluvians, it is only rendered dearer by the mutilations of time. of heart.—Manchester American.

The most vivid description of the fire tha have seen, is given in the following letter a correspondent of the Exeter News Letter:

Along the path of the flames were stored n thousand barrels of oil, and tons of spermace The casks were burned through, and the li ran down the streets, converting them into pe rivers of fire, driving the appalled inhabit before it and washing the buildings that line ways with burning waves. So rapid was its proach to so re points, that men had barely to escape, and even two fire engines were prey to the element. It ran out upon the vin the harbor, still blazing, and resembled, thousand flashes and spires of light a gorg pulace of gold amid the sea. The country was as light as at noon. For hours, the town a lake of fire; the moon looked bloody, and th glared above, while the noise of the flames like the roar of the ocean, and the explosion blowing up the houses, like the tempest-bu thunder.

It was morning before the progress of th struction was checked, but many, who say sun go down, in affluence had been reduced its rising, to poverty and destitution.

Numerous were the thrilling incidents occurred during the hours of the night. A of the officers and crew of a Revenue Cutter in the harbor, came ashore, and rendered val assistance. At the time, just as a store blown up, they lost site of their commander, it was feared he was killed. Several minu ntense anxiety passed, but at length he found unharmed, and so great was the the seamen, that they opened their arms, an ceived him with repeated embraces.

Two ladies, strangers in the town, not k ing whither 10 go, fled to one of the whare safety. In a brief period, every building nea head of the wharf was on fire. The burn poured into the docks, and they were a hearmed in by flames; the wharf was supp by wooden piles, and in momentary danger this frightful situation, they remained than an hour, but were finally discovered boat from the Revenue Cutter, and rele from their distressing position.

FATAL AFFRAY. - On Wednesday evening last, a quarrel occured at one of those liquot cellars in Broad street, Boston, which has resulted in the death of one of the parties. The principal rioters were John Wiley and Jeremiah Moore of Andover, and a hoarder who lived with Wiley .-Moore invited Wiley into a cellar to drink with him While they were drinking, Moore extended his invitation to two or three others, which after drinking, Moore refused to pay for. This irritated Wiley, and led to hard words between the ted Wiley, and led to hard words between the two, upon which Wiley seized Moore—who is a very old man—by the collar and threw him down upon the curb-stone, stunning him and bruising his head severely. Wiley was arrested by Constable Ripley, who encountered some difficulty in the attempt. Moore has since died.

NARROW ESCAPE. As two trains of cars on the Lowell Railroad were passing each other at Wilmington, on Monday morning, a little boy three or four years old fell head foremost from a window of one of them between the trains. It was of course supposed he was crushed to death, was or course supposed he was crushed to death, when to the surprise of every one, he rolled over in the sand, picked himself up, and was found running lustily in pursuit of the cars.—Boston

about to marry the only daughter of a prominent member in Congress, from Mass. The young lady is about 23 years old, highly accomplished and amiable.

The times are so hard, and the payments so rare, that some of our city girls complain that the young men don't PAY even their addresses.

A new exibition of Wax Statuary, comprising one hundred and forty six figures, of un-rivalled splendor, designed and executed by Mrs. Pelby, has recently been opened at Phillips Chapel, Tremont street, Boston. The representations are—The Birth of Christ, The Trial of Christ, The last supper, Abraham offering his son Isaac as a sacrifice, The Intemperate Family, &c. &c. The figures are mostly the size of life, and display a skill of wonderful exactness and accuracy.

Capt. Page, who was recently wounded in the battle near Matamoras, has since died.

From the Salem Register.

If among the various mysterious allotments of Providence there is one which more than all others must occasion the most heartfelt sorrow and the keenest grief, it is that which snatches from the embrace of relatives and friends, one in whom was centered the fondest hopes and friends, one in whom was centered the fondest hopes and friends, one in whom was centered the fondest hopes and friends, one in whom was centered the fondest hopes and friends, one in whom was more truly and justly heloved. Mass., from what I have seen of his Trusses, and from the circumstance of his having supplied several thousand persons in Massachusetts, and other parts of the country, with an article that I think is well calculated to the design of the inventor, I have no hesitation in recommending his Truss to the public; and I helieve him to possess, the ability of adapting Trusses to an case that may be presented to him.

From Dr. Greene Hoston

From Dr. Greene, Boston.

I have sent many patients to be fitted with Trusses and Abdominal Supporters, by James F. Foster, and he has uniformly given full satisfaction in their application.

The benefit of such instruments is often lost, in consequence of their imperfect construction, and from neglect in properly fitting them; on this account, I am in the habit of sending patients to Mr. Foster, confidently believing that he will give them a good article, and see that they are well fitted.

"ROAR."

Those who remember the events of 1842, in Boston. he raising of the sign of

"OAK HALL," will not easily forget the tremendous excitement prouced in the fa shionable ready made clothing and fur nishing line, in the debut of the subscriber. It first developed itself in gentle ripples upon the sluggish sea in this branch of trade; anon the ripples took the form of swelling waves, rolling each upon another, unof its deep bosom was lashed into a tempest fearful to

of its deep bosom was tashed into a tempest rearrial to behold, sweeping the high price and long credit system into the deep gulf below. But to descend from this high state of metaphor.

Until April 1842, when GEORGE W. SIMMONS took the field, it was not supposed for a moment, that an individual possessed the temerity to take the attitude of innovator of old established customs of trade. of innovator of old established customs of trade.

Until this time, men had gone on their old plotding way giving long credits, demanding as a recompense for the long hope, from fifty to one hundred per cent advance. At this interesting epoch, the startling announcement was heard, emanating from "OAK HALL,"

LARGE SALES AND SMALL PROFITS. LARGE SALES AND SMALL PROFITS.

This annoucement awoke the dreaming thousands, Old men arose from their recumbent position, rubbed heir heavy eyelids, stretched their cramped and benumbed limbs; young men congregated on the corners of the streets and looked unutterable things—guesses and surprises were rife,—when straight all began to cry "Mad Dog." Still on I went, unawed by threats, nor caioled by flattery, until finally I have laid fast nor cajoled by flattery, until finally I have laid fast and strong, a pinnacle stone as lasting and durable as the hills. To prove the advantage of the CASH SYSTEM

over all others, needs no lengthy tale. It must be apparent to the most casual observer, that while it shields the venur from the ruinous losses often attendant upon the venur from the runous cosses often attenuant upon the crediesystem, it protects the purchaser from the equally runous profits demanded by merchants to cover bad debt, created by a system of long credits. To those, therefore, who can command the READY CASH,

this Establishment offers the strongest inducements. The Stock being purchased fresh this Spring, at auction, and direct from the manufacturers, at some 25 per cent less than the cost of importation, and being satisfied with small profits, will sell at a slight advance

upon auction prices.

And I would respectfully invite the attention of the citizens of Boston and vicinity to my unusual RICH DISPLAY

Received by the late arrivals per steamers and packet ships from England and France. I have also purchased from our own home manufacture, at low prices, an ELEGANT ASSORTMENT, adadpted to this Spring and coming Summer, that will in point of beauty and splendor eclipse all other presious exhibitions at this popular place of resort. The system and course I have adopted, viz:

LARGE SALES AND SMALL PROFITS satisfies me that I can with the utmost confidence re

SMITH'S PATENT

FLEETING SHOWER BATH

THICH is far better than any other and very much superior to the objectionable Cast Iron
Bath. The proprietors of this justly celebrated Bath have
extensively introduced it into different parts of the United
States and are now manufacturing them in large quantities,
of different style and finish, to meet the wants of the public. The increasing demand for this desirable and useful
piece of furniture only substantiates what the subscriber
has before asserted, that it has been and continues to be
the most preferable Portable Shower Bath in the market,
and for the following reasons:

has before asserted, that it has been and continues to be the most preferable Portable Shower Bath in the market, and for the folowing reasons:

1st. It is not encumbered with heavy weights and pulleys, or a clumsy cast from top and bottom, which would make it expensive, liable to rust, break, and get out of repair, not easily moved about, inconvenient in its operations, and unpleasant for the bather. But on the other hand, it is very cheap and durable, light and portable, operates effectually, and can be agreeably and pleasantly used.

2d. It does not require a ten horse-power to lower the fountain; neither is it necessary to fasten it down when lowered, to prevent its running away like an unruly horse—but can be lowered in an instant by the slightest exertion, and readily raised, without compelling the bather to exhaust all his strength. In short, this Bath is what hundreds of individuals of the best respectability have pronounced it—all that inechanical skill could put within the same compass and expense I would therefore respectfully say to those who wish to purchase or examine this desirable article, call on the subscriber, at No. 121 Boston street, Salem, who will take great pleasure in more minutely detailing to them the respective merits of the Fleeting Shower Bath, by personal demonstration.

Sir,-In February last, I took a sudden cold, after which a hacking cough constantly annoyed me, and this, combined with my other maladies, rendered ma truly miserable, as everybody told me that I was in e consumption. Since, I have taken LORRAINE'S PILLS and now every body tells me that I am well ;—I fee as well as ever I did.

Portland, Me., Nov. 7th, 1843 Sir: Please send us one gross of Lorraine's Pills, we have sold all we had last. They have given very good satisfaction, better than any other pills which we have in our market. I think in a short time they will take the place of others. We have had no fault found with them whatever; but, on the contra ry, they have been praised loudly. I think we could have quite a number of highly respectable cer

THE INQUIRY.

Tellime ye winged winds,
That round my pathway roar,
Do ye not know some spot
Where mortals weep no more;
Some lone and pleasant dell,
Some valley in the West,
Where free from toil and pain, The weary soul may rest?
The loud wind dwindled to a whisper low,
And sighed for pity as it answered, "No."

Tell me thou mighty deep,
Whose hillows round me play,
Knowest thou some favored spot,
Some island far away.
Where weary man may find
The bliss for which he sighs, The bits for which he signs,
Where sorrow never lives,
And friendship never dies;
The loud waves roaring in perpetual flow,
Stopped for awhile, and signed to answer "No."

And thou, serenest moon.
That, with such holy face,
Dost look upon the world
Asleep in night's embrace;
Tell me in all thy round, Hast thou not seen some spot Where miserable man
May find a happier lot?
Behind a cloud the moon withdrew in wo,
And a voice, sweet but sad, responded "No."

Tell me, my sacred soul,
O tell me, hope and faith,
Is there no resting place
Crom sorrow, sin and death? Tom sorrow, sin and death

Is there no happy spot

Where mortals may be blessed,

Where grief may find a balm,

And weariness a rest?

Faith, Hope and Love, hest boons to mertals given,

The following is said to have been composed by Dr Jenner, as an excuse for not accepting the invitation of a friend to make an excursion with him;

The bollow winds begin to blow, The clouds look black, the grass is low; The soot falls down, the spaniels sleep, And spiders from their cobwebs peep; Last night the sun went pale to bed, The moon in halos hid her head; The boding shepherd heaves a sigh, For see a rainbow spans the sky; The walls are damp, the ditches smell, Closed is the pink-eyed pimpernell; Hark! how the chairs and tables crack Old Betty's joints are on the rack Loud quack the ducks, the peacocks cry, The distant hills are looking nigh; How restless are the snorting swine, The busy flies disturb the kine; Low o'er the grass the swallow wings, The cricket how sharp he sings Puss on the hearth with velvet paws, Sits wiping o'er her whiskered jaws; Through the clear stream the fishes rise, And nimbly catch the incatious flies;
The glow worms numerous and bright. Illum'd the dewy dell last night;
At dusk the squallid toad was seen, Hopping and crawling o'er the green.
The whirling wind the dust obeys, And in the rapid eddies plays;

The frog has changed his yellow vest,

And in a russet coat is dress'd;

Though June the air is cold and still, The mellow black-birds voice is shrill; My dog so altered in his taste,
Quits mutton-bones on grass to feast; And see you rooks, how odd their flight, They imitate the gliding kite; And seem precipitate to fall,
As if they felt the piercing ball,
'Twill surely rain, I see with sorrow,
Our jaunt must be put off to-morrow.

TAKE THE OTHER HAND .- It was one of the first days of spring, when a lady, who had been watching by the sick bed of her mother for some weeks. went out to take a little exercise and enjoy the fresh air. She hoped that she might hear a bird sing, or see some little wild flower, which would speak to her of her future hopes, for her heart was tull of anxiety and sorrow. After walking some distance, she came to a ropewalk. She was familiar with the place and entered. At one end of the building she saw a little boy turning a large wheel; she thought it too laborious for such a child, and as she came near she spoke to him :

'Who sent you to this place?' she asked.
'Nobody; I came of myself.' Does your farher know you are here ?'

'I. have no father.' Are you paid for you labor ? 'Yes; I get nine-pence a day.' 'What do you do with you money?' I give it all to my mother.'

Do you like this work?' Well enough; but if I did not, I should do that I might get the money for my mother.

How long do you work in the day?
From nine till eleven in the morning, and from wo till five in the afternoon. How old are you?

'Almost nine. Do you never get tired of turning this great

wheel?'
Yes; sometimes.'
'And what do you do then?'
'I take the other hand.' The lady gave him a piece of money. Is this for my mother? he asked, looking

'No, it's for yourself,' 'Thank you, ma'am,' said the boy, and the lady

JUVENILE SWINDLER. A gentleman stopping in this city, relates the following instance of youthful vagrancy:

While wending his way through one of the by streets, he was accosted by a fatterdemalion boy who piteously begged for a sixpence to buy a loaf of bread for his dying mother. The stranger's heart was moved; the orchin grasped the sixpence given with a look that spoke volumes of gratitude, and dartied away around the next corner to fulfil his mission of filial love. The stranger walked around the corner also, with a swelling heart, when he was surprised to see in a neighboring alley half a score of young archins pitch-ing coppers. In their midst stood our young vag-aboud, exhibiting his sixpence, and exclaiming an amiable creature, about the age of sweet

BLACK SAM,

Who could not blacken the Volunteer's boots, but who was death on conundrums.

As Sam, the negro hoot-black, was passing up St. Charles street yesterday, with the implements, of his 'purfussion,' as he himself says-brushes, blacking; and a piece of stick with a hevelled edge on it, in a basket, under his arm, he was hailed by an Indiana volunteer, whose boots were outside his trowsers up to his knees, and the muck on which was an inch thick, more or less; he

was literally up to his knees in mud. 'I say, old Lignumvitæ!' said the volunteer,

are not you a boot-black ?1 'Wal, I isn't nutin' else, said Sam. 'I has polished dis ere squar—dat ar, de people won lives, in it—for de las' fifteen years. You see, de purfussion has extended to me in de reg'tar maternal line: my farder was boot-black.

'All right, Ebony,' said the volunteer, rising his foot and resting the high of his boot in Sam's lap* and supporting himself against the lamp-post.

Now, the volunteer's boots, be known, besides being partially wet particularly dirry, never since they carried off the last, or perhaps even then, had brushed acquaintance with 'Day & Martin,' or any substitute for that 'unrivalled' blacking.

Sam, nothing daunted, however, went to work. He scraped off the din and brushed in the blacking; but, although he rubbed, and continued to rub the boot remained as dull and as dark as Ere-

bus.

'Go ahead," said the volunteer.

'I calls dis goin' a foot, massa, said Sam.,

Capital Dog Story. Mr. Edwin Barnes, of Berlin, Ct., furnishes for the Hartford Times, the following very excellent story illustrating the wonderful sagacity and perseverence of dogs. He

says—
Some years ago my father had a large dog that he had learned to send from the field to the house for any thing he might want. It happened one day that he was at work about half a mile from home and wanted an axe. He told Caro, (the name of the dog,) to go home and get the axe; the dog started off, and after being gone a in sward and outs must be set earner than in axe; the dog started off, and after being gone a considerable time, came sneaking back, but with If you had neglected to look to your apple and quince trees earlier you can now examine and set it le axe. My fatter told him to go back and get the axe. The dog went the second time, and it the borer is nigh. You may find his chips near the ground, and may be you will find some young worms yet unburied in the bark. It will do your trees good now to wash the bodies with potash trees good now to wash the bodies with potash himself, and found it firmly sticking in a large log and the helve knawed from one end to the other by the faithful animal, in trying to extricate it from the log, and being unable, he had taken the bettle as a substitute!

DANVERS COURIER:

SATURDAY MORNING AUGUST 22, 1846

THE GAG SYSTEM.

The dishonest precipitancy and blindfolded pat riotism manifested by the administration party is widely at variance with the true spirit of our republican government and liable to engender and encourage a system of unjust and corrupt legislation. The evidence of this disposition is distinctly seeu in the successful attempts during the late Presidential election to discourage all enquiry in regard to the qualifications of the present Chief Magistrate who was then a candidate for the suffrages of the people. And more recently during the late session of Congress, has this desire to choke and strangle and prevent a free discussion of principles and measures, been too conspicuously displayed to have escaped observation.

Perhaps a short extract from the Speech of Mr Hudson of Mass., on the Army and Appropriation Bill will serve to enlighten us as to the policy of this corrupt administration:

A message was received from the President of be United States with reference to our relations h Mexico. This message was accompanied voluminous correspondence which passed been our Government and Mexico, and also be-...een the Executive and Gen. Taylor. The House resolved itself into a Committee of the Whole to consider the subject. The debate, by a whole to dominant party, was limited to the short space of two hours. One hour and a half short space of two hours. of that time was consumed in reading the correspondence, and even then one half of the papers were not read. The chairman of the Committee on Military Affairs called up a bill, which had been for some time upon our table, which simply authorized the President to accept the services of volunteers, should they be necessary to defend our own soil, or repel invasion from our territory. This bill was under debate for some thirty minutes but no Whig was able to obtain the floor. Then, for the first time, a declaration of war was mentioned, and sundry amendments to that effect were When the time for discussion expired, the committee passed upon the amendments, and the bill was immediately reported to the House, and passed under the previous question. Thus, sir, was war declared after a debate of some thirty minutes only, and that confined entirely to a few brief remarks by four members of the Democratic party. Not an individual of the minority was permitted to say a word upon the great and absorbing question of peace and war. The House knows, and the country shall know, the hasty and inconsiderate manner in which they have been involved in all the horrors of war. A grosser instance of precipitancy and rashness cannot be found in the history of any assembly calling itself

a deliberative body.

Thus, sir, were the Whig party in the House compelled, by a tyrannic majority, to pass upon this great question without a single word of debate on their part, and without having one-half of the documents which were submitted by the President read! And now we are told, by the mem bers of the same dominant party, that it is treasonable to speak against a measure thus hastily and tyrannically forced through the House, with out debate, amid scenes of excitement and confusion. Opposition to this measure, we are told would have been proper before it had passed but now, being at war, all opposition to the measure shows a want of patriotism, and a disposition to take sides with the enemy. Sir, I admit no such principle; I will submit to no such iron rule. And has it come to this, that all debate is to be suppressed in this Hall-that freedom of speech is to be denied to the representative of the free people? A doctrine more despotic was never advanced. According to this doctrine, if the President, led on by vain ambition, or by a treasonable desire to raise himself to a throne on the ruins of our free Government, has the wickedness to trampie upon the prerogatives of Congress, and comare to submit in silence, because hostilities have already commenced. We are to stand by in the meek submission, and see our right invaded, and the property and lives of our citizens wantonly sacrificed, because a drilled majority of political partisans may have succeeded in pressing through Congress, without debate, an endorsement of Executive usurpation. I say, sir, I will countenance no such doctrine; I will submit to no such dog-

We are told, by gentlemen on this floor, that it is treason to oppose the Government in time of war. Sir, I have no sympathy with that dastarda weak or wicked Executive may usurp power and involve the nation in an unjust war, and an unscrupulous majority may press through the House, without debate, a bill sanctioning that iniquitous procedure, and then all mouths must be closed on the subject? Is this the liberty and the only liberty granted to the representatives of a

It will be remembered that Mr. Hudson was a mong the few, or as they were tauntingly named by one of the loco foco members of the Housethe "ignoble fourteen"-who had the manly independence to vote in regard to this bill as his own sense of honor and justice dictated. Mr. King, our own Representatives was also one of the small number who dared to oppose or deny and imprudent public servants, for which he deserves and we doubt not will ever receive the gratitude and commendation of his constituents.

Towards the close of the session we had another display of this unjust policy, and which but for the indomitable energy and perseverance of Jones sage was received by Congress from the President desiring an appropriation of two million of dollars to be placed under his control to be used if necesary in the adjustment of peace with Mexico. A sary in the adjustment of the peacition of the manufacturing company, by which William malignant kind of cholera morbus, caused probably the chattering company, by which William malignant kind of cholera morbus, caused probably by the peculiar state of the weather, and a state of the weather, and of the Senators from this state-"honest John

bill to that effect passed the House of Representatives with an amendment, that in the event of an accession of territory by a treaty with Mexico, involuntary servitude should not exist thereiv. In the Senate however, an attempt was made to pass to be laid in that harbor. A writer in the N. Y. the bill, rejecting the amendment of the House, Monday, a few moments previous to the adjournment, Mr. Davis, of Mass., having the floor embraced the opportunity to enquire into the cause which led to the desire of rejecting the amendment, but was coldly repulsed with the reply that it was too late to give reasons or discuss the merits of the bill : Mr. Davis objected to this procedure in a short speech which however consumed the few moments previous to the arrival of the hour fixed upon for adjournment, and for thus indulging a spirit of inquiry and desire to vote understandingly has the honorable Senator been cen sured by several of the leading democratic newspapers. For ourselves we can but admire the course pursued by the cautious and far-seeing Senator. Most assuredly if the President and his only by a desire to effect an Bonorable and speedy restoration of peace, there could have been no reasonable objection to the amendment which passed the House. The desire that exclusive control and arrangement of the terms of peace with Mexico be placed in the power of the Executive, without any intimation as to what those terms might be, judging from the previous course and his administration, might well admonish Mr. his administration, might well admonish Mr. Milton Brainau, has been recently tried in the Davis of the possibility of this appropriation being State of New York, for the murder of his wife. used to extend the 'area of freedom,' and encourage heartily glad that he was the means of defeating our former antagonist. The Difference.

In our last paper we took some notice of the doings of Congress, and the state of humiliation and disgrace brought upon the country by the present administration. It may be well now to make:a comparison of this state of public affairs with what would have existed if HENRY CLAY had been elected and Whig councils had been in the ascendancy.

In the first place we should not have had Texas annexed to the Union with all its horrid train of slavery, war, national debt and national crime. We should not have had two Texas Senators to to meddle in the matter at all .- Boston Trumpet. give strength to slave-holding legislation, to give plied in carrying on an unjust and most disgraceafterwards the humble backing out in the case of the Oregon controversy. We should not have seen a monster national bank placed in the control of the government under the name of an Independent Treasury.

These and many other acts of the present administration equally dishonorable and unworthy of any civilized government, would not have been We never dreamt of so libelling the editor of the witnessed had Henry Clay been elected President of these United States, as he would have been had it not been for the vile deception practised upon the people of Pennsylvania in representing that if they would ever have discovered it. mence an unjust war with a foreign power, we Mr. Polk was in favor of the Tariff of 1842. Had the so-called Liberty party voted for Mr. Clay, Slavery would have been penned up in the limits then assigned to it. We should have had no more Whittemore, the former so severely joked the latblack territory, no Texas, no war, no British Tar. iff, no Sub Treasury, no causes for money panics and no National Debt. We should have had a vast free territory spreading around and by its increasing population rooting out and swallowing up Slavery. Kentucky would soon be stepping into the ranks of the Free States, and Maryland and Virginia would speedily follow. We should have ly sentiment. What! has it come to this, that had a good protective Tariff which would give work and good wages to the American laborer. We should have had a good currency for the business man, and a good market for the farmer. Instead of a National Debt, we should have just claims on the Government paid and objects of national utility advanced to completion.

tree people? Is it treason to point out the faults of a corrupt Administration? Are we to submit in all things to the will of the President? It so, we have nothing left of liberty but the name. We re already under a despotism. Such doctrines any answer for corrupt sycophants, who bow to the Executive for place, but they are unworthy of freemen. lesson be learned from this which shall in any future election prevent the Whig cause from defeat through the divisions existing among its friends.

Long Pond; Waterworks.

This important undertaking was commenced on Tuesday last in Framingham, with interesting ceremonies, in presence of the Selectmen of several towns, the Mayor and Aldermen of Boston, and other distinguished characters. The Mayor the usurpation and hot haste of those unworthy of Boston broke ground by turning the first sod after which several addresses were made.

The great Atlantic and St. Lawrence Railroad was recently commenced with similar solemnities, Judge Preble throwing the first shovel-full of earth. On Wednesday last operations commenced on the Essex Railroad at Carltonville, the first shovel full

Submarine Telegraph.

Some interesting experiments have recently been made in the Portsmouth dock-yard, England, with a portion of the submarine telegraph about Sun states, that the electric fluid was made to which was of course, extremely objectionable in traverse the whole length of the submatine telethe eye of the Southern portion of that body. On graph, which, having been carried out in a hoat from a vessel by the boats in attendance, was allowed to sink to the bottom. The signals were as promptly shown by the index as though merely transmitted from the deck to the engine room without passing so many fathoms through the sale water, thus proving beyond doubt the practical success of this mode of conveying intelligence even

The importance of these experiments is obvious for if communication can be carried across Portsmouth harbor, it follows as a matter of course that it may, with at least equal facility, be carried from headland to headland, where it cannot be interfered with by the anchorage of numerous vessels. Thus between Great Britain and France, or any other country separated only by the sea, distance is anfriends in Congress, in this request were actuated nihilated; in fact this new mode of telegraphic communication appears to be one of those wonders which, however strange now, will be looked upon hereafter as a thing of course; and it is scarcely too much to expect that in less than half a century a merchant may communicate with his agents in Calcutta in the morning, and receive his reply before sitting down to his supper in the evening.

Braman, of Danvers, Mass tor of the 'Danvers Courier' would fain make his readers believe was intended on our part as a reflection against Rev. Mr. Braman's character. No such ming, sir. It was a mere piece of pleasan ry. Mr. Braman will find no fault about it and we do not think it wise for the editor of the Courier' to meddle in the affair at all. Does h think Mr. Braman is unable to defend himself that he must needs volunteer in his behalf?
